

[BB] – Enhancement I Home 82.9 | Returning User Items In Cart Callout

RESULTS

TEST HYPOTHESIS

Returning users landing on Home convert better than those landing on PLPs or PDPs. Giving them an easy path down-funnel should improve Cart Visitation, Checkouts and Orders

VARIATION DETAILS

Control – No Saved Bag Pop-Up
Variation – Saved Bag Pop-Up

TEST METRICS

Primary Metric:

Checkout Rate: *+7.42%

Secondary Metrics:

Orders per Visitor: +0.98%

Revenue per Visitor: +2.38%

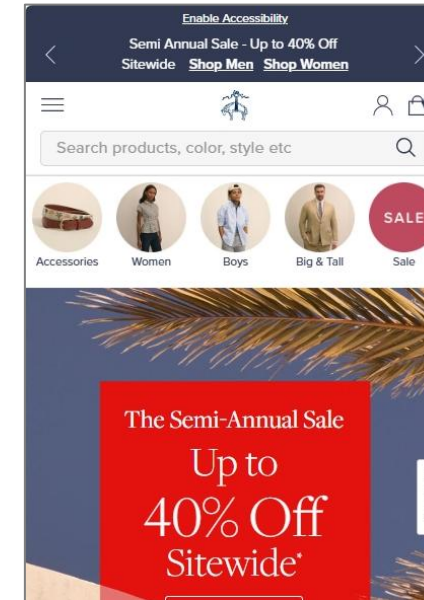

AOV: +1.3%

Cart Visit Rate: *+20.72%

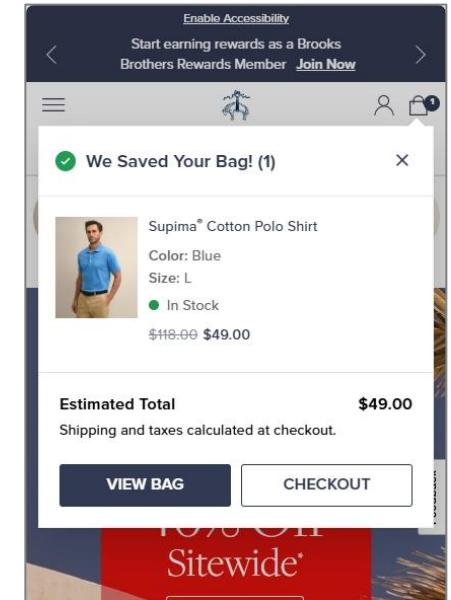

Cart Adds per Visitor: -2.91%

TIMELINE: 6/10/26 – 7/13/26

Control [Preview Link](#)

Variation [Preview Link](#)

INSIGHTS

- The saved bag pop-up converted all users at an increased rate when it initially launched
- However, due to reduced cart additions across audiences not directly typing the URL into browser, long term Orders per Visitor and RPV were flat

NEXT STEPS

- Allocate traffic at 100% of direct traffic to the variant
- Scope engineering costs for moving code to prod
- Move to prod if eng. + 1 yr maintenance costs are below \$150K
 - If costs are above \$150,000, remove from Optimizely to avoid potential future breakage

[BB] – Enhancement I Home 82.9 | Returning User Items In Cart Callout

RESULTS

DIRECT TRAFFIC (42 % of Users)

TEST METRICS

Primary Metric:

Checkout Rate: *+9.55%

Secondary Metrics:

Orders per Visitor: +1.38%

Revenue per Visitor: +9.40%

AOV: +7.91%

Cart Visit Rate: *+23.25%

Cart Adds per Visitor: -0.14%

CAMPAIGN + SEARCH TRAFFIC (71 % of Users)

TEST METRICS

Primary Metric:

Checkout Rate: *+6.70%

Secondary Metrics:

Orders per Visitor: -0.08%

Revenue per Visitor: +2.50%

AOV: +2.58%

Cart Visit Rate: *+20.28%

Cart Adds per Visitor: *-4.04%

*Some Direct and Campaign + Search Traffic
Overlapped during testing across sessions
- 5246 User overlap Direct and Campaign
- 274 User overlap Direct and Search
