

[AR] – Enhancement | [Mobile PLPs]

[69.7.2] [Sticky Sort & Filter – Part 1]

RESULTS

TEST HYPOTHESIS

If we mirror high-performing app feature (sticky filter & sort), then we will improve PLP experience and add-to-cart rates.

VARIATION DETAILS

Control – Sticky On Upward Scroll Without App Layout

Variation 1 – Everything (App layout + web functionality)

Variation 2 – Everything – no subcats

Variation 3 – Mimicking the app

TEST METRICS

Primary Metric:

Product View Rate: Var1: -0.06%, Var2: +0.13%, Var3: +0.23%

Secondary Metrics:

ATC from PDP: Var1: -0.28%, Var2: +0.03%, Var3: +0.64%

Product Clicks per User: Var1: -2.24%, Var2: -1.33%, Var3: +1.04%

Checkout Rate: Var1: +0.72%, Var2: +0.5%, Var3: +0.59%

----- QM Data, Not Full Dataset -----

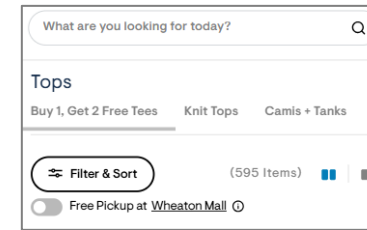

Sort Feature Engagement Rate: Var1: *+42.96%, Var2: *+52.07%, Var3: *+55.21%

% Of Users Refining Via Filter(s): Var1: *+13.53%, Var2: *+23.46%, Var3: *+23.16%

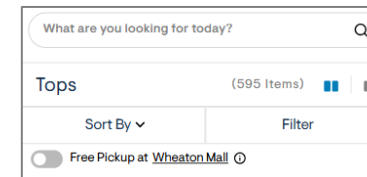

*Indicates Stat Sig

TIMELINE: 2/17/26 – 3/18/26

Variation 3 [Preview Link](#)

INSIGHTS

- Separate Sort & Filter clarifies use cases and makes sort more accessible
- App consistency / simplified layout may contribute to positive leaning performance
- Interaction did not substantially motivate purchase but created positive trends on nearby KPIs

NEXT STEPS

- Pause test
- Continue to draw inspiration from app functionality
 - Upcoming ATB notification
 - Sort & Filter part 2
- Discuss / determine results– HC rec: Var3 winner

Additional Metrics Deep Dive

Metric	Control	Variation 1	Variation 2	Variation 3
Sort Engagement Rate	1.51%	*2.16%	*2.30%	*2.35%
1 Filter Applied Rate	4.52%	*5.12%	5.47%	5.45%
2+ Filters Applied Rate	2.13%	*2.43%	*2.74%	*2.74%
PLP ATB Rate	0.19%	0.18%	0.20%	0.19%
