

Conversion Rate Optimization (CRO) Testing:

Home Page Round 8.1 – Control vs Product List Redesigns

Tested product list redesigns against the Control to improve shopper confidence in getting started. Version C was the winner resulting in a **7% lift in Quote Starts, 2% lift in Quote Submits, and 30% lift in Orders.**

Objective & Hypothesis

Objective: Our previous redesign saw successful lifts in KPIs. We want to measure if making the product list even simpler will convince shoppers to get started.

Hypothesis: Reducing details in the product list will convince shoppers to get started faster resulting in improvement in KPIs.

Results

Version	Sessions	Quote Start Rate	Lift
A (Control)	24714	2723 (11.02%)	
B	24249	*2911 (12.00%)	*+8.95%
C	24246	*2848 (11.75%)	*+6.61%

Version	Sessions	Quote Submit Rate	Lift
A (Control)	24714	1657 (6.70%)	
B	24249	1628 (6.71%)	+0.13%
C	24246	1664 (6.86%)	+2.36%

Version	Sessions	Order Rate	Lift
A (Control)	24714	341 (1.38%)	
B	24249	352 (1.45%)	+5.21%
C	24246	*435 (1.79%)	*+30.03%

* Indicates Statistical Significance

Action Items & Next Steps

- UHOne:**
- No further action is needed from the UHOne team at this time.

- Night Market:**
- Currently measuring if TTM as the first product will increase TTM orders.
 - Provide winning code design to UHOne.

- Night Market Testing Opportunities:**
- Retesting price insertion tactics towards the new winner.

Test Details: All Devices

Date Duration 6/12/23 – 6/26/23

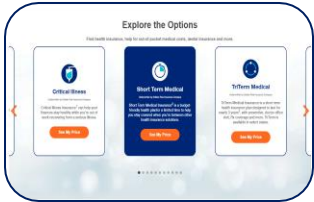

Target URL <https://www.uhone.com/>

Primary KPI
Quote Start Rate: The rate at which shoppers enter their zip code to get started or select a plan to go to the Census form.

Secondary KPIs
Quote Submit Rate: The rate at which shoppers submit a quote to enroll in a plan

Order Rate: The rate at which shoppers submit an application.

Control

B – Simple Redesign

C – Simple Redesign With Descriptions
