

Horizon Commerce Flash Process

Month XX, Year

Today's Agenda:

Smooth Sailing

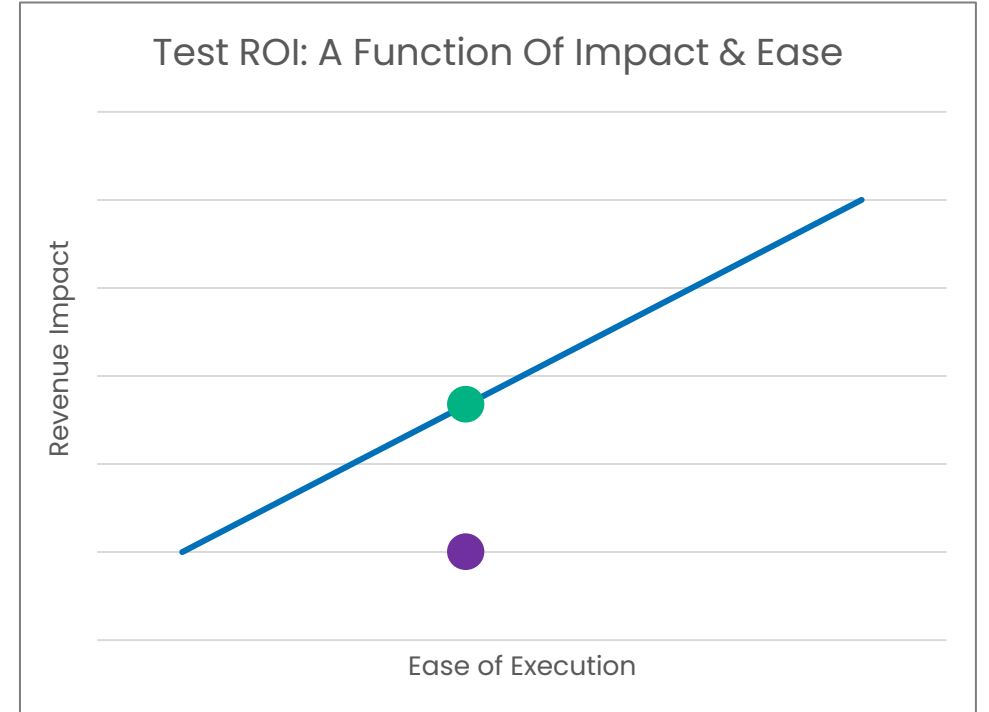

Why test X-small changes

Maximizing X-small change ROI

Detailed Alignment on
optimized process

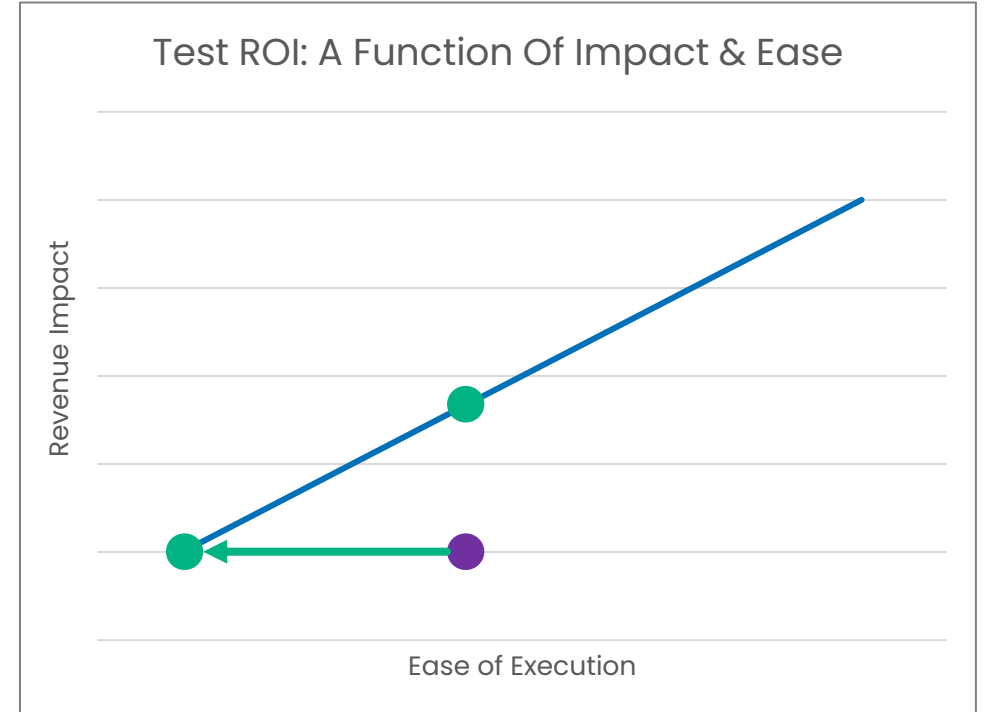

Why test X-small changes?

1. Site fine tuning
2. Low risk
3. High ROI & high reward in aggregate

How to maximize X-small test ROI

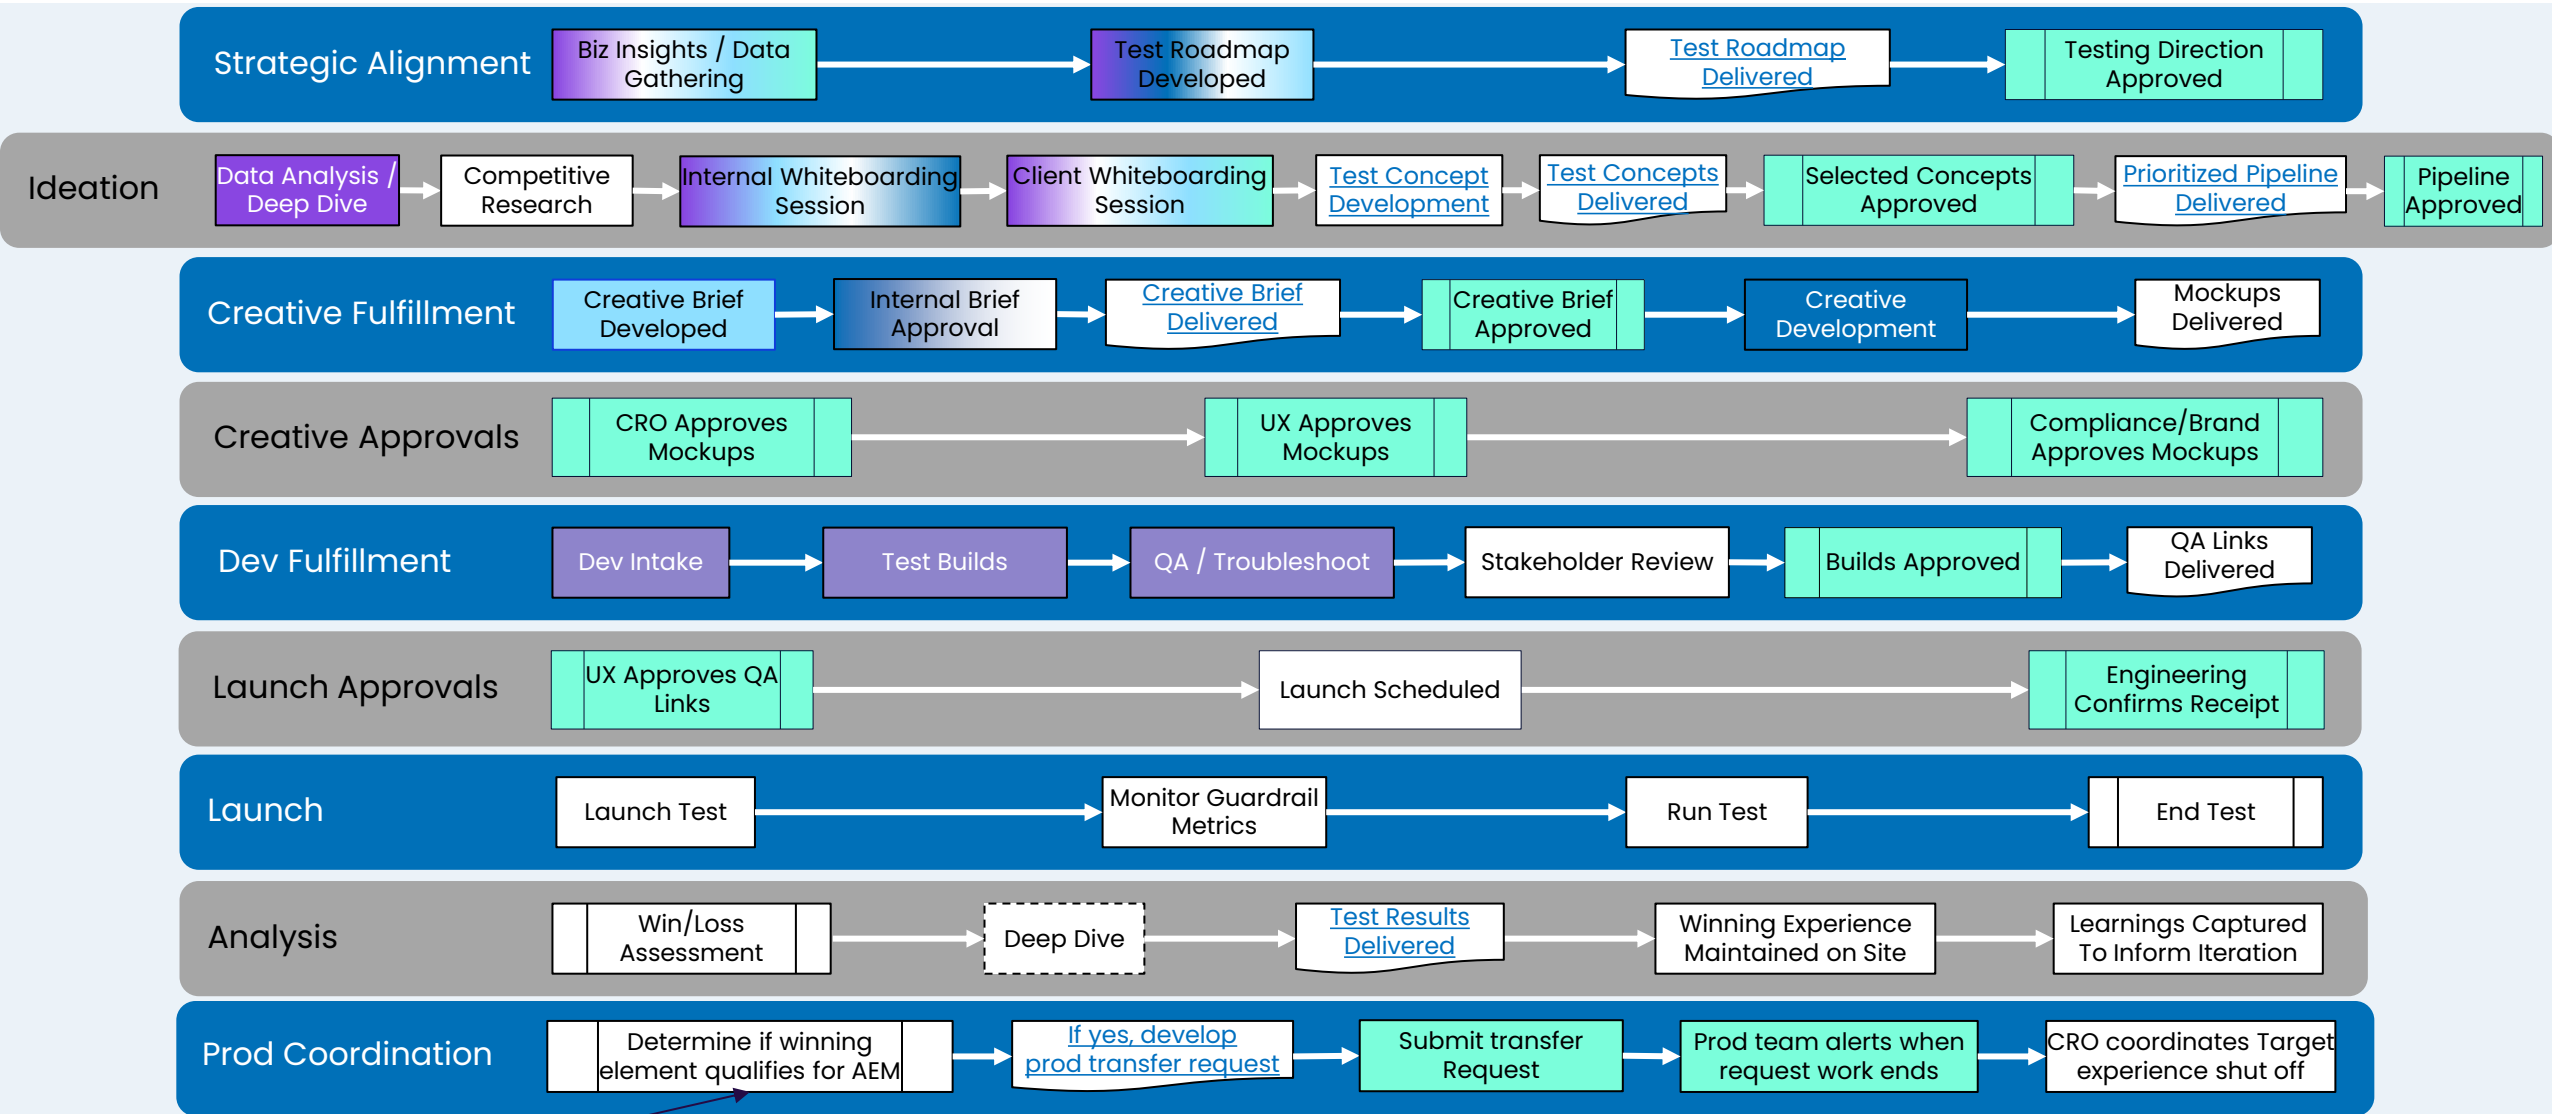

1. Reduce alignment & execution steps to only QA link alignment
2. Up front alignment on low-risk test parameters

Limiting alignment to only the QA link, enables **fast delivery while maintaining [Client] control** over all tests that reach consumers

Standard Delivery Process	Flash Delivery Process
Research	Concepting
Alignment on Research	Alignment on Concepting
Concepting	Briefing – Simplified
Alignment on Concepting	Creative Input
Briefing	WYSIWIG Development
Alignment on Briefing	QA Link Alignment
Internally Approved Design Delivery	Test Launch + Monitoring
Alignment on Design + Revisions	Analysis
Compliance Alignment	Maintaining Winning Experiences
Development	
Development Alignment	
Test Launch + Monitoring	
Analysis	
Maintaining Winning Experiences	

CRO Workflow

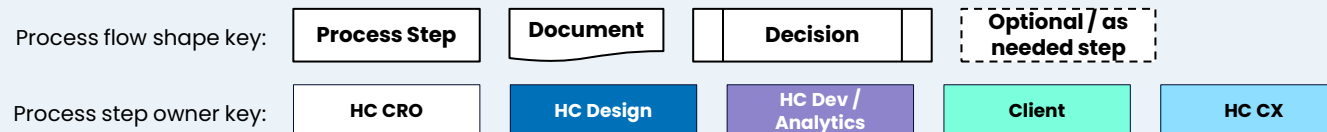

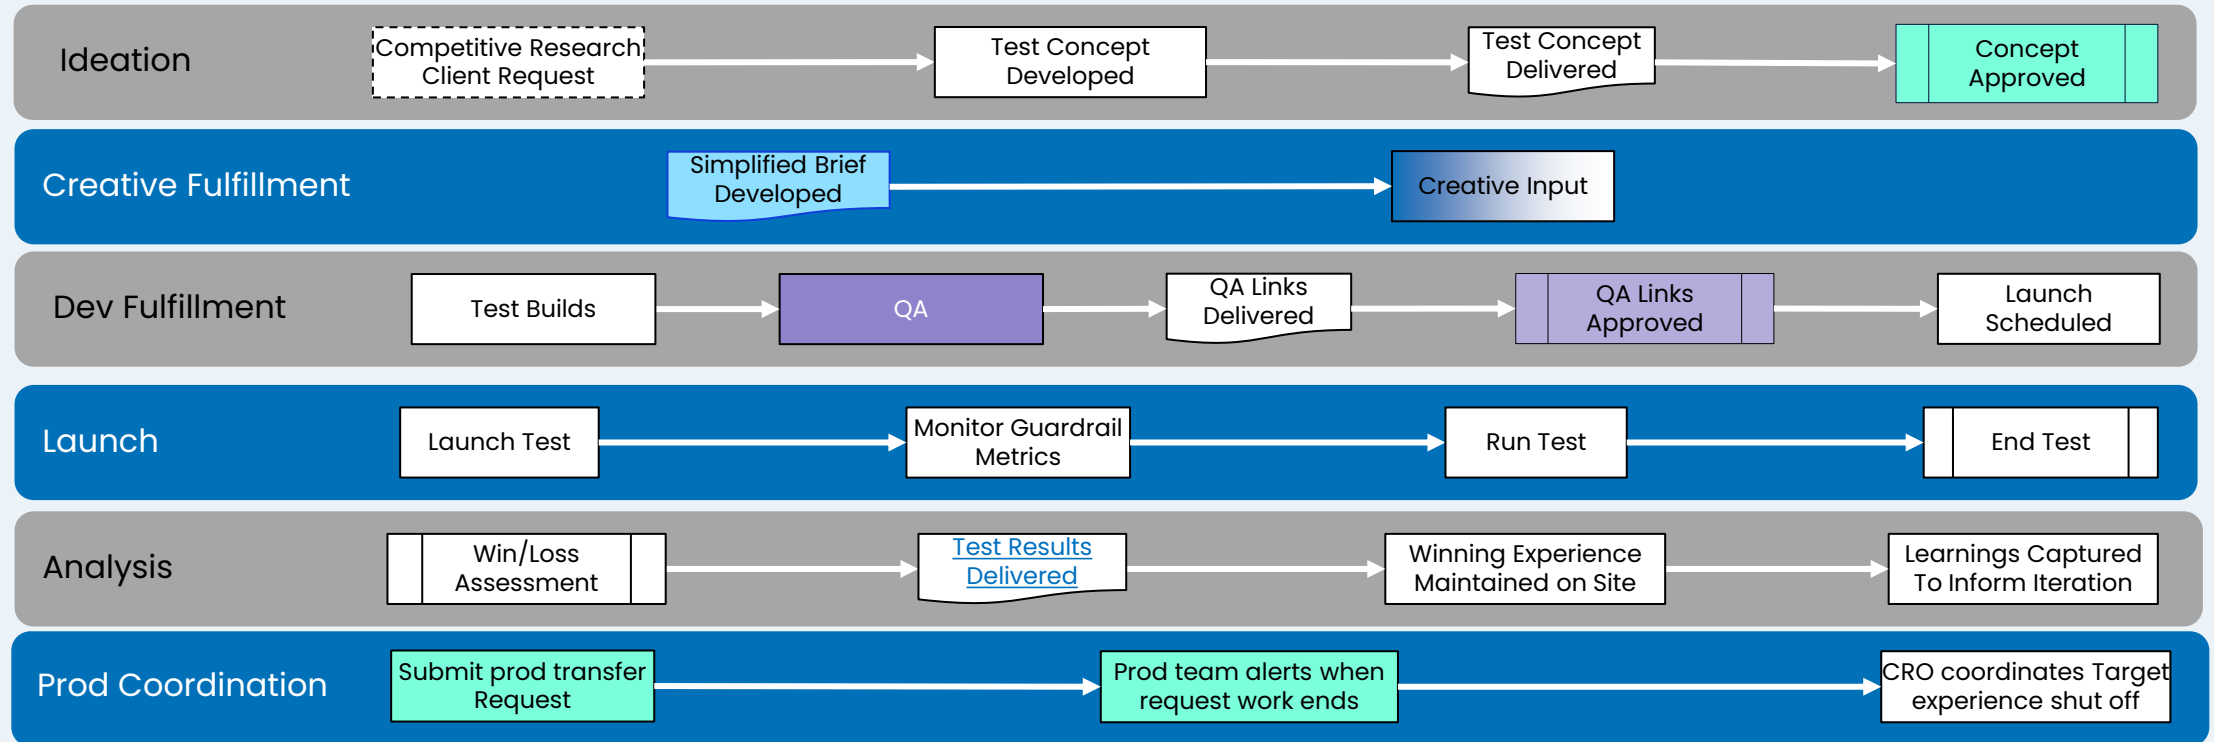

If yes AND it's a new component, then creative team creates component

Process flow shape key:

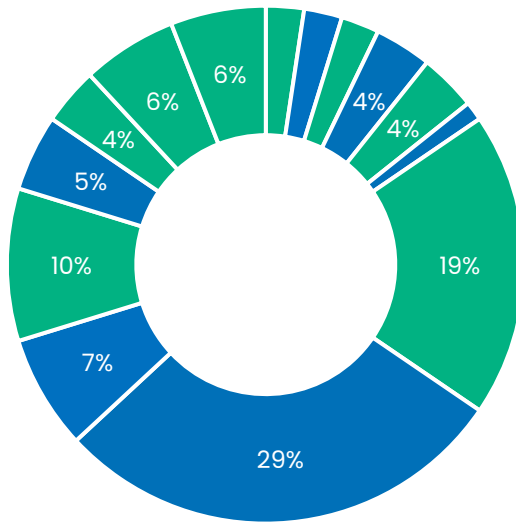

Process step owner key:

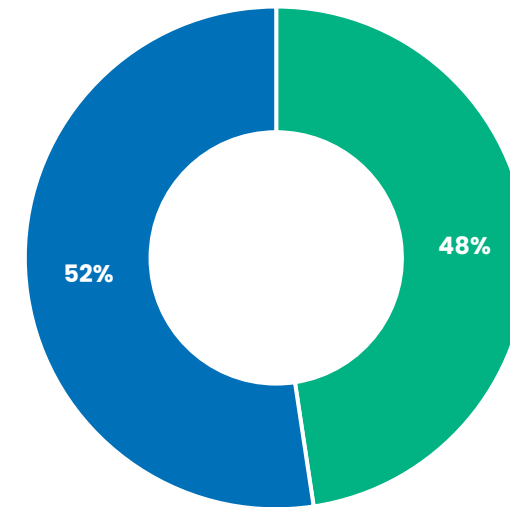

CRO Flash Process

X-Small test costs by execution phase: Current process

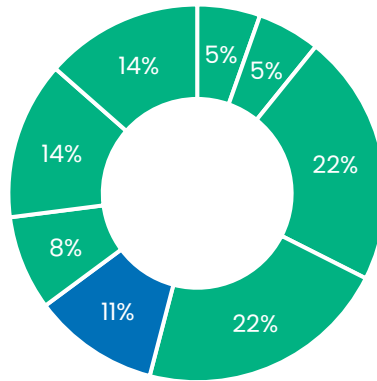

- Research
- Concepting
- Briefing
- Internally Approved Design Delivery
- Compliance Alignment
- Development Alignment
- Analysis
- Alignment on Research
- Alignment on Concepting
- Alignment on Briefing
- Alignment on Design + Revisions
- Development
- Test Launch + Monitoring
- Maintaining Winning Experiences

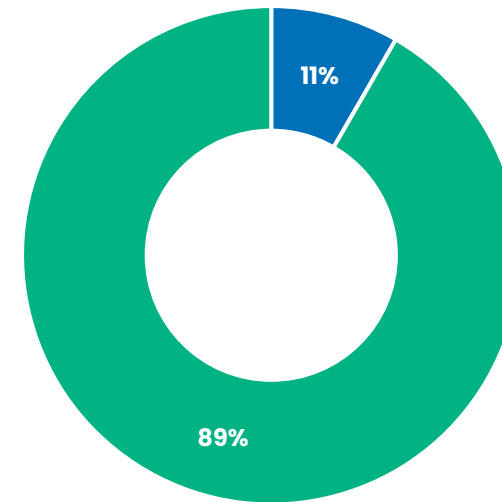

- Execution Steps
- Alignment Steps

X-Small test costs by execution phase: Flash process

- Concepting
- Creative Input
- QA Link Alignment
- Analysis
- Briefing - Simplified
- WYSIWIG Development
- Test Launch + Monitoring
- Maintaining Winning Experiences

- Alignment Steps
- Execution Steps

Gaining alignment on pre-approval details

1. Defining risk
2. Identifying **[client]**'s concerns

What Makes A Test Low risk?

Low Contrast

Low contrast changes are not substantially different from the current site. For example, a one might swap out a Hero image but wouldn't touch the Hero layout to accommodate the new creative.

Low Cost

Low-cost tests are very easy to execute, meaning that failure, or potential vetoes, aren't major blows to program ROI

Pre-approved Changes

Aligning on the types of changes that **[Client]** is comfortable with up front allow Horizon Commerce stay within pre-set guidelines and improve the rate at which pre-approved concepts meet **[Client]** expectations & launch

How Does [Client] Perceive Low Risk?

	Image Swap	Copy Change (Color & content)	Content Ordering	Element Removal
Pages	High traffic page 1, High traffic page 2, High traffic page 3	High traffic page 1, High traffic page 2, High traffic page 3	High traffic page 1, High traffic page 2, High traffic page 3	High traffic page 1, High traffic page 2, High traffic page 3
On-page locations	Hero, 1 st body section, 2 nd body section, bottom of page	Hero, 1 st body section, 2 nd body section, bottom of page	Multiple sections, Hero, 1 st body section, 2 nd body section, bottom of page	Multiple sections, Hero, 1 st body section, 2 nd body section, bottom of page
Monitoring cadence	First 2 days + weekly check-in	First 2 days + weekly check-in	First 2 days + weekly check-in	First 2 days + weekly check-in
Negative delta tolerance pre stat sig	5%, 10%, 15%	5%, 10%, 15%	5%, 10%, 15%	5%, 10%, 15%
Specific guidance?	[Client] Feedback: 1. A 2. B 3. C	[Client] Feedback: 1. A 2. B 3. C	[Client] Feedback: 1. A 2. B 3. C	[Client] Feedback: 1. A 2. B 3. C

Document Successes To Refine Flash Process

Criteria: CRO - Flash Process Attempt Tracking.xlsx

Information to Collect	
Documentation Categories	Potential category values
Client Revenue Model	Ecom, Lead Gen, Mixed
Client Requires Legal Involvement For Content	Yes, No
Test Idea Types	Image Swap, Copy Change, Page or List Ordering, Colors, Element Removal, Other
Individuals Succeeding Most Often	Done by team: Account Lead, CRO Lead & PM
Hours Spent	Done by team: Accounts, CRO, PM, Design, Dev, QA
Turnaround Time	Workdays spent completing the project Done by phase: Briefing, design input, dev, QA, client alignment, test run, analysis

Thank you!
