

HORIZON x CATALYST BRANDS

EXPERIENCE OPTIMIZATION IMPACT ANALYSIS

Aeropostale & Brooks Brothers

Executive Overview: June 2026

WHAT WE'LL COVER

PERFORMANCE IMPACT

Horizon Commerce identified and tested digital & customer experience improvements as a pilot program

How We Started the Initiative

October 2025

- Allocated experience analytics hours to deeper **customer journey pathing** analysis, unearthing low CVR
- Conducted **Aero** and **Nautica** experience optimization assessment, IDing testing areas to reduce funnel friction, drive purchase urgency & make product selection easier
- Approved to **build pilot experience program** with un-used analytics hours

How We Scaled Strategically

January 2026

- Continued testing for **web & app**, reco-ed media **landing pages**
- **Nautica** program paused due to planned '27 brand repositioning

February 2026

- Expanded program into **Brooks Brothers**
- Identified **Brooks Brother** testing opportunities around product understanding, formal attire optimization, product discoverability, and a more seamless checkout experience
- Launched **Brooks Brothers** experience optimizations

The Momentum

April 2026

- **Program paused** across brands due to shifted & reduced analytics scope, with Catalyst team changes
- Conversations with Catalyst teams to find a home for optimizations, esp. given measured **improvement to media**

June 2026

- Restarted the **Brooks Brothers** program in limited scale

The Initial Pilot

Increased testing velocity despite seasonal and development constraints

Enhanced utilization of Optimizely capabilities

Executed 13 tests over a six-month period

Return on investment from agency fees shows strong traction and continued lift to incremental revenue for Brooks Brothers & Aeropostle

$$\text{\$1,600,000} / \text{\$156,000} = 10.3x$$

(Over 6 Months)

Initial iROI on Horizon
Commerce Program

Opportunities to **grow incremental revenue impact** by increasing testing velocity, expanding to media-targeted landing page optimizations, and implementing more complex customer-level personalization onsite & in-app

*Incremental revenue calculated using holdout methodology (test vs. control) to account for changes due to seasonality, media investment, and other market factors - via tests run via pilot for Brooks Brothers and Aeropostle

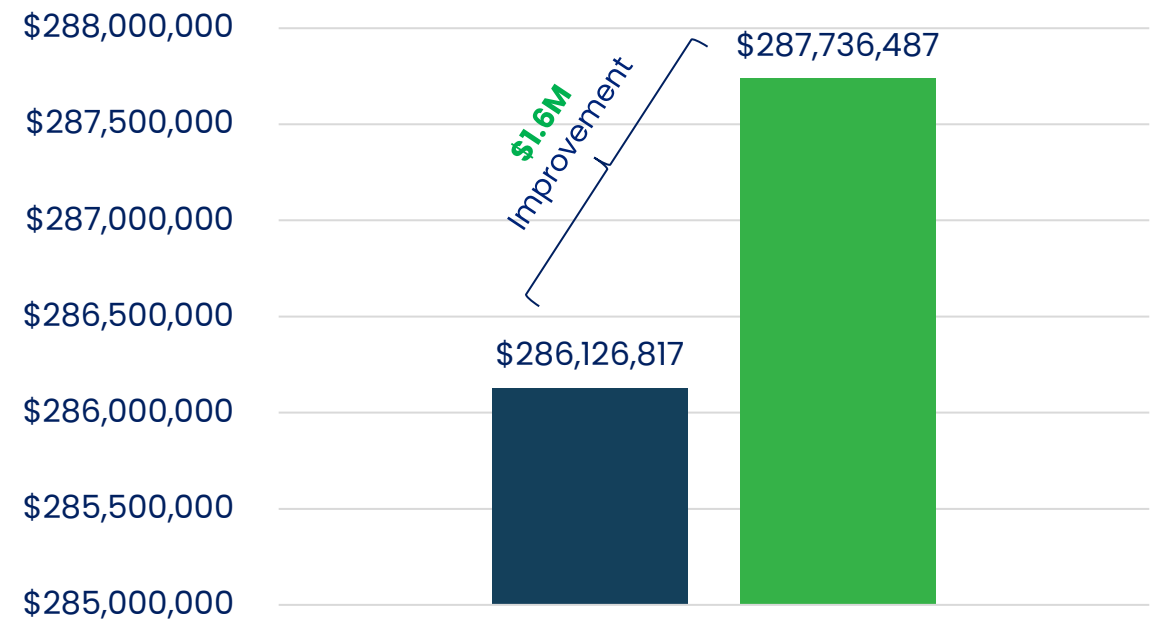

Annualized incremental revenue from our 6-month pilot program was validated with the Catalyst team, and learnings informed a go-forward roadmap

Program Results to Date	
12 Month Impact to Est. Revenue	\$1.6M
Visits Impacted	7,922,860
Conversions in Tests	3,192,043
Tests Completed	12
Tested Variants	16

*Incremental revenue for Brooks Brothers and Aeropostale calculated using holdout/control vs variant performance

**3 Winners + 1 Positive Rollout

Aero + BB 12-Month Incremental Revenue Earned
With & Without Optimization Testing

■ Aero/BB LTV Rev Without CRO ■ Aero/BB LTV Rev With CRO

The majority of our optimizations have directly impacted Media efforts, driving truly incremental ROAS and owned channel sales

	Est. 12-Month Incremental Revenue Impact	Channel Revenue Lift	CVR Delta (impacted traffic)	AOV Delta (impacted traffic)	% of Total Program Impact
Paid Media	\$650,000	1%	+0.39%	+0.61%	40%
CRM	\$430,000	1%	+0.73%	+0.27%	27%
SEO	\$115,000	1%	+0.35%	+0.65%	7%
Other	\$405,000	1%	+0.37%	+0.63%	26%

Our collaborative partnership also drove meaningful efficiency gains for the Catalyst internal team

01

Strategic Test Ownership

Horizon Commerce pinpoints testable opportunities through onsite performance analytics, cross-channel learned insights, and Catalyst team collaboration

02

Frees Catalyst Creative Bandwidth

An always-on testing pipeline runs concurrent experiments, often developed independently without leveraging Catalyst design resources

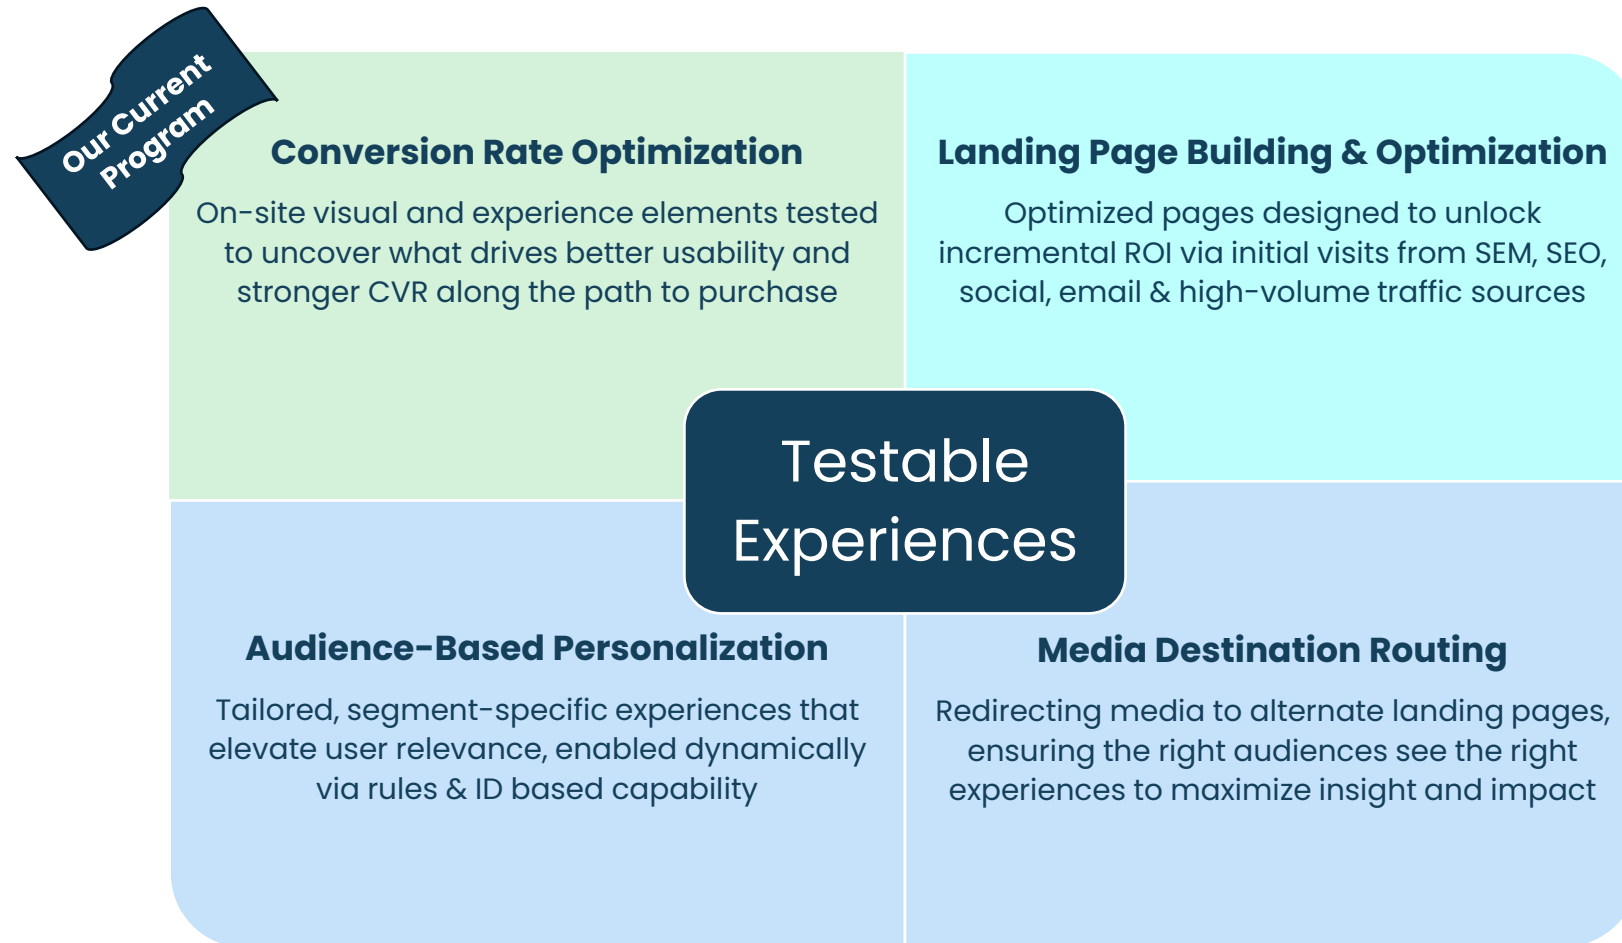

03

Increased Testing Velocity & Impact

An experienced team delivers high-impact, functionality-driven experiments in ~2 weeks from development to launch

EXPANDED OPTIMIZATION

A full optimization program would scale customer experience improvements and turn media spend into a compounding growth engine

Our existing testing roadmap is expected to deliver \$2.6M incremental revenue and 14x iROI on fees

Navigation & Discovery

Help shoppers find relevant products faster and increase product exploration

- Filter Design Updates
- Focused Mobile PDP with Minimized Search
- Search Suggestions
- Mobile Navigation Category Imagery
- Desktop Navigation Category Imagery
- Suit Filter Feature Category Ordering
- Shipping Selection with Shipping Information

Merchandising

Improve product appeal, relevance, and conversion once users are viewing products

- Returning User Cart Callout
- Mobile CTA ATF
- Formal Attire Copy
- Lifestyle Product Imagery
- Reduced Scrolling Header
- Low Converting Audience Redirect Test

Checkout Optimization

Reduce friction and increase confidence during purchase

- Reducing Shipping Decisions
- Comp Value Discount Framing
- Separate Length & Size Selection
- Bag Summary at Top of Checkout
- Shipping Selection with Shipping Information

Planned Optimizations for Brooks Brothers & Aeropostale

Additionally, persistent funnel leakage signals the need for media-targeted experience optimizations beyond the current roadmap

Where The Media/Owned Funnel Leaks

current rate (2026) and YoY change

Funnel step	AERO	BB
Product views / session <i>views ÷ sessions</i>	1.19 -16% ▼	1.27 -8% ▼
Add-to-cart rate <i>carts ÷ views</i>	17.7% -3% =	9.7% -13% ▼
Checkout rate <i>checkouts ÷ carts</i>	16.8% -18% ▼	34.1% <i>n/c *</i>
Conversion rate <i>orders ÷ sessions</i>	1.30% -19% ▼	1.55% -28% ▼

*BB checkout-event tracking changed YoY

The Implication

-19-28%

CVR decline YoY across both brands

Every dollar

Of media is entering a deteriorating funnel

No added spend

Required to improve returns on traffic you're already buying

Together LPO + CRO workstreams unlock a combined \$10.6MM* incremental revenue opportunity at 16x iROI

Landing Page & Media Focus Areas

Curated category landing pages

Route non-brand search, social and CRM clicks to merchandised category pages, not generic PLPs, so more sessions reach product.

Custom PDPs for shopping campaigns

Tailor PDPs for Shopping and PLA traffic with fit, value and reviews to lift add-to-cart, combat high Brooks drop off.

Creative and site experience matched to media

Carry each ad's creative, offer and audience into the page across paid and owned to cut bounce.

Mobile optimization

Streamline the mobile path to purchase (sticky CTA, refined content, fewer steps).

Media program would see an immediate 5% CVR lift, assuming constant traffic and without added spend

Expanded investment sustains momentum, while enabling broader roadmap execution & larger gains

1 **To date:** Oct '25 – May '26
