

Horizon x DeVry

STRATEGIC AUDIT

April 2026

WHY WE'RE **HERE TODAY**

We're here to assess the industry landscape, competitive benchmarks, and Devry's' current site performance to pinpoint the most **impactful opportunities to strengthen the customer journey and drive higher conversion**

What We'll **Cover**

Our Approach

Our End-to-End Approach for Unlocking Conversion Growth

Goals and KPIs

- Confirm primary conversion goals and funnel definitions (visit to inquiry, inquiry to next action).
- Align on success metrics and guardrails by stage (engagement, form progression, completion, lead quality proxies).
- Flag measurement dependencies that affect readouts and testing.

External Assessment

- Evaluate against industry trends, shifts in consumer behavior & emerging best practices
- Assess consumer sentiment through social listening
- Benchmark DeVry experience against core competitors

Internal Performance Assessment

- Analyze performance by area of study and program where available.
- Review mobile vs desktop behavior and conversion gaps.
- Assess form progression and drop-off points, including visibility and usability issues.

DeVry Program Pillar Creation

- Outline test ideas based on audit findings
- Identify consensus problems as strategic pillars for optimization

Test Concepting & Road Mapping

- Prioritize ideas, collaboratively refine them through joint brainstorming
- Build a finalized pipeline based on impact, dependencies, & scope

Strategic Audit Uncovers Impactful & Testable Opportunities To Drive Growth With Clear Execution Path

Our Assessment

Journey Breakdowns Are Eroding Enrollment Opportunity

Lack of Information Hierarchy

Undecided visitors are lost before they ever reach proof or form intent

Unclear Value Props & Credibility

Users hesitate because trust and payoff aren't earned before the ask

Arduous Lead Capture

High-intent is getting stranded by friction and low-intent never gets nurtured into intent

No Lead Nurture Post-Inquiry

Downstream value remains under-captured even after an inquiry is won

Progressive Discovery Converts Undecided Users Into Qualified Inquiries

Most Users Don't Know What They Want (At First)

41% of paid spend targets queries without clear level or pathway - the experience then asks users to choose without specific context

[illegible]

**+43%
CVR**
when specific
query →
specific LP*

Specificity Indicates Intent

When specific query intent matches landing page specificity, V2I improves by +44% and broad content for broad queries by +10% -- matching works, and specificity indicates intent

V2I By Query & LP Mapping

Competitors Guide Discovery, Rather than Gate It

ASU and Coursera use quiz-style
pathfinders and topic → program
flows to move undecided users
toward specific programs without
forcing premature decisions

Optimization Opportunities: Topic & Career Goal Pathing Enable Progressive Discovery

PROGRESSIVE PATHING

Improved content discovery enables users to progress from high-level interests to targeted programs, reducing friction through focused specialization paths and streamlined navigation

SPECIFIC PROGRAM DISCOVERY

Enabling user discovery all the way to their exact program of interest avoids halting exploration and produces high quality leads

GUIDED USER PATHS

Guided pathfinders reduce decision burden for undecided users, especially when decisions are put into user terms like role-based discovery

Proof Must Earn Trust Before The Ask – Outcomes, Cost, And Flexibility Drive Enrollment

Career Outcomes Are The Primary Driver

Competitors make skills, tools, and outcomes easy to scan; DeVry does not yet provide the hands-on proof, curriculum clarity, or employer cues tech users rely on to validate value and commit

***94%**

of online learners enroll for career outcomes

17%

of DeVry Reddit posts discuss outcomes justifying cost

Cost Clarity Is A Measurable Conversion Lever

Returning adults need early cost-to-value reassurance; competitors provide it up front, while DeVry delays tuition context—despite affordability page form delivering **+43.9%** higher completion rates

Affordability Page
+44% CVR

Stackable Pathways + Online Modality Lower The Inquiry Barrier

Students are ****2.4x** more likely to enroll when programs offer stackable credentials, yet despite **96%** of DeVry inquiries preferring some online modality, this preference isn't visually reinforced

% of Sessions With Selection

*Source **Source

Optimization Opportunities: New Modules Add Page Depth To Address User Concerns For High Consideration Decision

CAREER OUTCOMES SNAPSHOT

Career outcomes signal meaningful value aligned to user goals, making specific DeVry skills and outcomes more compelling than institutional attributes alone

COST + AID CLARITY

Pricing clarity builds confidence in decision-making; higher education is inherently expensive, and hiding costs doesn't change what users already know

STACKABLE PATHWAYS

Stackable pathways mitigate commitment & completion concerns and re-assure value as credits complete

ONLINE RE-ASSURANCE

Busy students prioritize flexibility in how, where, and when they learn, making online delivery an important value proposition to reinforce—even if it doesn't drive modality selection

A Condensed Form Places Urgency In View While Pathing Users Toward Desired Enrollment

Massive Mobile Form

A single step mobile form occupies substantial real estate and prevents users from engaging with content that takes them from awareness (query + click) to intent (inquiry)

Mobile
Inquiry Rate
(vs desktop)
-40%

Unknown Enrollment Dates

"Every 8 weeks" allows delay while enrollment dates create urgency with deadlines

Difficult Form UX

Competitors streamline selection with pre-filtered, searchable dropdowns and focus on users' desired degrees rather than past education

Degree Level

09 days : 12 hours : 17 mins : 30 secs

Get the quality education you deserve

Award-winning university: Our latest awards and recognitions include making Newsweek's America's Top Online Colleges for 2026 list, Niche's Best Online Colleges in America list, and the 2026 QSW 150 list

ENROLLMENT DEADLINES

Enrollment deadlines create urgency and encourage immediate action from high intent search users

Pre-filled Area Of Study In Lead Form

Pre-filling the Area of Study field improved V2I when the selected value closely matched page intent, while broader mapping with a proxy did not produce the same lift

Variations	What Changed
Control: No Pre-Fill Area of Study field displays placeholder text "Area of study"	Control - No Pre-Fill
Test: Area of Study pre-filled by page topic 1. Accounting Page: "Accounting & Finance" 2. AI Page: "Engineering Technology"	Test - Pre-Fill Area Of Study

Accounting Page Test Value Field: "Accounting & Finance" vs. No Pre-Fill

AI Page Test Value Field: "Engineering Technology" vs. No Pre-Fill

Test Details

Primary KPI: V2I: The rate at which users complete the get started form

Guardrail KPI: Bounce Rate: Percentage of landing page visits without an interaction

Additional KPI: Form Engagement Rate: The rate at which users click on 1+ dropdowns

Date Duration: 2/17/26 - 3/18/26

Target URLs: Accounting: pages starting with "https://www.devry.edu/get-started/business/accounting-programs" AI: pages starting with "https://www.devry.edu/get-started/tech/artificial-intelligence"

Page	V2I Lift +/-	Stat Sig
Accounting	+17.11%	Yes
AI	-7.27%	No

Results & Immediate Next Steps

Next Steps & Testing Opportunities:

1. Direct traffic to winning variant (done)
2. Fast follow on high-specificity pages where true 1:1 mapping is possible (Ex: Medical Billing & Coding)
3. Long Term: Refine mapping logic to ensure all topics have 1:1 area of study values in dropdown
4. Future Testing: Filter out irrelevant areas of study

SMOOTH SELECTION

Program selection should focus on user intent—reducing effort with pre-fill and search, and minimizing confusion through 1:1 field mapping and filtered, relevant programs

What payment scenario works best for your budget?

I prefer to pay for each course that I take.

I prefer to pay a flat fee and take as many classes as my schedule allows each quarter.

Quick tip: However you decide to pay, you'll be able to take advantage of the many scholarships, federal grants, employer discounts and other tuition-saving opportunities Capella University has to offer.

Back

Next

Smart financing
Capella Progress Reward scholarships are for eligible new or returning students in select degree programs, including scholarships up to \$15K for a BS in Business or up to \$2.5K for an MBA. The best part is, they aren't need-based.

Take the Path Finder Quiz

1.877.884.0733 Request Info

ALTERNATIVE FORMS

Forms that path users to appropriate programs via value exchange can capture leads for nurture ahead of inquiry

Enabling Continued Action Post Inquiry With Clear Next Steps Maintains Momentum

Immediate Action Limited To Outreach

Competitors immediately enable multiple next steps after lead capture (call, chat, apply online, or explore programs), while DeVry primarily pushes calls or chats without tailored content or an online apply path

0.3%

inbound calls or chat rate on get-started/thank you

23.2%

main site 2nd Inquiry Rate

Unclear Next Steps

DeVry's success page lacks clear enrollment steps, missing an opportunity to motivate students and set clear expectations for what comes next

Undesirable Phone Call

Competitors streamline selection with pre-filtered, searchable dropdowns and focus on users' desired degrees rather than past education

Meet your enrollment coach

Your enrollment coach will discuss your goals and ensure you find the right program. Your coach will also guide you through the application and enrollment process.

Optimization Opportunities: Keep Users Engaged, Clarify Process, Prioritize Calls, Sell Enrollment Concierge

Get familiar with your program

Before you enroll in a program, it's important to make sure it's a good fit for your career goals, learning style and budget. Look through the program details for information about required courses, admission requirements and learning outcomes. You can learn more about what to expect at Capella in our [University Guide](#).

PRIORITIZE WITH DATA

Use readiness data to signal where leads likely are in their journey, validate journey stage, and prioritize outbound dialers accordingly

New Hampshire University. At SNHU, we're committed to helping you earn your degree faster (and for less money). Soon an admission counselor will reach out to you to:

- Discuss your goals and help match you to the right degree or certificate program
- Explore maximizing your transfer credits from previous colleges
- Determine if you're eligible for credits from military or work experience
- See if you qualify for military, employer or other partner tuition discounts
- Identify affordable tuition funding options, including grants, loans and payment plans

RE-FRAME THE CALL

DeVry should clearly communicate the benefits of its enrollment concierge and position it as a value-added support service—not just a process step

Capitalizing On Integration With Blu, Deeper Data Usage & Search Advancements

	CURRENT	ADVANCED
Information Hierarchy	• Surface information relevant to users based on query and on-site engagement • Guide users toward more application-ready inquiries with progressively targeted content to meet education goals	• Deliver tailored re-marketing content around prior visit engagements and remarketing campaigns
Value Props & Credibility	• Content delivery tailored to most relevant user concerns and topics of interest • Confirm program efficacy with success metrics and social proof	• Modify targeted value props for high-intent sessions • Surface modality modules for “community college near me” queries • Audience + creative personalizations related to existing social / programmatic campaigns or BLU once in place
Lead Capture & Nurture	• Improve form UI with an emphasis on program of interest selection • Personalize form pathing • Educate post-inquiry with expectation setting and journey self-selection	• Persist data across channels & sessions with potential for tailored message sequencing • Data collection for integration into CRM and sales systems

Blu Can Help Personalize The Site For High Intent Leads Across The Journey

More Advanced, Dynamic Personalizations Are Also Achievable With Program Advancement

AI Recommendations With Pre-Built Modules

Common onsite product/service recommendation tooling dynamically suggests recommendations from pre-built templates based on site engagement

Agentic Experiences (Ex: Firsthand)

82%
Higher
CTR

On-site agents help visitors find the right offerings and return tailored recommendations, reducing overwhelm and driving confident next steps

Return on Investment From Agency Fees Shows Strong Traction and Continued Lift to Incremental Revenue

Oct '25 – May '26

\$8,750,000 / \$185,000 = 47x

May '26 – Jun '26

\$2,974,000 / \$50,000 = 59x

Concepts:

Modules & Quick Hit Tests

Reusable Content Modules to Unlock Conversion Lift

These modules map to four experience themes and can be applied across Get Started, then scaled by segment and page type. These modules are recommended for prioritization amongst the wider opportunity set

Proposed Tests

Content Progression Engages Researching Users

Information Hierarchy

Concept

Primary focus:

- On Higher level pages (Core, tech, business and health), link to the most relevant specific topic page to engage researching users in the upper funnel with progressive learning and avoid frustration and abandonment

Rationale:

- Progressive specificity is in place on major competitors like ASU ([Link](#)), University of Phoenix ([Link](#)) in a similar hierarchy, Colorado State ([Link](#)) and Walden ([Link](#))
- Specific queries to specific LPs convert 44% better than specific queries to broad LPs

Estimated 12M Impact If Winner: \$2M

Control

Experiment

Option 1
(reco)

Option 2

Sticky Product Intent Capture

Information Hierarchy

Concept

Primary focus:

- Enable users to convert at the moment of intent with a sticky CTA that includes program of interest capture
- Ensure selection is passed as a pre-fill
- ABC as an anchor link on current page or linking to more specific page

Rationale:

- This is a winning concept from other clients (11% primary KPI lift)
- Pre-selecting program of interest reduces requirements for engaging with a more complicated form

Follow-ups:

- Subject of interest (Tech, health, business) selection on Core LP

Control

Experiment

Outcome-Based Pathing

Information Hierarchy

Concept

Primary focus:

- Re-frame the path selection conversation around outcomes rather than degrees to simplify decisions

Rationale:

- This is in place on Coursera ([Link](#))
- Career-first progression matches how prospects think about education decisions by starting with an outcome and removing the complexity around which degree pairs with desired outcome

Follow-ups:

- Average position salaries and field growth as seen on ASU ([Link](#)) or SNHU ([Link](#))
- Comparison feature with multi-select functionality
- Embedded recommended path quiz

Control

Experiment

Repeat Online Availability

Value Props &
Credibility

Concept

Primary focus:

- Online and flexible learning modalities are an important value-add and should be reinforced with more than a single mention, especially around decision points (CTAs)

Rationale:

- ~25% of 2025 search spend was on keywords containing some variation of "online"
- 71% of adult learners require online modality but 73% still enroll in a school with in-state presence: [Link](#)
- 96% of users on DeVry selected online or hybrid modality: [Link](#)
- Re-use of module that fits into new template makes concept low lift

Estimated 12M Impact If Winner: \$475K

Control

Experiment

Filtered LP Dropdowns

Lead Capture

Concept

Primary focus:

- Filter dropdown values to only programs relevant to the landing page content (/business-programs example on the right)

Rationale:

- This is a best practice live on GCU ([Link](#))
- Implementation is simple as it requires 1 line of CSS tied to relevant elements

Estimated 12M Impact If Winner: \$1.4M

Control

The control version of the landing page form displays a dropdown menu for 'Program of Interest' with the following options: Undergraduate, Undecided, Accounting & Finance, Business & Management, Cyber Security, and Computer Information Systems. The dropdown is highlighted with a red dashed border.

Experiment

The experiment version of the landing page form displays a dropdown menu for 'Program of Interest' with the following options: Undergraduate, Undecided, Accounting & Finance, Business & Management, Graduate, and Undecided. The dropdown is highlighted with a green dashed border.

Enrollment Dates Create Urgency (ABC or Multivariate)

Lead Capture

Concept

Primary focus:

- Create enrollment urgency by communicating the next date classes start

Rationale:

- Urgency is a commonly winning tactic across ecom and lead gen: [Link](#)
- Colorado Tech uses clear enrollment dates to create urgency: [Link](#)
- Copy changes and simple module insertions make concept low lift

Estimated 12M Impact If Winner: \$700K

Control

Experiment

Clearly Manageable Enrollment Process

Lead Nurture

Concept

Primary focus:

- Set expectations that DeVry enrollment is manageable and assisted for the best outcomes

Rationale:

- This is in place on ASU ([Link](#))

Control

Experiment

Interaction-Based Lead Prioritization

Lead Nurture

Concept

Primary focus:

- Capture user communication preferences for (1) Ideal enrollment experience and (2) More effectively prioritized sales dialer

Rationale:

- More effectively engage interested parties by calling them sooner
- Improve sales consultant headcount efficiency by de-prioritizing users not interested in phone enrollment

Follow-ups:

- Enhanced dialer segment prioritization after data collection
- Survey experience to understand why users select “No”

Control

Experiment

External Assessment

Industry Trends

Shifts in Education Are Creating New Opportunities

Outcomes Based Decision-Making

94% of online learners enroll for career outcomes, evaluating programs on job relevance and workforce preparation

Microcredentials & Stackable Pathways

Stackable certificates let learners upskill before committing to a full degree. Students are **2x** more likely to remain engaged and **2.4x** more likely to enroll if a program offers microcredentials

Modality Flexibility

Modality is a major differentiator for adult learners, with convenience rivaling reputation. **80%** choose modality first, and **71%** will not enroll if their program isn't offered online

Employer Influence & Credential Relevance

Employer demands are reshaping program value toward real workforce skills. **86%** of employers view certificates as credible job-readiness signals, reinforcing the shift toward lifelong learning postgrad

Current State of Devry vs. Industry Trends

DeVry Has Strong Foundations But Could Do More

Career-Centered Messaging But Without Data

Unlock your career potential with an accounting degree

From strategy and analytics to industry trends, discover how an accounting degree can help you advance your career tomorrow's careers - today.

- **Real-world learning:** Build insights into realistic business scenarios with coursework and capstone projects that dive into actual business problems and examples.
- **Career-relevant technology:** Get hands-on practice with the latest software, tools, and AI-driven insights that companies are currently leveraging, like Microsoft Dynamics and QuickBooks.
- **Industry-informed coursework:** Immerse yourself in key topics like accounting principles, research methods, federal tax regulation, auditing, financial reporting, accounting ethics, and more.

Stackable Programs Mentioned, Not Highlighted

- **Stackable programs:** Many of our accounting programs are designed to stack into a next level degree - allowing you to build upon what you've already learned when you're ready to advance your career potential.*

[Get started](#)

Online Mentioned But Buried

- **100% online:** Complete your accounting degree 100% online or choose the option to take select classes on campus.

The flexibility you need

From 100% online accounting classes to e-books and our convenient mobile app, we've got you covered when and where you need us.

Certificate Content But No Dedicated Path/Pages/Hub

Accounting programs for every stage of your career

Whether you're just getting started, gearing up for the next phase in your career, or preparing for an industry certification, we've got the program you need to build the skills employers want.

- Undergraduate certificates
- Graduate certificates
- Associate degrees
- Master's degrees
- Bachelor's degrees
