

Landing Page Optimization Opportunities: **Low-Hanging Fruit**

DECEMBER 2025

Agenda

Analysis Process Overview

Page Evaluations

Analyze historical V2I performance across pages and page groups to identify top performers that can replace under-performing pages.

Keyword Deep Dive

Analyze keyword performance across pages to confirm correct keyword-to-page mapping and flag high-spend terms that lack relevant content

UX Quick Wins Audit

Identify on-page quick wins that align with business goals and improve both V2I and lead quality by making area-of-study selection and degree pathing easier, while the broader testing strategy is still being built out

What We Delivered Based On Discovery Conversations

KW > LP Mapping

Understanding which pages perform well/poorly and have potential substitutes

New Content Opps

Explore high spend keywords that are not precisely addressed with existing content

UX Quick Wins for V2I + Lead Quality

Identify V2I improvement opportunities that should correlate with improved lead quality (degree over cert programs and program selection during inquiry)

Later in this deck, the opportunities will be explained and subsequently placed into more detailed concept proposals. Once proposals are aligned on, prioritized pipeline is create & delivered as a follow up.

DeVry Analysis Overview

Evaluation of Page Performance Uncovered Re-direct Opportunities

Paid Search

LPs	Page Type	page_view	Inquiry Rate	Traffic Distribution	Traffic distribution Of Group
/get-started/locations.html	General	17616	2.76%	1.58%	3.89%
/get-started/core-m.html	General	14586	2.96%	1.31%	3.22%
/get-started/tech/online-options.html	Tech	115056	3.85%	10.32%	46.80%
/get-started/core.html	General	265331	4.31%	23.80%	58.60%
/get-started/business/online-options.html	Business	64073	5.21%	5.75%	35.96%
/get-started/health.html	Health	25204	5.28%	2.26%	10.58%
/get-started/tech.html	Tech	53899	5.46%	4.83%	21.92%
/get-started/health/online-options.html	Health	16600	5.66%	1.49%	6.97%
/get-started/tech/engineering.html	Tech	29509	5.74%	2.65%	12.00%
/get-started/health/healthcareadmin.html	Health	10214	5.77%	0.92%	4.29%
/get-started/business/humanresources.html	Business	24754	5.99%	2.22%	13.89%
/get-started/tech/software-development.html	Tech	11467	6.03%	1.03%	4.66%
/get-started/business/projectmanagement.html	Business	14584	6.06%	1.31%	8.19%
/get-started/business.html	Business	39108	6.61%	3.51%	21.95%
/get-started/business/accounting.html	Business	28118	7.28%	2.52%	15.78%
/get-started/core/online-options.html	General	155243	8.32%	13.92%	34.29%
/get-started/tech/cybersecurity.html	Tech	35925	8.44%	3.22%	14.61%
/get-started/business/management.html	Business	7538	8.53%	0.68%	4.23%
/get-started/health/medical-billing-coding.html	Health	186141	9.92%	16.69%	78.16%

Primary Focus:

1. V2I is the most important factor in performance eval
2. Note outliers in form start rate with low completion metrics
3. Confirm relative page performance L90 vs YTD

Key Outputs:

1. Identified best performing pages that may act as substitutes for poorer performing pages (re-direct opportunities)
2. Engagement earning pages that don't sustain motivation > content audit opportunities

Main Finding (More details later):

- Specific pages, especially "admin" or "management" pages may substitute broader content

Footnotes:

1. Evaluated landing pages based on GA4 events: page_view, form_started, Form_Step_1_Complete & any_inquiry_complete YTD and L90
2. Compared periods to confirm generally similar performance over time

Primary Focus:

1. V2I remains primary focus
2. Assess live campaigns to avoid outdated guidance
3. Note I2A (Inquiry-to-Application) trends

Key Outputs:

1. Poor performing keyword <> LP combinations with potential substitutes for re-mapping
2. Keywords with click volume that don't map to existing content for content creation opportunities

Main Finding (More details later):

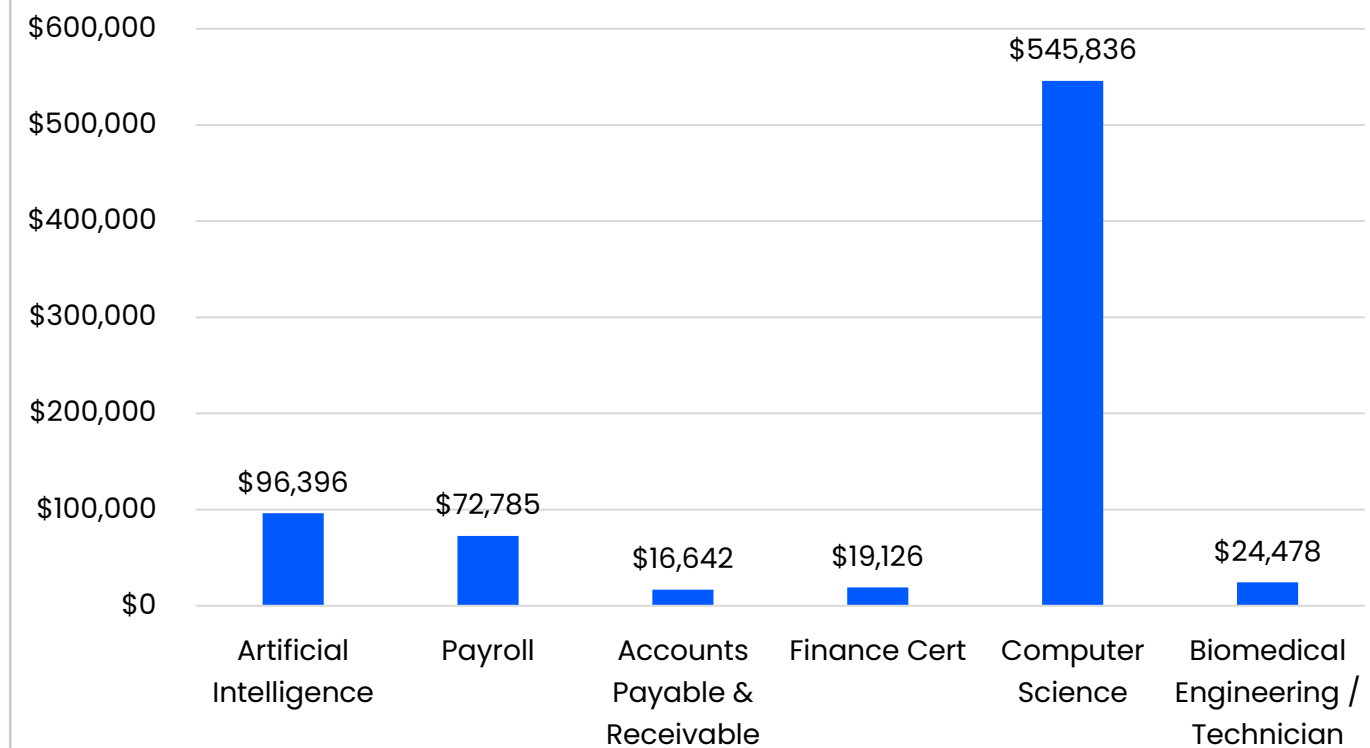

- Projects for 2 of top 3 new content opportunities are already under way

Methodology:

1. Upload LPs to AI tool and request robust related keyword list
2. Create related keyword <> page array
3. Search campaign keyword for related keyword list (include semantically related terms)
4. Match topics to validate if appropriate best fit exists

Keyword Deep Dive Fine Tunes Content Recommendations

Spend On Untreated Keywords

Footnotes:

1. ID'd topics by generating related keywords via AI and checking against search keyword
2. If search terms contained no relevant keywords from any set, "no good fit" written
3. **Filtered down to live campaigns and campaign <> ad group <> kwd <> LP spend is greater than \$25

Site Audits Get Landing Page Optimization Started Ahead Of Full Strategic Synthesis

The image displays two identical side-by-side screenshots of the DeVry University landing page. At the top left of each form is the DeVry University logo, and at the top right is a 'Live Chat' button with a speech bubble icon. Below the logo, the text 'Take the first step' is followed by the instruction 'Request more info and connect one-on-one with your dedicated Admissions Representative.' The form contains several input fields: 'Classroom preference' (a dropdown menu), 'Highest degree earned' (a dropdown menu), 'Year earned' (a dropdown menu), 'First name' (a text field), 'Last name' (a text field), 'Email' (a text field), 'ZIP code' (a text field), 'Phone number' (a text field), and 'Program of Interest' (a dropdown menu). At the bottom of each form is a blue 'Submit' button.

Primary Focus:

1. Review DeVry and competitors for onsite changes that drive business goal; Inquiry completion, while also improving pain point lead quality via area of study selection and degree choice over certs

Key Outputs:

1. Set of minor experiments that aim to improve V2I while encouraging engagements that indicate lead quality

Main Finding:

- Competitors make area of study selection easier, which may improve V2I and lead quality

Footnotes:

1. Identified site goals via stakeholder conversations
2. Audited DeVry and competitors for high confidence practices that accomplished upper & lower funnel goals

Analysis Results & Findings

Re-directing Broad Terms To Better Performing Substitutes

Keyword Topic	Current Page	>	Ideal Page	% V2I Difference
Broad Tech terms	tech/online-options (3.85% V2I)	>	tech (5.46% V2I)	+41.82%
Business Management	business/project management (6.06% V2I)	>	business/management (8.53% V2I) or Business (6.61% V2I)	+40.76%, +9.08%
Broad Business terms	business/online-options (5.21% V2I)	>	Business (6.61% V2I) or business/management (8.53% V2I)	+26.87%, +63.72%
Broad Health terms	Health (5.28% V2I)	>	health/healthcareadmin (5.77% V2I) or health/online-options (5.66% V2I)	+7.20%, +9.28%

Key Callouts:

1. V2I deltas across similar pages ID opportunities to redirect
2. The largest opportunities are tech & business due to the high deltas and volume
3. Re-direct recs would exclude keywords that state specific interest in the current page

Footnotes:

1. Recommendations based on V2I performance across 2 pages that could logically substitute each other
2. Evaluated landing pages based on GA4 events: page_view, form_started, Form_Step_1_Complete & any_inquiry_complete YTD and L90
3. Compared periods to confirm generally similar performance over time

KWD Level Re-direct Opportunities Maximize Campaign Efficiency

Key Callouts:

1. Based on V2I deltas across pages where KWD was flagged as not matching (min 100 inquiries on topic <> LP combination unless CVR delta over 100%)
2. The largest opportunities are software engineer, human resources, and cybersecurity keywords

Footnotes:

1. Recommendations based on V2I performance across 2 pages where current page was flagged as not matching keyword topic
2. YTD live campaigns / keywords with more than \$25 spend

Keyword Topic	Current Page + KWD	>	Ideal Page + KWD	'25 YTD Search Spend	% V2I Difference	Potential Inquiry Delta
"Software engineer"	tech/engineering (7.09% V2I)	>	tech/software-development (9.60% V2I)	\$285k	+35%	254
Cybersecurity, without "certification"	tech/cybercert (8.46% V2I)	>	tech/cybersecurity (11.55% V2I)	\$108K	+37%	135
"human resources" or similar terms	Business (5.94% V2I)	>	Business/humanresources (6.65% V2I)	\$139K	+12%	47
*"biomedical engineering / technician"	tech (3.03% V2I)	>	tech/engineering (9.88%) *New page is true ideal	\$10K	+226%	47

Key Callouts:

1. Business/management, tech/cybersecurity and tech/analytics are the highest performing pages in terms of inquiry to application

Footnotes:

1. Medical Billing & Coding (11.73%) not noted above due to uniqueness
2. Pages leading to fewer than 75 search apps not included

8 of top 10 Inquiry > Application (I2A) CVR landing pages are *also* specialized

Keyword final URL	Inquiries	Apps	Inquiry to App
https://www.devry.edu/get-started/business/management.html	1882	253	13.42%

Computer Science, Payroll & AI Audiences May Benefit from net new content/LP's

Keyword Topic	'25 YTD Search Spend	Current Keyword V2I	Potential V2I	Potential Inquiry Delta
Tech – Computer Science*	\$546K	8.18%	TBD	TBD
Tech – Biomedical Engineering	\$24K	3.03% on /tech	9.88% on /engineering	47+
Accounting – Accounts Payable & Receivable	\$17K	5.83%	11.14%	42
Human Resources – Payroll	\$73K	6.07%	7.31%	42
Tech – Artificial Intelligence*	\$96K	5.85%	6.59%	30
Finance – finance certifications	\$19K	5.28%	7.54%	20
Accreditation	\$840K, \$292K on core	6.44% on core	7.89% everyone on core	209 on core

Key Content Opportunities:

1. Computer Science*
2. Artificial Intelligence*
3. Payroll
4. Biomedical Engineering
5. Finance
6. Accounts payable & receivable
7. Expanded accreditation content on LPs – not new page

Footnotes:

1. Potential V2I based on V2I of page alternative or V2I of appropriately targeted traffic on similar topic with 10% boost for specificity
2. *Being built

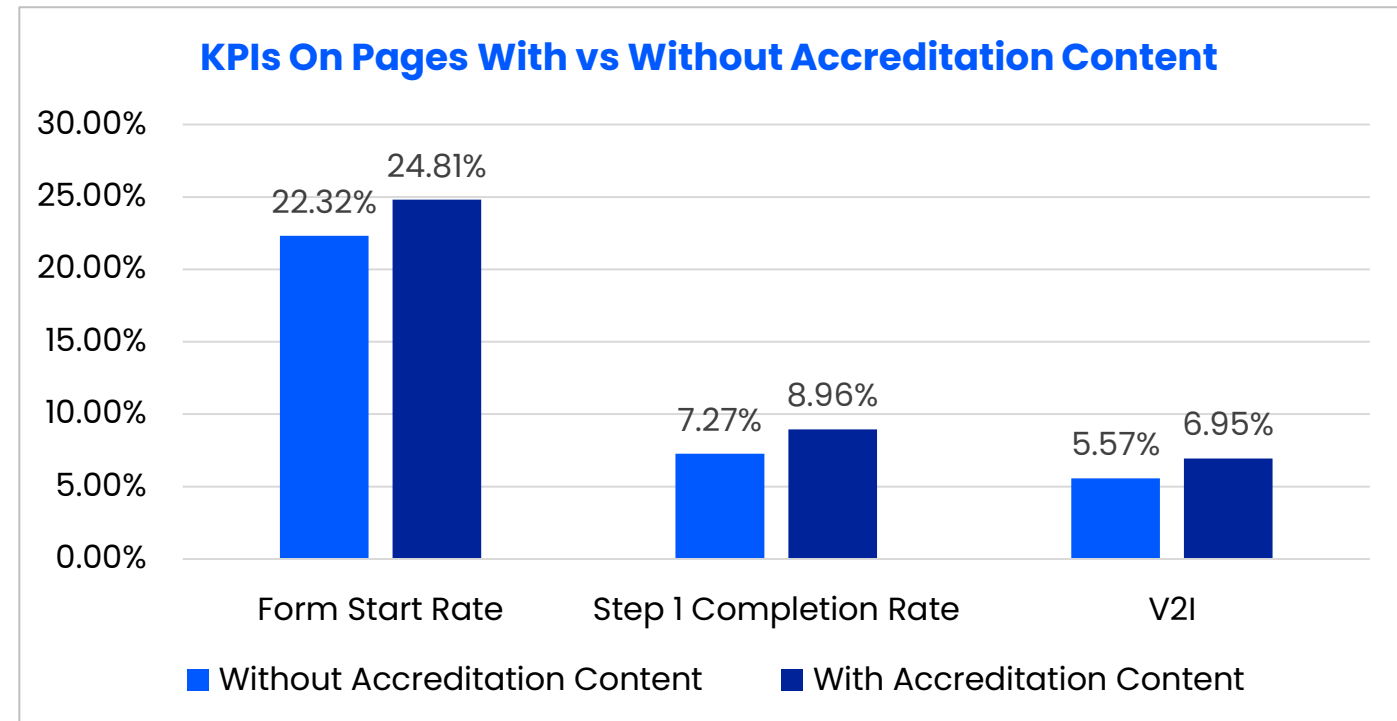

Key Callouts:

1. \$840K spent on keywords containing "accredit" **
2. Users searching for "accredit" on core had 6.44% V2I vs 7.89% for all sessions
3. 50% of "/get-started/" pages included accreditation content

Footnotes:

1. *Chart: 8/20/2025-11/17/2025 all channels. Averages not weighted to avoid skewing toward volume with potential outliers
2. **YTD live campaigns / keywords with more than \$25 spend
3. *** 3 of 19 Pages excluded in accredited content analysis to enhance validity

Accreditation Content Converts, But Only Lives Prominently On 50% Of "Get Started" Pages

Above Average Form Start Rates But Below Average V2I Indicate Content Depth Opportunities

Key Callouts:

- 5 pages: tech, tech/engineering, health, business/humanresources & health/online-options all perform well on initial engagement but were below average on V2I
- These 5 pages are good candidates for content deep dives

Footnotes:

- Evaluated landing pages based on GA4 events: page_view, form_started, Form_Step_1_Complete & any_inquiry_complete YTD and L90
- Page features are based on subjective categorization

Content Audit Identifies & Fills Gaps

Evaluating DeVry's landing pages identifies optimization opportunities to eliminate barriers to inquiry

- **Inventory & Categorization**
Map pages by program level and funnel stage
- **Conversion Funnel Analysis**
Identify drop-off points, engagement patterns, and messaging effectiveness
- **Message Resonance**
Assess alignment between content and prospect decision criteria
- **Optimization Priorities**
Rank opportunities by conversion impact potential

Delivering prioritized recommendations mapped to conversion lift

~15%
CVR Lift

- 1 **Hero** → **Message effectiveness**
- 2 **Form** → **Conversion friction points**
- 3 **Beneath the Fold** → **Content gaps & barriers**

How Horizon Proposes Test Concepts

ROI-Driven Testing: How We Prioritize Test Ideas

Impact

Will the test reach high-traffic pages or priority audiences?

Is the change significantly different enough to drive measurable behavior?

Will it influence high-value behaviors based on weighted KPI scoring?

Ease of Execution

How many hours are required to build and launch?

What level of effort is needed from dev, client, or internal teams?

Does the test rely on net-new assets, custom code, or additional resources?

Confidence

How strong is the supporting evidence or stakeholder consensus that this test will perform?

Does historical data, competitive insight, or analysis support the hypothesis?

KPI lift, minimum hours, and win rate all contribute to ROI

Choosing the Right A/B Test KPI By Funnel Stage

Only "Get Started" funnel included		Awareness	Consideration
KPI	Program Pages (Get Started)	Thank You (Get Started)	
Form Interactions	X		
Classroom Preference Selected	X		
Form Step 1 Complete	X		
Area of study selected	X		
Inquiry Rate (V2I)	X		
Click to Call Rate	X		X
Click to Text Rate	X		X
Click to Chat Rate	X		X
Application Rate (I2A)	X		X
Enrollment Rate	X		X
Degree to Cert Ratio	X		X

Primary KPI

Secondary KPI

Guardrail KPI

Primary KPI: Main experiment goal and most important metric likely to be moved by change

Secondary KPI: Important metric potentially impacted by experiment and should be monitored closely

Guardrail KPI: Important metrics unlikely to be impacted by experiment and should be monitored for negative surges

Categorizing by Initiative Type

Category	Initiative Name	Description	Slides
Mapping	Full Page Redirects	Page level redirects from lower to higher V2I pages that could substitute each other	22–25
	Re-direct High Impact Keywords	Keyword-specific redirects where LP $\neq$ intent	26–28
Content	Build Impactful New Content	New pages for CS, AI, Payroll, Finance, AP/AR & potentially Healthcare + Management	30–31
	Trust Signals	Expand accreditation modules on key LPs	32
		Accreditation + social proof above the fold on LPs	33
On-page UX	Searchable Selections & Pre-filled Form Values	Better area-of-study selection in the lead form	35
		Prefilled program fields where value is known	36
Audit / Analytics	Full Strategic Audit	Content, Pathing Analysis, Personalization, UX.	16

Mapping: Re-direct Test Concepts

Software Engineering is Software Development

The tech/software-development page converted better than the tech/engineering page for users searching “Software engineering”

Concept

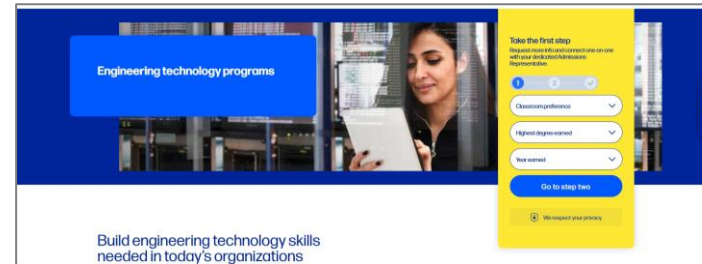

Primary focus:

- Re-direct from a poorer performing page to a better performing page
- Only re-direct out keywords containing “software eng”

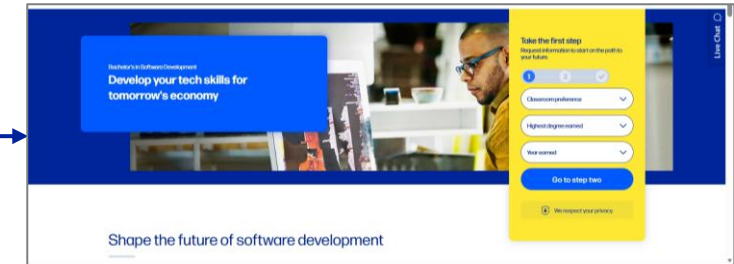

Justification:

- The tech/software-development had a 9.60% V2I for the targeted segment, compared to 7.09% on the tech/engineering page

Control

Experiment

Biomedical Engineering To Engineering Page

Because users searching “Biomedical Engineering” perform very well on the /engineering page but very poorly on /tech, we will attempt to direct all relevant searches to /engineering

Concept

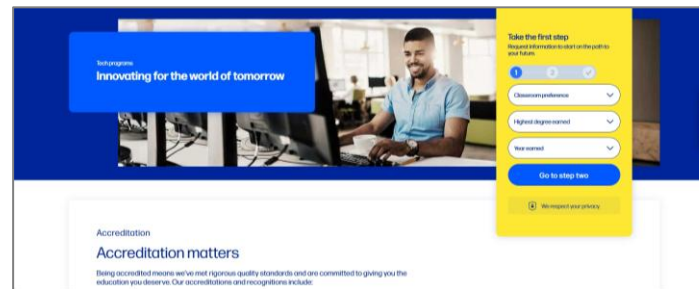

Primary focus:

- Re-direct from poorer performing relevant content to a better performing alternative
- Specifically target users searching “biomedical engineering”

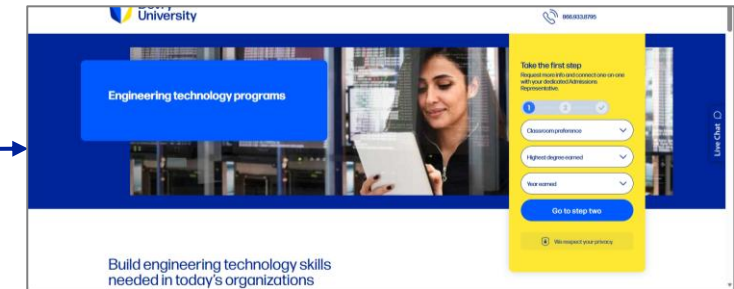

Justification:

- /engineering outperforms /tech for users searching “biomedical engineering” (3.03% vs 9.88% V2I)

Control

Experiment

Cybersecurity Degrees Over Certifications

The tech/cybercert page converted slightly below the tech/cybersecurity page. The related program is also of lesser value than its degree counterpart

Concept

Primary focus:

- Re-direct from a poorer performing page to a better performing page that sells a higher value product
- Do not re-direct out keywords containing "certification"

Justification:

- Degrees have higher LTV than certifications
- DeVry spent \$124K YTD on traffic directed to tech/cybercert without "cert" in the keyword. That traffic converts worse than overall traffic on both tech/cybercert and tech/cybersecurity
- Tech/cybersecurity conversions had 13.40% application from inquiry rate vs 9.06% on tech/cybercert

- *Only 47 tech/cybercert apps

Control

The Control page layout features a blue header with the DeVry University logo and a 'Live Chat' button. Below the header is a yellow section titled 'Undergraduate certificate in Cyber security'. This section includes a 'Take the first step' prompt, a form with three dropdown menus (Classroom preference, Highest degree earned, Year earned), and a 'Go to step two' button. A 'Request more info' link is also present. The page is framed by a blue border with a 'Live Chat' button on the right side.

Experiment

The Experiment page layout features a blue header with the DeVry University logo and a 'Live Chat' button. Below the header is a yellow section titled 'Cyber security programs'. This section includes a 'Take the first step' prompt, a form with three dropdown menus (Classroom preference, Highest degree earned, Year earned), and a 'Go to step two' button. A 'Request more info' link is also present. The page is framed by a blue border with a 'Live Chat' button on the right side.

HR Means Human Resources

The business/humanresources page converted better than the business page for users searching “Human resources” or HR

Concept

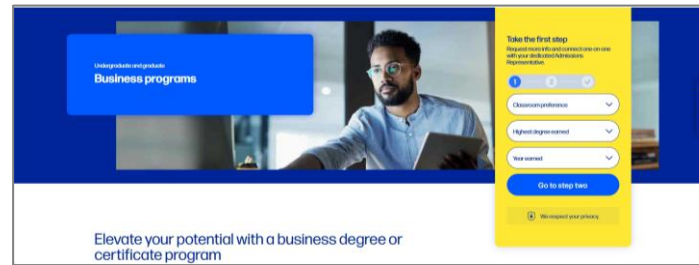

Primary focus:

- Re-direct from a poorer performing page to a better performing page
- Only re-direct out keywords containing “human resources”

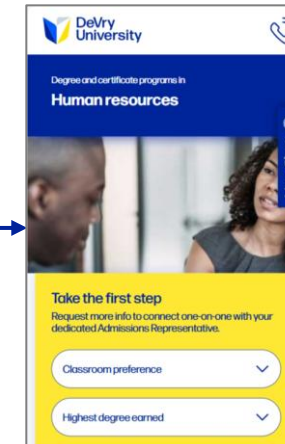

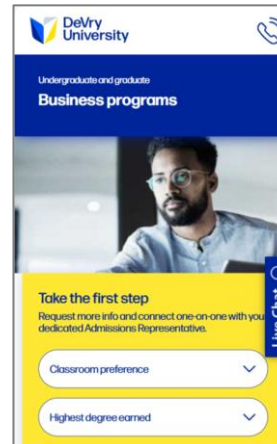

Justification:

- The business page had a 5.94% V2I for the targeted segment, compared to 6.65% on the business/humanresources page

Control

Experiment

Business & Project MGMT vs Business MGMT

Business topics have similar terminology such as business management or project management. With specific pages, especially the business management page, performing well, DeVry should investigate if a broad business page is really the appropriate destination.

Concept

Primary focus:

- Re-direct from broad business pages and project management page to the business management page

Justification:

- Business management is the highest performing business page and a logical substitute for general business or even project management

Control

The Control group consists of three separate landing pages, each with a blue header and a yellow sidebar. The first page, 'Business programs', features a man with glasses looking at a laptop and the text 'Elevate your potential with a business degree or certificate program'. The second page, 'Online business degree and certificate programs', features a woman in a yellow sweater looking at a phone and the text 'Build your business skills with flexible online learning'. The third page, 'Project management degree specialization', features a man in a white shirt looking at a laptop and the text 'Prepare to lead with a project management degree specialization'. All three pages have a 'Take the first step' sidebar with a progress indicator (1, 2, 3) and dropdown menus for 'Choose your preference', 'Highest degree earned', and 'Year earned', followed by a 'Go to step two' button and a 'We respect your privacy' link.

Experiment

The Experiment group features a single landing page for 'Business management'. It has a blue header and a yellow sidebar. The main image shows three people in a meeting, and the text reads 'Learn the landscape of business markets' and 'Inspire change in any organization'. The sidebar is identical to the Control group, with a 'Take the first step' section, a progress indicator, dropdown menus for 'Choose your preference', 'Highest degree earned', and 'Year earned', a 'Go to step two' button, and a 'We respect your privacy' link.

Does Broad Health = Health Admin?

The health administration page outperformed broad health pages. While these topics may be interchangeable, there is also less specificity in the health degree content.

Calling out lack of concern with relevant search terms as they did not contain “doctor”, variations of “nurse” nor “bio”, so true medical degrees do not appear to be the audience.

Concept

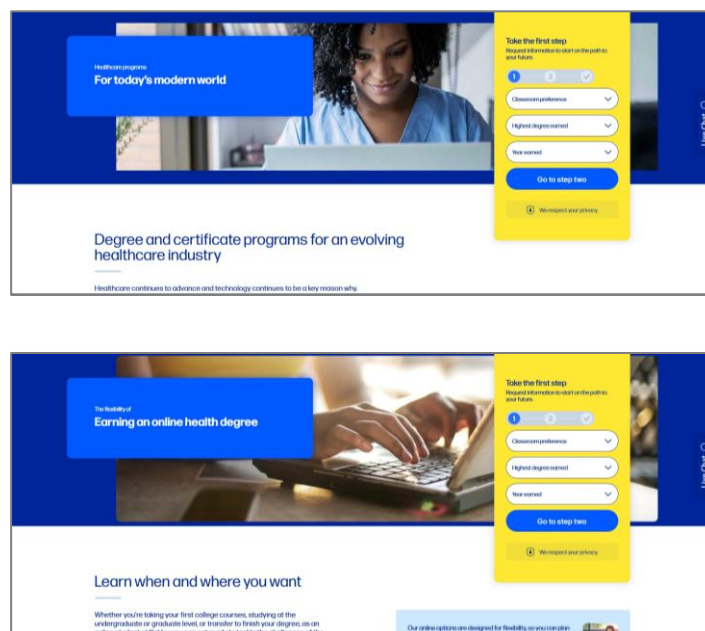

Primary focus:

- Re-direct from poorer performing relevant content to a better performing alternative

Justification:

- Health admin page had a 5.77% V2I compared to 5.66% for health/online-options and 5.28% for /health

Control

Experiment

Online vs Base Page Re-Directs

Redirect High Impact
Keywords

Full-Page Redirects

With 3 parent topics; Tech, Health & Business, re-directing from the lower performing versions to the higher performing versions should increase V2I

Concept

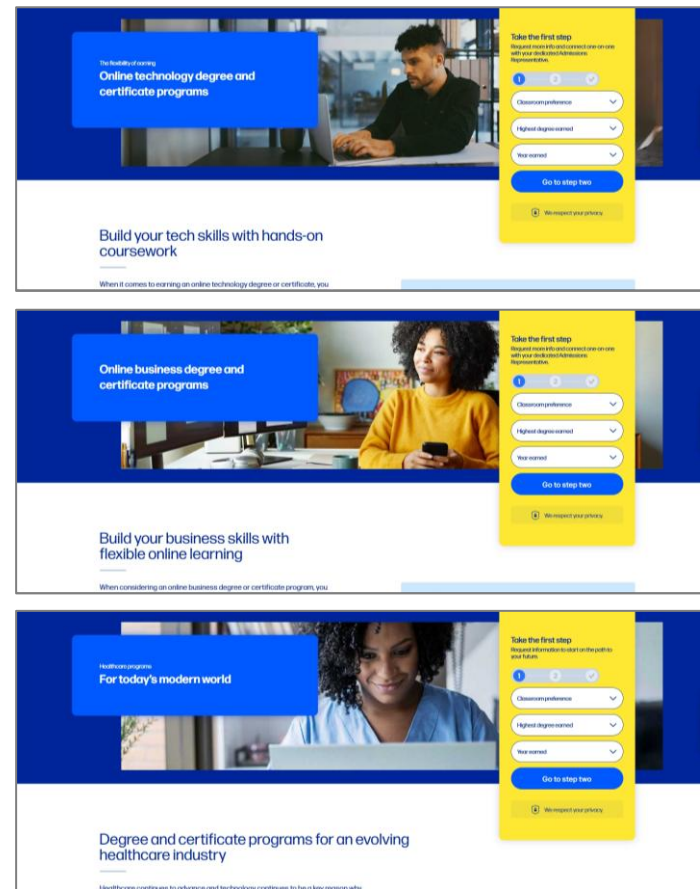

Primary focus:

- Re-direct from poorer performing relevant content to a better performing alternative
- Do not re-direct users away from requested features (Don't re-direct away from online options if keyword contains online)

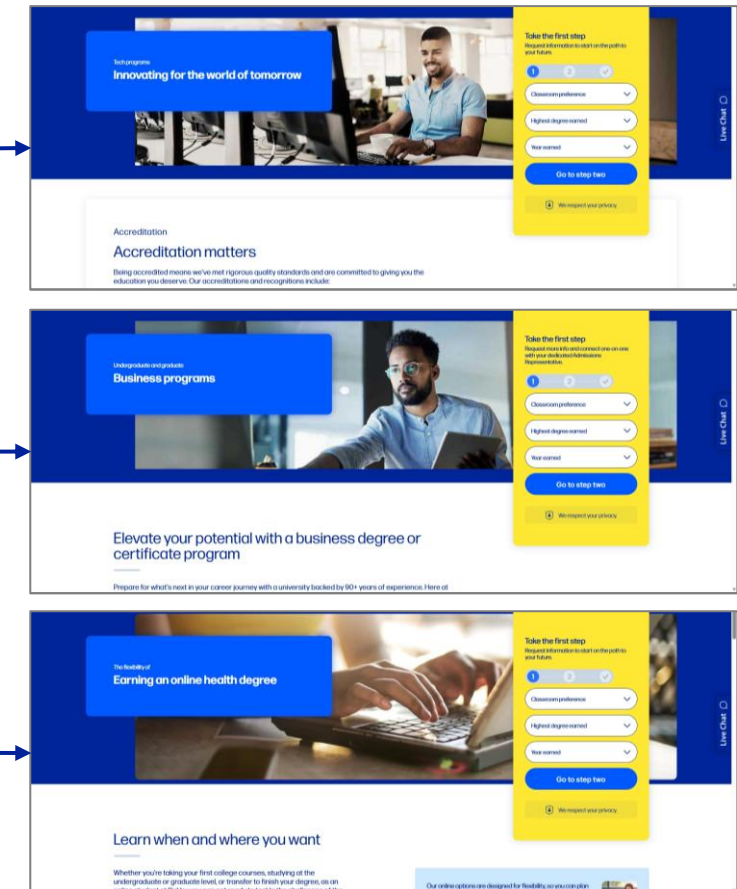

Justification:

- Tech outperforms tech/online-options (5.46% vs 3.85% V2I)
- Business outperforms business/online-options (5.21% vs 6.61% V2I) – re-evaluated based on prior tests
- Health/online-options outperforms health (5.28% vs 5.66% V2I) – re-evaluated based on prior tests

Control

Experiment

Content Opportunities

Existing vs Net New Page Opportunities

Specifically tailored content can be served to searching users. Specific searches indicate high intent, and appealing to their exact needs should boost conversion

Concept

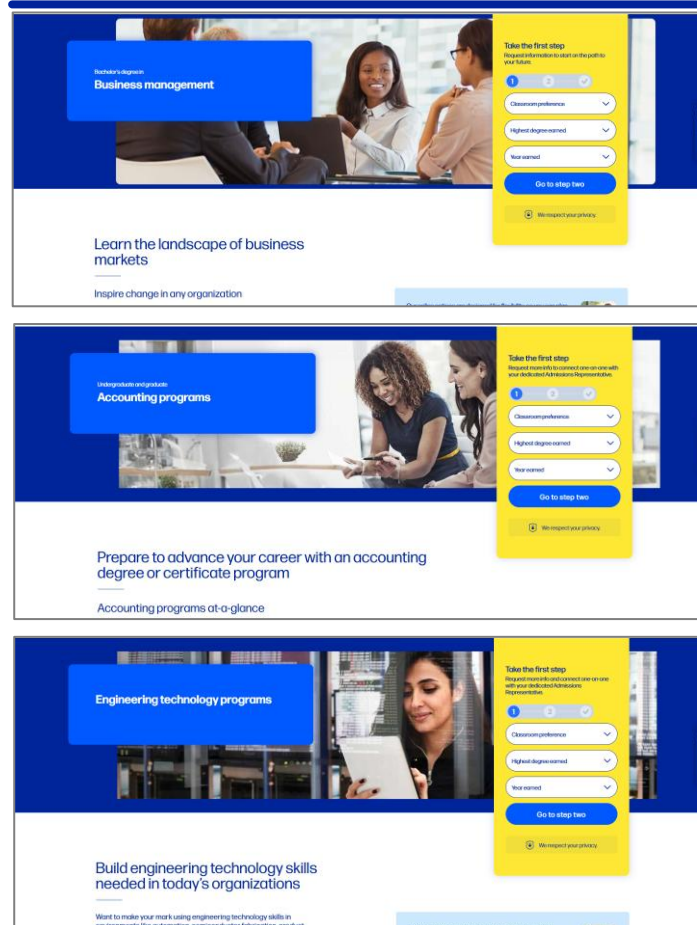

Primary focus:

- Create net new landing pages to match user intent & interest, including course specialization & certifications where there is enough volume to make an impact
- Consider dedicated landing pages that feature subjects & specific courses more prominently, guiding users to the appropriate, corresponding programs

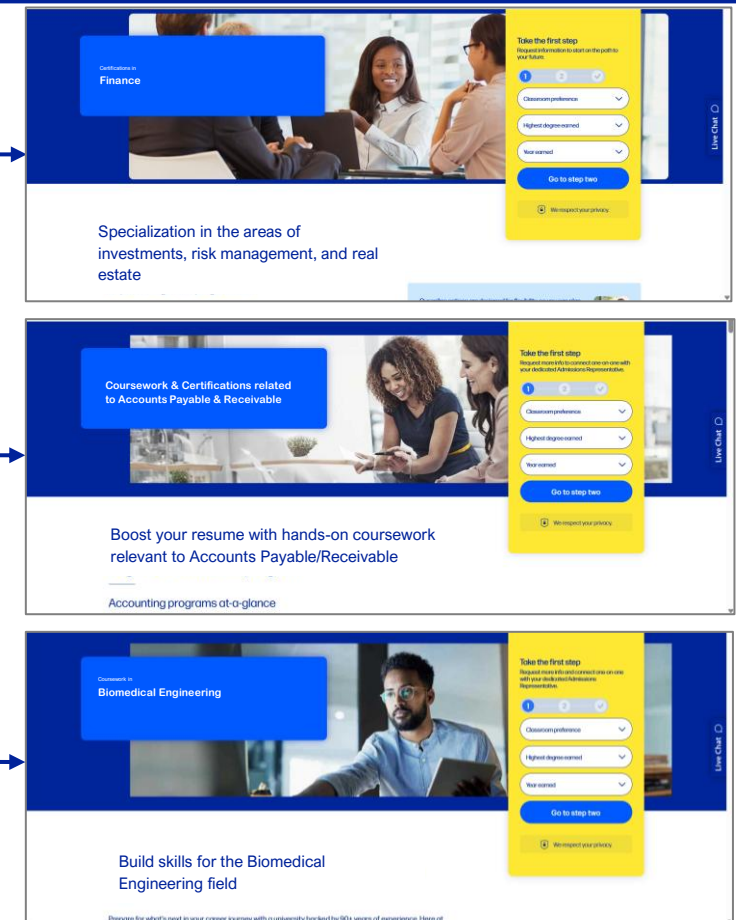

Potential Incremental Inquiries:

- Payroll: 42
- Accounts payable & receivable: 42
- Finance certifications: 20
- **Biomedical Engineering: 47+**

Control

Experiment

Increased Specificity On Health Admin

Health administration may also be seen as health management. With management being such a common term, including it on the page should reduce CAC.

Concept

Primary focus:

- Use a commonly searched term “Health Management” on the health admin page

Justification:

- 24% of spend to the Healthcare admin page -- \$263K -- targets keywords containing “Manag” (“manage” variations)
- Those searching “manage” variations converted at 6.67% compared to 6.44% for all users, demonstrating high intent
- Keyword presence on page can increase quality score to reduce CPC

Control

The Control version of the page features a blue header with the text "Bachelor's degree in Healthcare Administration". Below the header is a photo of a woman in medical scrubs talking on a phone. To the right of the photo is a yellow sidebar with the heading "Take the first step" and three dropdown menus: "Classroom preference", "Highest degree earned", and "Year earned". Below these is a blue button "Go to step two" and a link "Request more info". The DeVry University logo is in the top right. A "Live Chat" button is on the right side of the page.

Experiment

The Experiment version of the page features a blue header with the text "Bachelor's degree in Healthcare Administration & Management". Below the header is a photo of a woman in medical scrubs talking on a phone. To the right of the photo is a yellow sidebar with the heading "Take the first step" and three dropdown menus: "Classroom preference", "Highest degree earned", and "Year earned". Below these is a blue button "Go to step two" and a link "Request more info". The DeVry University logo is in the top right. A "Live Chat" button is on the right side of the page.

Accreditation Badges Where Applicable

Accreditation is important to users, and 3rd party approval can build the trust needed to take users from awareness to consideration

Concept

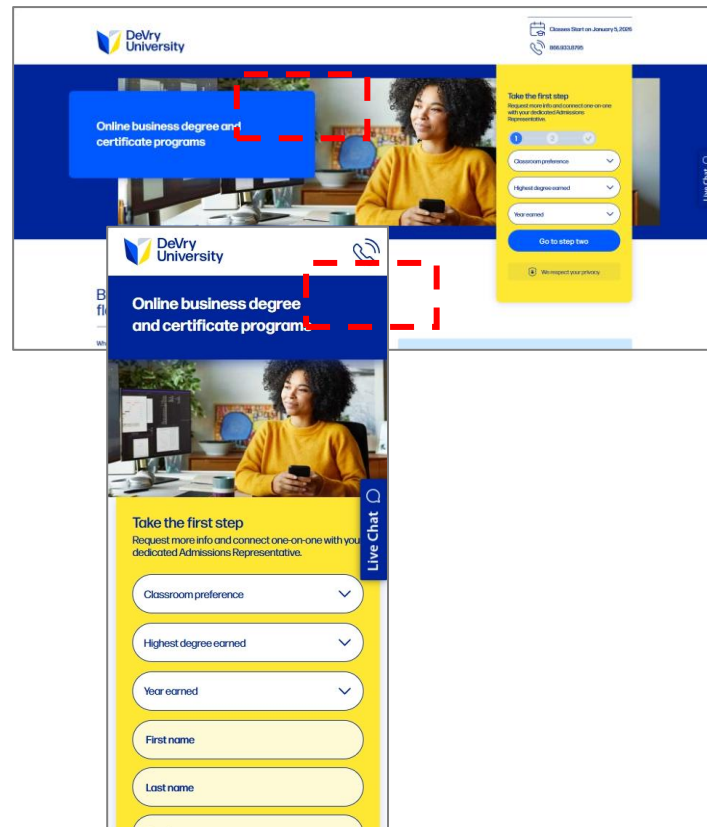

Primary focus:

- Add relevant accreditations to the H1 content block to assure users of DeVry's education quality
- Address a commonly searched keyword

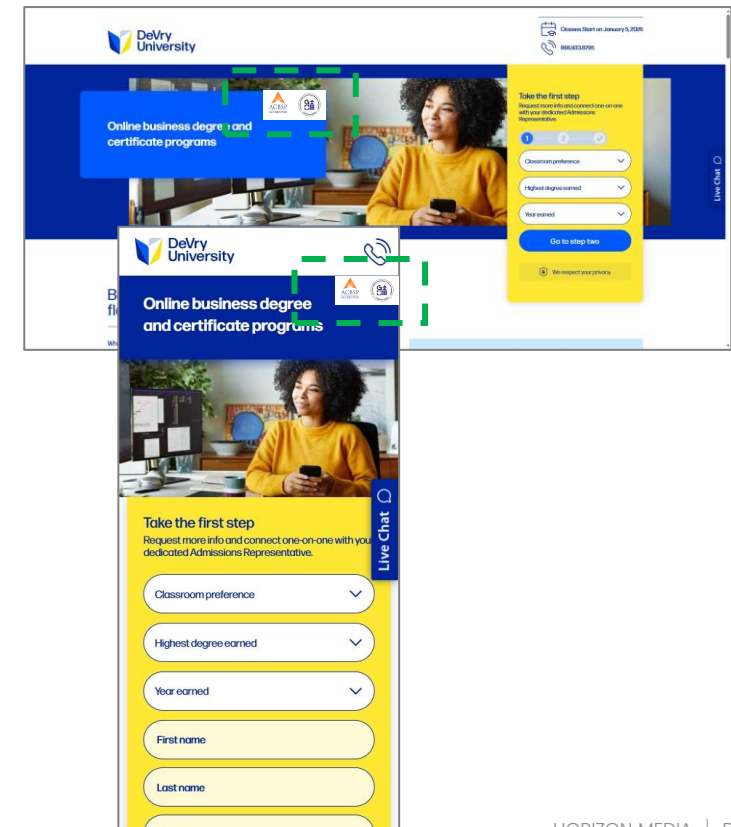

Justification:

- DeVry has spent \$840K on keywords containing "accredit" YTD
- This is present on WGU: [Link](#)
- Present on Grand Canyon University: [Link](#)

Control

Experiment

Trust Signals Above The Fold

Trust signals act as proof points to validate the quality of education that a user is getting with their DeVry. By ensuring quality early, DeVry can encourage engagement, and eventually, inquiry

Concept

Primary focus:

- Add trust signals from Home above the fold
- Time in higher education and degrees awarded indicate expertise and alumni network also demonstrates value

Justification:

- Walden University places accreditation immediately below inquiry form: [Link](#)
- Strayer uses social counts as a trust signal immediately below the fold: [Link](#)
- Social counts are a commonly winning pattern: [Link](#)

Control

The Control version of the DeVry University homepage features a yellow inquiry form with the following fields: First name, Last name, Email, ZIP code, Phone number, and Program of Interest. A blue 'Submit' button is at the bottom. Below the form, a red dashed box highlights the text 'Build your business skills with flexible online learning' and a small privacy notice. The social counts (50+ years in higher education, 222,000+ alumni, 300,000+ degrees awarded) are located below the fold.

Experiment

The Experiment version of the DeVry University homepage moves the social counts (50+ years in higher education, 222,000+ alumni, 300,000+ degrees awarded) above the fold, directly below the inquiry form. The inquiry form itself remains the same, but the red dashed box around the text 'Build your business skills with flexible online learning' is now above the fold. The social counts are highlighted with a green dashed box.

On-page UX - Test Opportunities

Searchable Selections For Easy & Accurate Course Selection

Enabling program search allows users to more readily find programs related to their topic of interest. The more findable topics improve progression but also ensure the users get to select the topic that is most relevant to them

Concept

Primary focus:

- Improve area of study functionality selection for easier progression & greater selection accuracy
- Search algorithm should start with simple matching but also included category grouping

Justification:

- We know that selecting a program of interest – instead of selecting “undecided” has positive down-funnel implications
- This is present on Capella University: [Link](#)
- This is present on Grand Canyon University: [Link](#)

Control

Experiment

Pre-filled Values Make Form Fill Easy

Pre-filling “Program of Interest” based on the URL will make inquiry easy as users no longer have to search through a long list to find the program right for them

Concept

Primary focus:

- Make form completion easy by pre-filling program of interest
- Do so only on URLs where value is known

Justification:

- We know that selecting a program of interest – instead of selecting “undecided” has positive down-funnel implications
- This is present on SNHU: [Link](#)

Control

Control version of the form. The 'Program of Interest' dropdown is highlighted with a red dashed border. The form includes fields for First name, Last name, Email, ZIP code, Phone number, and Program of Interest. A 'Live Chat' button is visible on the right.

Mobile view of the control version of the form. The 'Program of Interest' dropdown is highlighted with a red dashed border. The form includes fields for Classroom preference, Highest degree earned, Year earned, First name, Last name, Email, ZIP code, Phone number, and Program of Interest. A 'Live Chat' button is visible on the right.

Experiment

Experiment version of the form. The 'Program of Interest' dropdown is pre-filled with 'Cyber Security' and highlighted with a green dashed border. The form includes fields for First name, Last name, Email, ZIP code, Phone number, and Program of Interest. A 'Live Chat' button is visible on the right.

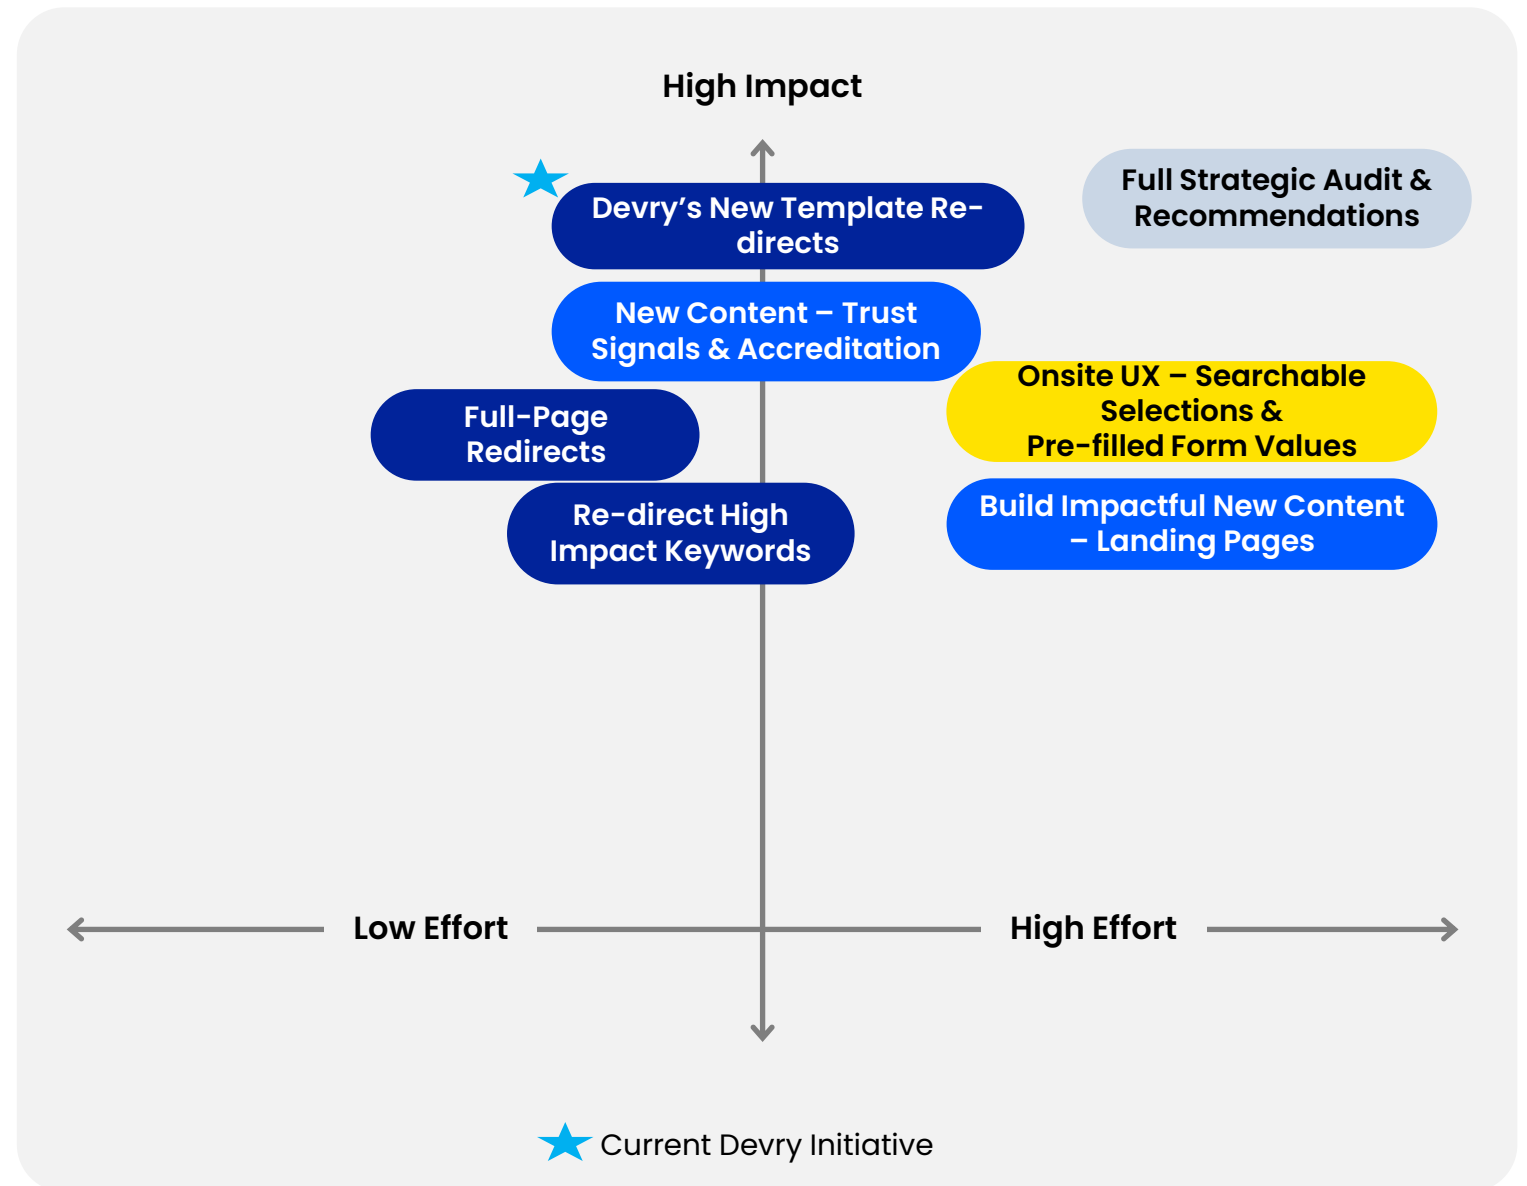

Mobile view of the experiment version of the form. The 'Program of Interest' dropdown is pre-filled with 'Cyber Security' and highlighted with a green dashed border. The form includes fields for Classroom preference, Highest degree earned, Year earned, First name, Last name, Email, ZIP code, Phone number, and Program of Interest. A 'Live Chat' button is visible on the right.

Summary & Next Steps

IMPACT VS EFFORT

Prioritized Evolution

We've plotted initiatives on this matrix based on business impact vs. LOE – tackling quick wins for incremental CVR opportunity while building a framework for strong future performance.

Immediate Next Steps: Testing

- 1. DeVry team reviews experiments and confirms those of interest**
- 2. Align on sizing & prioritization**
 1. Horizon delivers prioritized & ordered pipeline
 2. Meet, review, approval
- 3. Run Experiments**
 - Horizon reviews VWO for test configuration
 - Horizon creates platform activities for experiments
 - *Optional: Horizon delivery support*
 - Horizon monitors live experiments
 - Horizon reports findings
- 4. Communicate results to DeVry and Horizon Search and adjust campaigns accordingly (if necessary)**
 - Results are communicated and campaign mapping is adjusted accordingly
 - Validate with PoP reporting
- 5. Build identified content opportunities**
 - Design, develop, and launch any net new content
- 6. Run additional re-direct experiments to new content**
- 7. Strategic Audit For Further On-site Testing**

Proposing a Full Strategic Audit: Behavioral Signals Behind Inquiry to Maximize Impact

Evaluate industry trends, competitor activities, site analytics, and survey data if available to better understand DeVry's users and how to meet their needs along the path to inquiry

Who

Map high-propensity student segments using education-industry trends and degree/area-of-study demand.

What

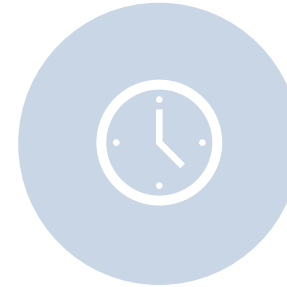

Review competitor offerings to learn which programs, credentials, and messages drive the strongest engagement.

Where

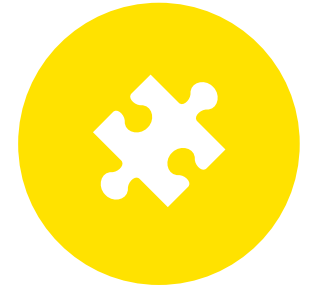

Use site analytics to pinpoint markets, pages, and pathways where prospects most often convert or fall off.

When

Deep-dive journey timing with segmented KPI data to find moments when content or offers should appear.

Why

Synthesize surveys and behavioral signals to uncover pain points and reasons people do or don't inquire.

THANK **YOU!**

Executive Summary:

GOAL	RATIONALE		TARGETED AUDIENCE
Increase Revenue	Pages with substantial accreditation content had 25% higher V2I, so adding trust signals ATF will be a high impact, low lift way to address trust concerns without personalizing content to each program		Visitors on DeVry’s Get Started Pages
HYPOTHESIS			
If we place trust signals above the fold, we will improve V2I.			
OBJECTIVE		TEST KPIS	
Increase V2I by placing trust signals above the fold		Primary: V2I Guardrail: Bounce Rate, Form Start Rate, Form First Step Completion Rate	
DECISION PLAN			
Plan for detecting a <i>Statistically Significant</i> (forecasted) win or loss: • 4 days to detect a 10% lift • 14 days to detect a 5% lift • 30 days to detect a 3.4% lift • With 95% confidence & 80% Power			
<i>Win Definition:</i> Statistically significant lift, Primary KPI –and- NO statistically significant loss, no surge in Guardrail KPIS			
Control Wins: Keep Control experience	Experiment Wins: Implement Test variant in prod	Inconclusive: Re-test, or proceed to next test concept	

Executive Summary:

GOAL	RATIONALE	TARGETED AUDIENCE
Increase Revenue	Pages with substantial accreditation content had 25% higher V2I, so adding accreditation content where it is not substantially addressed should improve V2I	Visitors on DeVry’s Get Started Pages
HYPOTHESIS		
Because pages with substantial accreditation content had 25% higher V2I on average, adding accreditation content where it is not substantially addressed should improve V2I.		
OBJECTIVE	TEST KPIS	
Increase V2I by increasing DeVry’s emphasis on accreditation	Primary: V2I Guardrail: Bounce Rate, Form Start Rate, Form First Step Completion Rate	
DECISION PLAN		
Plan for detecting a <i>Statistically Significant</i> (forecasted) win or loss: • 4 days to detect a 10% lift • 14 days to detect a 5% lift • 30 days to detect a 3.4% lift • With 95% confidence & 80% Power		
<i>Win Definition:</i> Statistically significant lift, Primary KPI –and- NO statistically significant loss, no surge in Guardrail KPIS		
Control Wins: Keep Control experience	Experiment Wins: Implement Test variant in prod	Inconclusive: Re-test, or proceed to next test concept

Executive Summary:

GOAL	RATIONALE	TARGETED AUDIENCE
Increase Revenue	Pre-filling relevant area of study based on URL is a low lift practice bet practice that competitors are using which should also increase rate of appropriate area of study selection	Visitors on DeVry’s Get Started Pages where URL indicates specific area of interest
HYPOTHESIS		
Pre-filling relevant area of study based on URL is a low lift practice that competitors are using which should not only make V2I conversion easier based on basic UX best practices, but also increase rate of appropriate area of study selection, improving I2A as well		
OBJECTIVE	TEST KPIS	
Increase V2I by pre-filling relevant area of study based on URL	Primary: V2I Guardrail: Area of Study Selection Undecided Rate, I2A	
DECISION PLAN		
Plan for detecting a <i>Statistically Significant</i> (forecasted) win or loss: • 7 days to detect a 10% lift • 24 days to detect a 5% lift • 30 days to detect a 4.5% lift • With 95% confidence & 80% Power		
<i>Win Definition:</i> Statistically significant lift, Primary KPI –and- NO statistically significant loss, no surge in Guardrail KPIS		
Control Wins: Keep Control experience	Experiment Wins: Implement Test variant in prod	Inconclusive: Re-test, or proceed to next test concept

Executive Summary:

GOAL	RATIONALE	TARGETED AUDIENCE
Increase Revenue	Competitors are using searchable dropdowns. This is a UX best practice and it encourages appropriate area of study selection	Visitors on DeVry’s Get Started Pages
HYPOTHESIS		
Searchable area of study dropdowns are a high impact practice that competitors are using which should not only make V2I conversion easier based on basic UX best practices, but also increase rate of appropriate area of study selection, improving I2A as well.		
OBJECTIVE	TEST KPIS	
Increase V2I by placing trust signals above the fold	Primary: V2I Guardrail: Area of Study Selection Undecided Rate, I2A	
DECISION PLAN		
Plan for detecting a <i>Statistically Significant</i> (forecasted) win or loss: • 4 days to detect a 10% lift • 14 days to detect a 5% lift • 30 days to detect a 3.4% lift • With 95% confidence & 80% Power		
<i>Win Definition:</i> Statistically significant lift, Primary KPI –and- NO statistically significant loss, no surge in Guardrail KPIS		
Control Wins: Keep Control experience	Experiment Wins: Implement Test variant in prod	Inconclusive: Re-test, or proceed to next test concept

Executive Summary:

GOAL	RATIONALE	TARGETED AUDIENCE
Increase Revenue	24% of Healthcare admin URL spend (\$263K) targets kwds with “Manag”. Users had 6.67% V2I vs 6.44% for all, demonstrating intent	Visitors on DeVry’s ealthcare Admin Get Started Page
HYPOTHESIS		
24% of spend to the Healthcare admin page -- \$263K -- targets keywords containing “Manag” (“manage” variations). Those searching “manage” variations converted at 6.67% compared to 6.44% for all users, demonstrating high intent. Adding "& Management" to the H1 should ensure these users' needs are addressed		
OBJECTIVE	TEST KPIs	
Increase Form Start Rate by placing a relevant keyword in the H1	Primary: Form Start Rate Guardrail: Bounce Rate, Form First Step Completion Rate, V2I	
DECISION PLAN		
Plan for detecting a <i>Statistically Significant</i> (forecasted) win or loss: • 4 days to detect a 10% lift • 13 days to detect a 5% lift • 30 days to detect a 3.3% lift • With 75% confidence & 20% Power		
<i>Win Definition:</i> Statistically significant lift, Primary KPI –and- NO statistically significant loss, no surge in Guardrail KPIs		
Control Wins: Keep Control experience	Experiment Wins: Implement Test variant in prod	Inconclusive: Re-test, or proceed to next test concept

Full Strategic Audit: Behavioral Signals Behind Inquiry

Industry Overview:

Explore current trends in the education marketplace

Competitive Audit:

Review competitor sites for common best-practices

Site Analytics:

Deep dive site analytics including segmented KPI data, page pathing and more

Survey Synthesis:

If possible, summarize surveys for major user pain points

Who

ID segments with high propensity to inquire, especially with areas of study & degree products

What

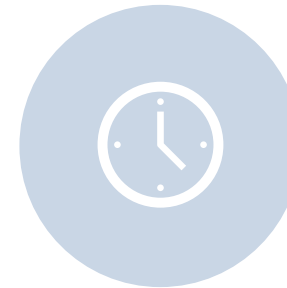

Understand which products or services are most engaging

Where

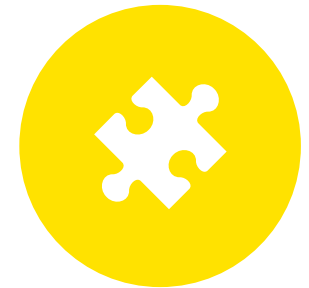

Pinpoint key markets and touchpoints that drive inquiry

When

Determine the optimal timing or journey stage for converting / delivering content

Why

Understand what drives or prevents users from inquiring

HR Means Human Resources

The business/humanresources page converted better than the business page for users searching “Human resources” or HR

Concept

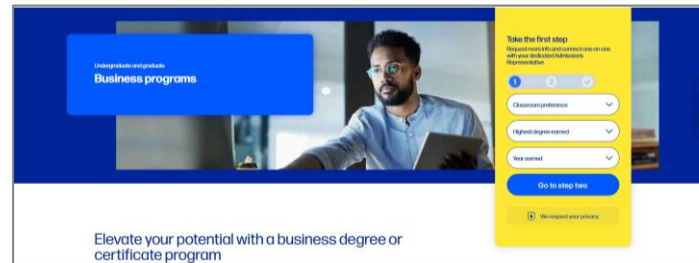

Primary focus:

- Re-redirect from a poorer performing page to a better performing page
- Only re-redirect out keywords containing “human resources”

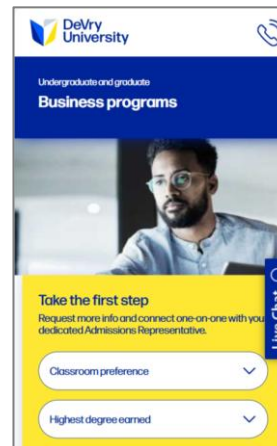

Justification:

- The business page had a 5.94% V2I for the targeted segment, compared to 6.65% on the business/humanresources page
