

[BB] – Enhancement I Mobile PDP 82.8 | Add to Cart Above The Fold

RESULTS

TEST HYPOTHESIS

Anchoring users to the desired action (Add to Cart) at a high intent funnel step should better capitalize on intent, leading to more cart additions

VARIATION DETAILS

Control – No CTA ATF

Variation 1 – Anchor CTA ATF

Variation 2 – Anchor CTA ATF + Title & Price Hidden

Variation 3 – Anchor CTA Not ATF + Title & Price Hidden

TEST METRICS

Primary Metric:

Cart Add's per Visitor: Var1: *+3.42%, Var2: *+5.44%, Var3: *+1.99%

Secondary Metrics:

Cart Addition Rate: Var1: *+3.11%, Var2: *3.46%+, Var3: +1.60%

Bag visit Rate: Var1: +0.78%, Var2: *+3.23%, Var3: -1.05%

Checkout Rate: Var1: +1.52%, Var2: *+2.36%, Var3: +0.66%

Order Rate: Var1: +0.4%, Var2: -1.81%, Var3: +0.1%

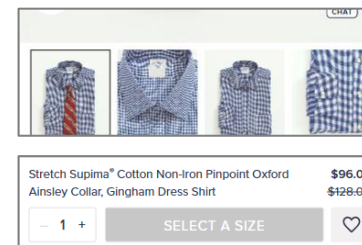

AOV: Var1: +1.07%, Var2: +2.72%, Var3: -0.38%

RPV: Var1: +0.8%, Var2: +1.55%, Var3: +1.29%

TIMELINE: 5/14/26 – 6/12/26

*>95% Stat sig

Variation 2 [Preview Link](#)

Variation 1 [Preview Link](#)

Variation 3 [Preview Link](#)

INSIGHTS

- All variations saw higher cart additions
- Moving the CTA above the fold was more impactful for increasing cart additions
- The test with both changes saw the largest increase
- Implementing both changes resulted in an especially high increase in visitors with multiple cart additions, leading to higher AOV but at the expense of Orders
- Var1 has the lowest risk with clear upside tied primary KPI and volume. While Var2 has the highest upside but potential down-funnel tradeoffs with the hidden price, making a rollout riskier

NEXT STEPS

- Pause test and align on preferred variation (HC Rec: Var1)
- Allocate traffic at 100%
- Move code to prod
