Test Summary

Individual Test Readouts

Key Takeaways +
Considerations

Test Outline:

- 7 distinct test cells with updated landing pages to drive paid search visits to pages with higher click to inquiry rate

Key Outputs:

- Impact readout by individual test
- Strategic recommendation on future usage of landing pages to keyword themes

Main Finding:

- Tests in HR, Business, and Online Options resulted in statistically significant lift
- Insignificant results on other test cells

Methodology:

- Updated LPs based on rules for current LP and keyword relevance to drive to new LPs
- Measured pre-redirect performance compared to post redirect performance
- Adjusted results for seasonal historic trends and tested for confounding from other changes

Redirect results point to \$4.41mm in incremental revenue upside over 12 months

Click to Inquiry Rate:
+4.2% Raw Lift
+0.8% Seasonally Adj Lift

Incremental Inquiries:
+224 Raw Lift
+97 Seasonally Adj Lift

Cost Per Inquiry:
Decreased by -\$15.71

Paid Search LP Redirect Test Readout

Redirect “Software Engineering” queries to the Software Development page

Control

Experiment

Metric	Pre Period	Post Period	% Change
Clicks	465	813	+74.8%
SF Inquiries	47	83	+76.6%
Cost	\$16,773.99	\$29,258.16	+74.4%
Impressions	14,492	30,821	+112.7%
Click-to-Inquiry Rate	10.11%	10.21%	+1.0%
Cost per Click	\$36.07	\$35.99	-0.2%
Cost per Inquiry	\$356.89	\$352.51	-1.2%

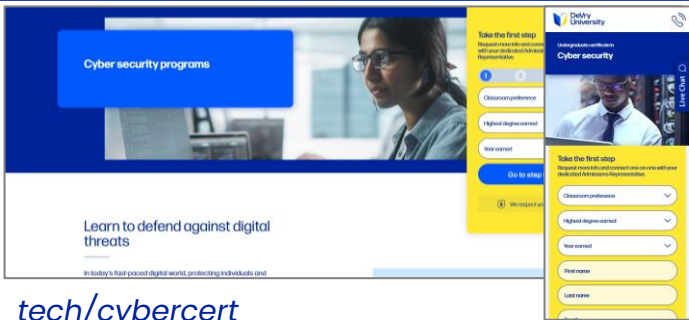

Flat – Not Significant

Key Callouts:

1. Click to Inquiry rate increased by 1% during post period
2. Total Inquiries scaled with increased budget over test period
3. Keywords containing “software eng” eligible for redirect

Redirect “Cyber Security” queries from Certificate to Full Degree page

Control

Experiment

Metric	Pre Period	Post Period	% Change
Clicks	6,120	9,440	+54.2%
SF Inquiries	667	1,008	+51.1%
Cost	\$223,533.15	\$340,163.69	+52.2%
Impressions	210,962	301,971	+43.1%
Click-to-Inquiry Rate	10.90%	10.68%	-2.0%
Cost per Click	\$36.53	\$36.03	-1.3%
Cost per Inquiry	\$335.13	\$337.46	+0.7%

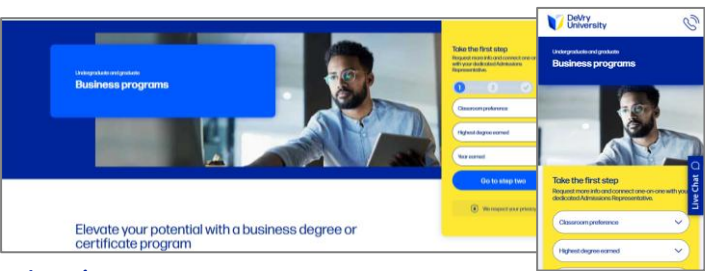

Negative – Not Significant

Key Callouts:

1. Click to Inquiry rate declined by 2% during post period
2. Cost per inquiry increased slightly on increased budget
3. Keywords relating to cyber security that don't include “cert” were eligible

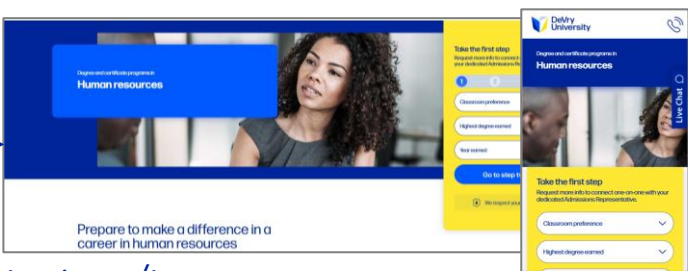

Redirect “Human Resource” queries from Business pages to HR sub-page

Control

business

Experiment

business/humanresources

Metric	Pre Period	Post Period	% Change
Clicks	1,976	3,006	+52.1%
SF Inquiries	159	258	+62.3%
Cost	\$46,873	\$72,754	+55.2%
Impressions	52,468	72,193	+37.6%
Click-to-Inquiry Rate	8.05%	8.58%	+6.7%
Cost per Click	\$23.72	\$24.20	+2.0%
Cost per Inquiry	\$294.80	\$281.99	-4.3%

Positive – Not Significant

Key Callouts:

1. Click to Inquiry rate increased by 6.7% during post period
2. Cost per Inquiry declined by 4.3% despite increased budget
3. Any keywords with “human resources” or “hr” were affected

Consolidate Business pages to Management page

Control

/business/project-management
/business/online-options
/business

Experiment

/business/management

Metric	Pre Period	Post Period	% Change
Clicks	7,680	8,643	+12.5%
SF Inquiries	738	935	+26.7%
Cost	\$234,126.32	\$290,951.55	+24.3%
Impressions	255,361	312,432	+22.3%
Click-to-Inquiry Rate	9.61%	10.82%	+12.6%
Cost per Click	\$30.49	\$33.66	+10.4%
Cost per Inquiry	\$317.24	\$311.18	-1.9%

+12.6% C2I – Statistically Significant

Key Callouts:

- 1. Click to Inquiry rate increased by 12.6% during post period
- 2. Efficient Spend: 1.9% decrease in Cost per Inquiry with +24.3% increase in Cost
- 3. +76.4 incremental inquiries over expected seasonal value

Consolidate Business Pages to Management Page Ctd...

In Test Measurement:

- During the test CPI declined by \$2
- The 12.6% increase in click-to-inquiry resulted in 108 Incremental inquiries
- Incremental inquiries drove \$64,384 in seasonally adjusted revenue

Historic Analysis:

- Using L12M data we isolated eligible keyword / LP combos and estimated the impact the test would have had on historical performance
- If the test had been in place during the full 2025 period \$1.36MM in incremental revenue would have been generated

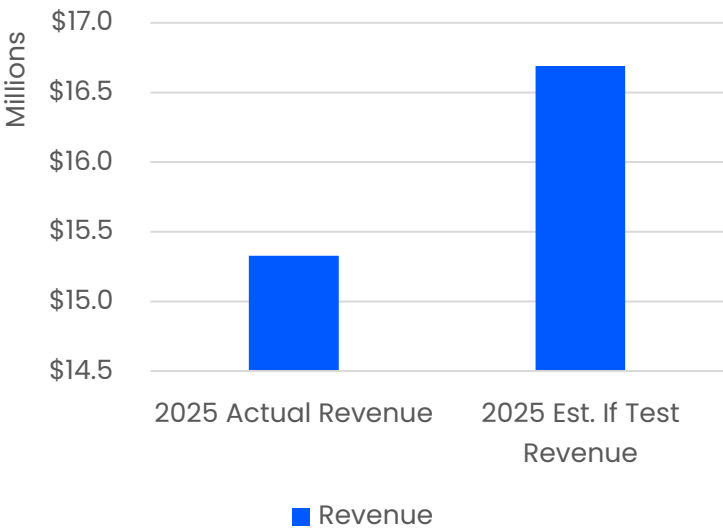

Rev Estimated using 14.4% inquiry to app rate, 33% app to enrollment rate, \$17,740 Enrollment value

In Test Measurement

Incremental Revenue	Seasonally Adj Incremental Rev	Pre CPI	Post CPI	CPI Change
\$91,040	\$64,384	\$321.31	\$319.39	-\$1.92

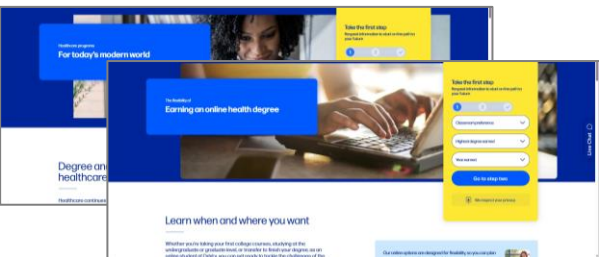

Impact Analysis Using L12Months

Metric	LY (2025) Eligible Actuals	LY w/ Test Improvements
Clicks	227,946	227,946
SF Inquiries	18,182	19,798 (+1,616)
Click-to-Inquiry Rate	7.97%	8.7% (+12.6%)
Est. Revenue	\$15,327,513	\$16,689,809 (+\$1,362,296)

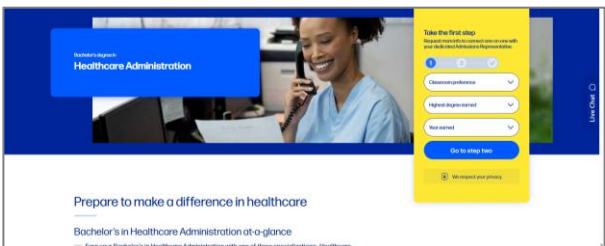

Consolidate Broad Health landing pages to Health Admin landing page

Control

/health
/health/online-options

Experiment

/health/healthcareadmin

Metric	Pre Period	Post Period	% Change
Clicks	1,900	2,544	+33.9%
SF Inquiries	103	134	+30.1%
Cost	\$58,824.97	\$76,106.17	+29.4%
Impressions	56,223	83,249	+48.1%
Click-to-Inquiry Rate	5.42%	5.27%	-2.8%
Cost per Click	\$30.96	\$29.92	-3.4%
Cost per Inquiry	\$571.12	\$567.96	-0.6%

Negative – Not Significant

Key Callouts:

1. Click to Inquiry rate decreased by 2.8% during post period
2. Cost per Inquiry remained flat (-0.6%) with increased spend
3. Keywords relating to health that don't include nurse/doctor/bio were eligible

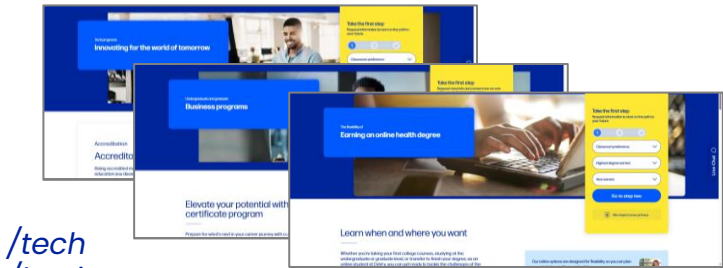

Divert from Online Options pages Unless Specified

Est. Revenue	\$43,950,898	\$46,706,681 (+\$2,755,782)

Impact & “What If?” Analysis + Next Steps

"What If?" Test had been in place the Last 12 Months...

In Test Measurement:

1. During the test CPI declined by \$25
2. The 7.0% increase in click-to-inquiry resulted in 232 Incremental inquiries
3. Incremental inquiries drove \$130,740 in seasonally adjusted revenue

Historic Analysis:

- Using L12M data we isolated eligible keyword / LP combos and estimated the impact the test would have had on historical performance
- If the test had been in place during the full 2025 period \$4.1MM in incremental revenue would have been generated

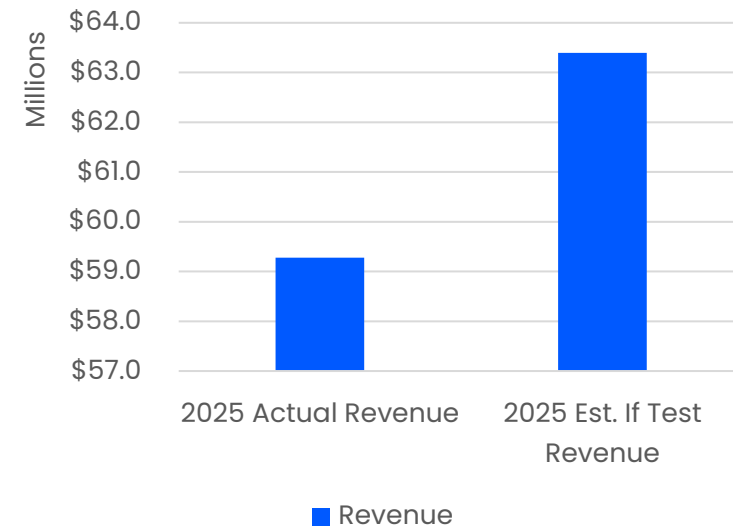

Rev Estimated using 14.4% inquiry to app rate, 33% app to enrollment rate, \$17,740 Enrollment value

In Test Measurement

Incremental Revenue	Seasonally Adj Incremental Rev	Pre CPI	Post CPI	CPI Change
\$195,427	\$130,740	\$342.36	\$317.55	-\$24.81

Impact Analysis Using L12Months

Metric	LY (2025) Eligible Actuals	LY w/ Test Improvements
Clicks	856,877	856,877
SF Inquiries	70,318	75,203 (+4,885)
Click-to-Inquiry Rate	8.2%	8.7% (+7.0%)
Est. Revenue	\$59,278,411	\$63,396,489 (+\$4,118,078)

Next Steps

Brainstormed next steps:

1. Consolidate “online-options” page versions into topic-focused content with online learning modality module(s)
 1. Biggest win
 2. Re-direct from online to broad page for even “Online” kwds with supporting personalization to address intent
2. Experiment with degree-specific pages to improve LTR
 1. Cybersecurity page did not harm CVR from cybercert despite degree pathing being higher commitment
3. Repeat mapping evaluation 30 days post re-structure to ID new re-mapping opportunities for improved KWD ⇔ LP alignment
