

HORIZON x BROOKS BROTHERS

Full Strategic Audit

Strategic Planning Overview

Defining Goals

Overview of the current market, potential changes, and competitor behavior to stay ahead in the industry.

External Trends And Opportunity Audit

Overview of the current market, potential changes, and competitor behavior to stay ahead in the industry.

Internal Performance And Opportunity Audit

How are current actions supporting goals, and how can we improve those activities or add new ones to enhance performance?

Road-mapping

Consolidated roadmap view of proposed deliverables and their dependencies to provide a clear path forward.

HORIZON x BROOKS BROTHERS

Defining & Measuring Success

Breaking Revenue Into Core KPIs Permits Logical Attribution Of Impact To Mid & Upper Funnel Activities

Cart Additions per Visitor

Evaluates success at generating initial interest in as many products as possible

Average Cart Quantity

Evaluates ability to display & recommend engaging cross-sells

Checkout Rate

Evaluates legitimacy of initial interest and how well Brooks Brothers' site sustained it

Order Rate

Evaluates ability to seamlessly transition intent to purchase without creating friction that might cause re-think

Revenue

When core KPIs move in a positive direction, revenue gains will follow

Choosing the Right A/B Test KPI By Funnel Stage

	Awareness		Consideration		Intent
KPI	Home	PLPs	PDPs	Minicart / Cart	Checkout Flow
PLP Visit Rate	Primary KPI				
PDP Visit Rate (View_item)	Guardrail KPI	Secondary KPI			
Click ATB CTA Rate (Select_item)	Guardrail KPI	Primary KPI	Primary KPI	Guardrail KPI	
Cart Addition Rate (add_to_cart)	Guardrail KPI	Primary KPI	Primary KPI	Guardrail KPI	
Bag View Rate (checkout)		Secondary KPI	Secondary KPI		
Checkout Rate (begin_checkout)		Secondary KPI	Secondary KPI	Primary KPI	
Alt Payment Use Rate		Guardrail KPI	Guardrail KPI	Primary KPI	Primary KPI
Shipping Step Completion Rate (add_shipping_info)		Guardrail KPI	Guardrail KPI		Primary KPI
Order Rate				Primary KPI	Primary KPI
Revenue per Visitor (RPV)				Primary KPI	Primary KPI
Return Rate		Guardrail KPI	Guardrail KPI		Guardrail KPI

Primary KPI

Secondary KPI

Guardrail KPI

Primary KPI: Main experiment goal and most important metric likely to be moved by change

Secondary KPI: Important metric potentially impacted by experiment and should be monitored closely

Guardrail KPI: Important metrics unlikely to be impacted by experiment and should be monitored for negative surges

HORIZON x BROOKS BROTHERS

External Trends & Opportunities

HORIZON x BROOKS BROTHERS

The State Of The Industry

Shifts in Fashion Creating New Opportunities

Casualization Strong But Reversing (Hybrid / Remote work)

Weakened demand for classic suits from WFH remains but is reversing

67% of employers allow some hybrid work, but only **22%** are still fully remote

Rapid Re-sale Growth

58% of 2024 consumers willing to buy re-sale, and **68%** of people 16-21

And second-hand apparel is growing **2X** faster than the overall apparel market

Personalization

AI shopping tools are expected to contribute to **11%** of second-hand sales in 2026

Rise Of Social Commerce

19% of global e-commerce is social commerce

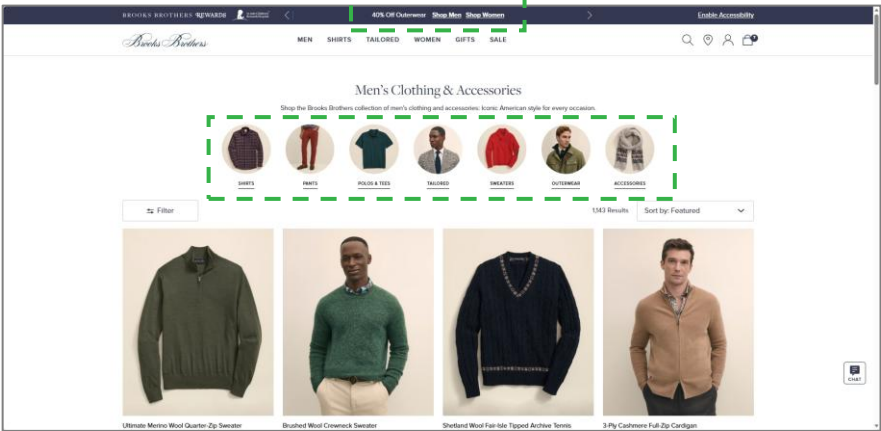

HORIZON x BROOKS BROTHERS

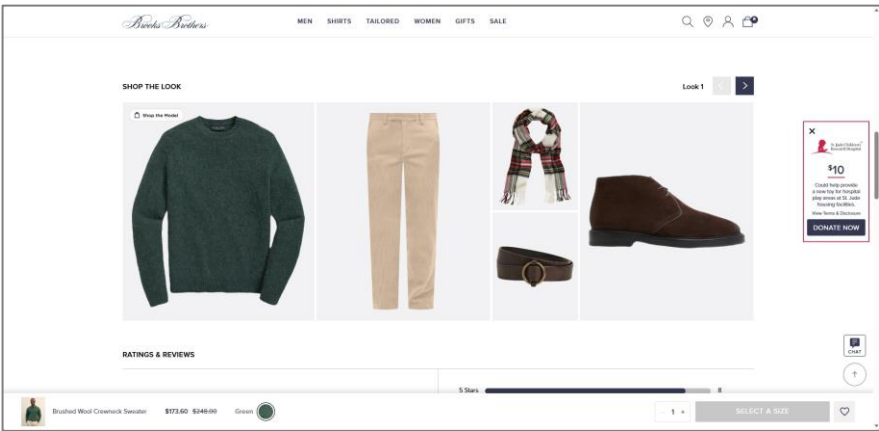

Current State Of Brooks Brothers On Recent Trends

Brooks Brothers Has Building Blocks But Could Do More

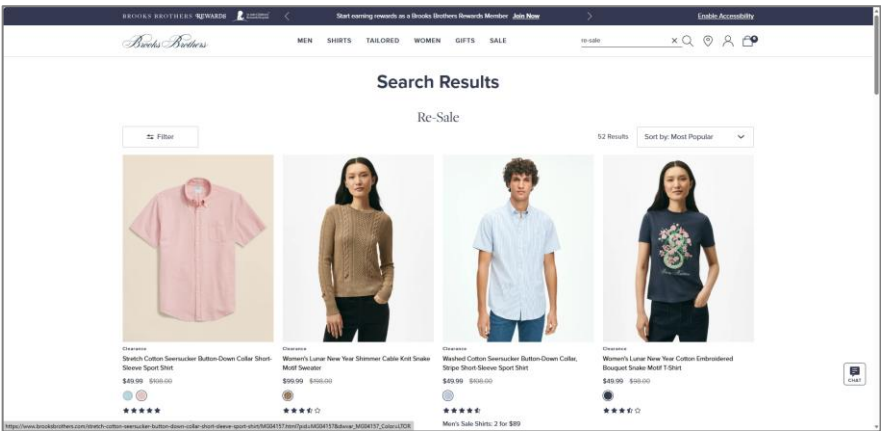

Promoting Outerwear & Casual Items

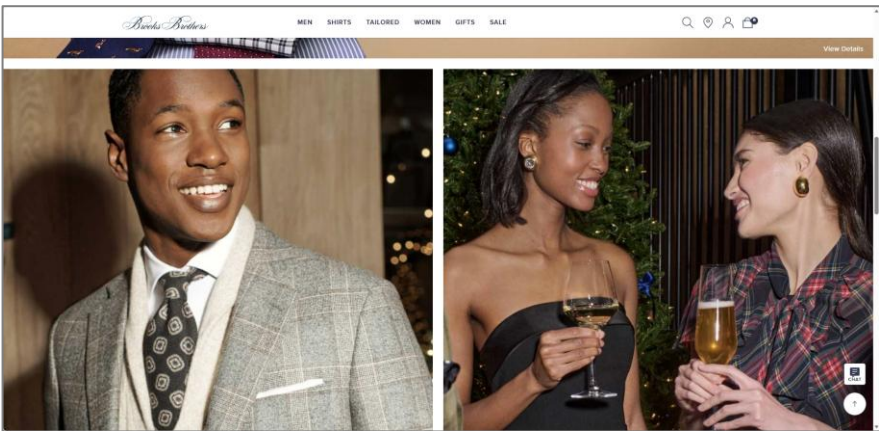

Shop The Look Modules

Clearance Offerings

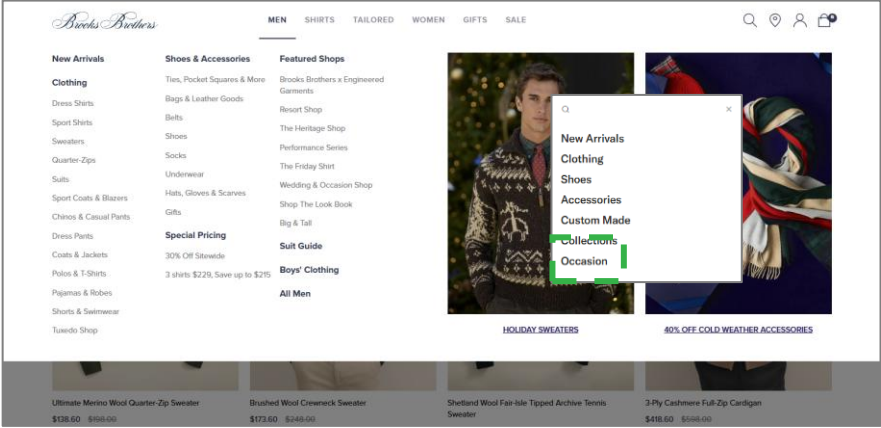

Situational Imagery On Home

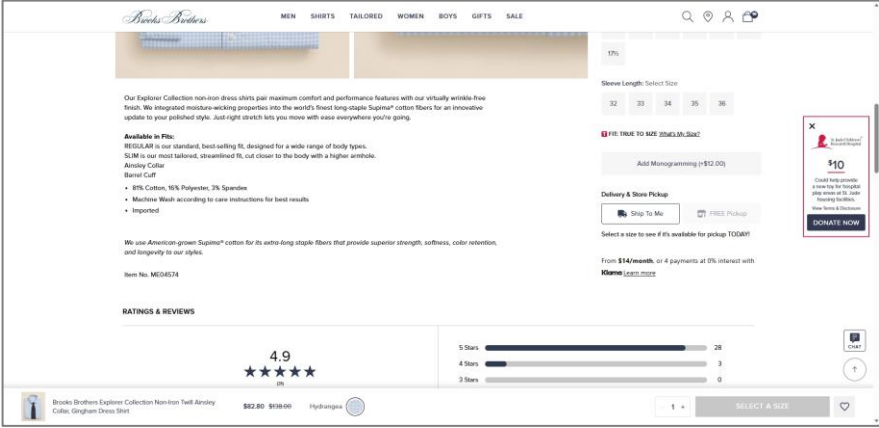

Gaps In Addressing Recent Trends

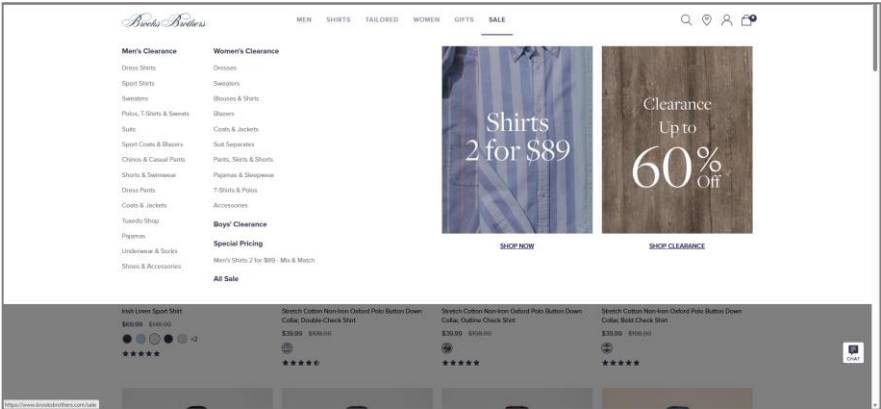

Occasion Pathing For RTO & Delayed Events

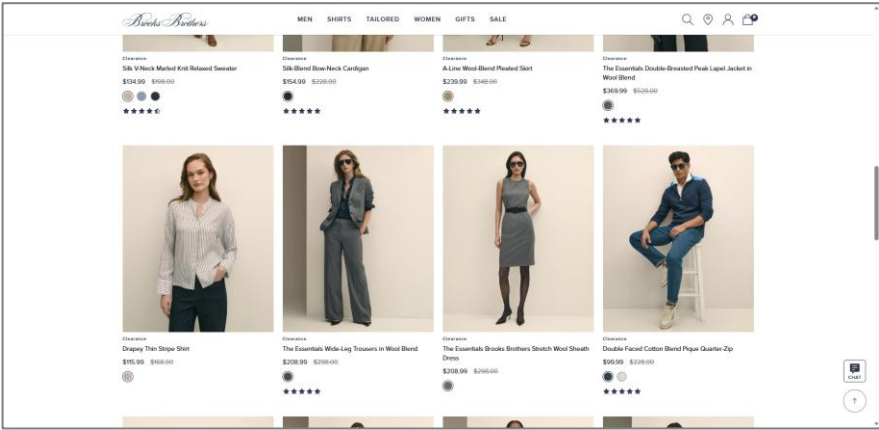

Lack Of Pairing / Cross-Sell Recs

No Re-Sale Or Sustainability Content

Lacking Situational Product Imagery / Video

HORIZON x BROOKS BROTHERS

Experience Audit & Best Practices Summary

Maximize Value Per Visit: Raising Conversions In A Tumultuous Industry

The Challenge

Improve product discovery and education to get users into the right products for them easily and communicate the value of those products

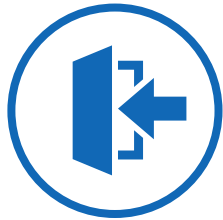

The Ask

Identify areas of opportunity that competitors or other industry leaders have already actioned as potential actions Brooks Brothers can take to improve the site

The Goal

Use external audit (with internal audit) to deliver prioritized initiatives that address opportunities on Brooks Brothers' site

How We Benchmarked Brooks Brothers Against Competitors and Category Leaders

Home:

Initial pathways and messaging that guide users into the shopping experience

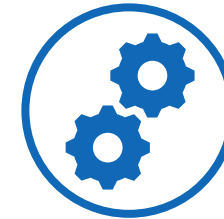

Product List Pages:

How products are presented, filtered, and grouped

Product Details Pages:

The depth of product education and related product prompts

Product Education:

Tools that help users evaluate and select the right fit

Checkout Flow :

Simplicity and clarity of checkout

Our review consisted of leading retailers including J Crew, Bonobos, Ralph Lauren and Charles Tyrwhitt

Analyzing Experiences With 4 Key Themes

Product Selection

Ease of adding products to cart and promotion of that action

Product Education

Product information availability, format, and placement in flow

Personalization Practices

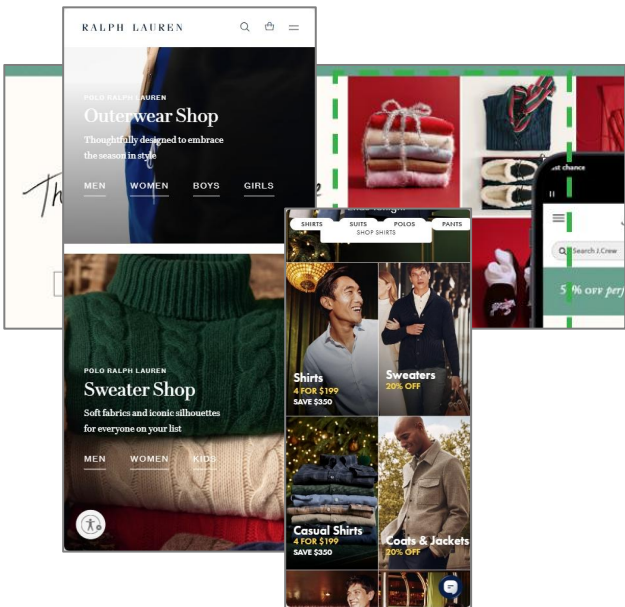

Personalization tactics and their potential for impact

Checkout Ease

Level of checkout simplicity with clearly promoted primary actions

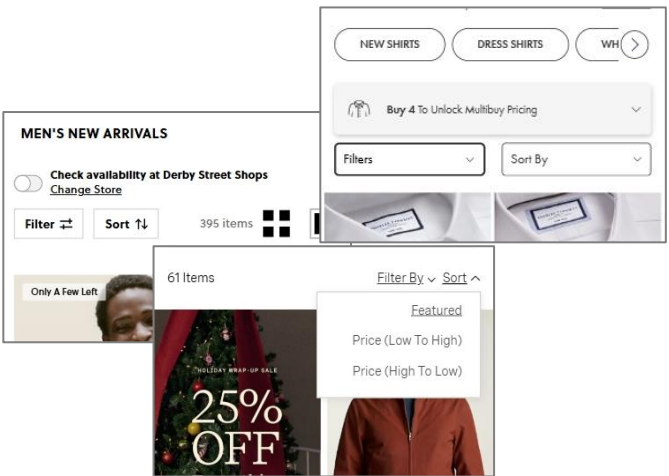

Easier Product Selection Via Promotion & Improved User Control Means Faster & Better Decisions

Casual Product Promotion

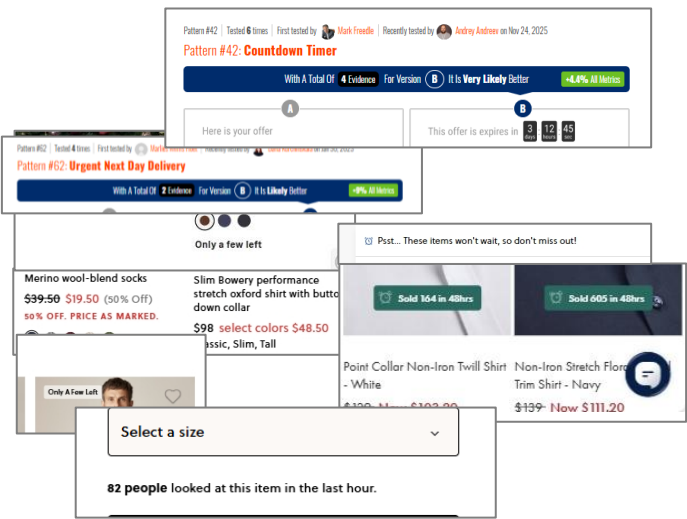

Casual and performance product type promotions trend with user needs

*Addresses casualization trend

Separated Sort & Filter

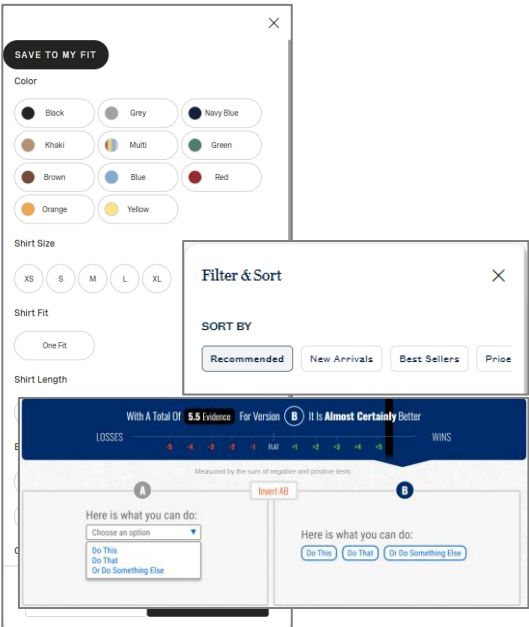

Separated functionalities reduce effort to use sort functionality

Urgency & Popularity Encourage Selection

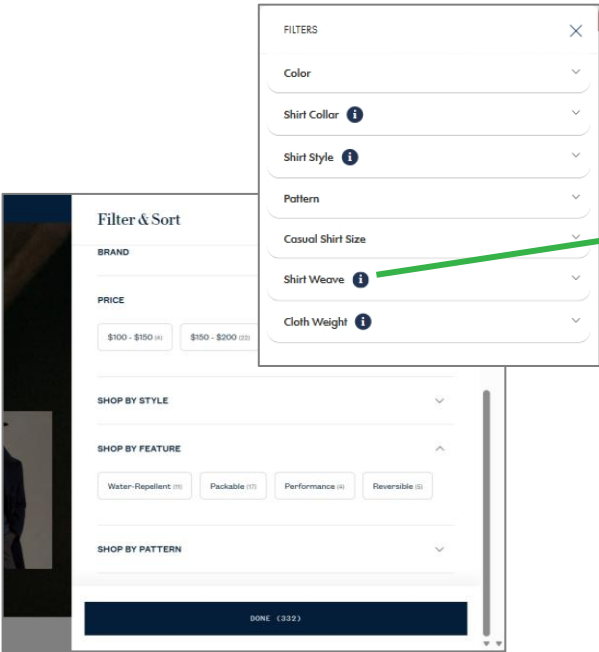

Urgency is a common and powerful retail tactic, whether it's about popularity, countdown timers or even red "Sale" text

Easily Accessible & Understandable Links & Functionality Lead To More Effective Selection

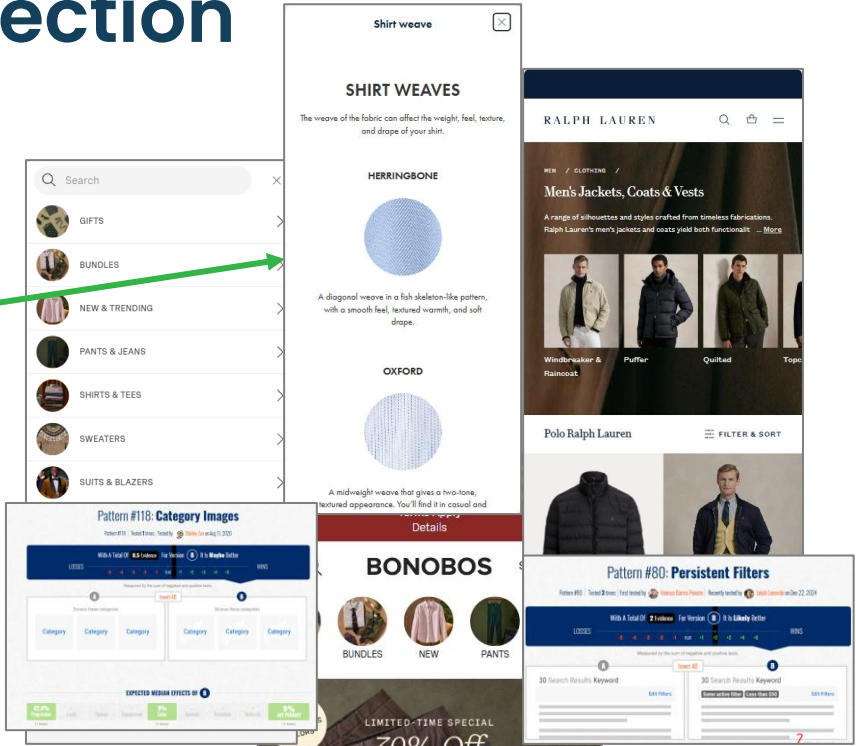

Exposed Filter Values

Presenting all values for filtering on load not only reduces effort required to use them but also shows users how 1 filter impacts others

Valuable Filter Field Additions

Important information is often not filterable or the filters are difficult to understand

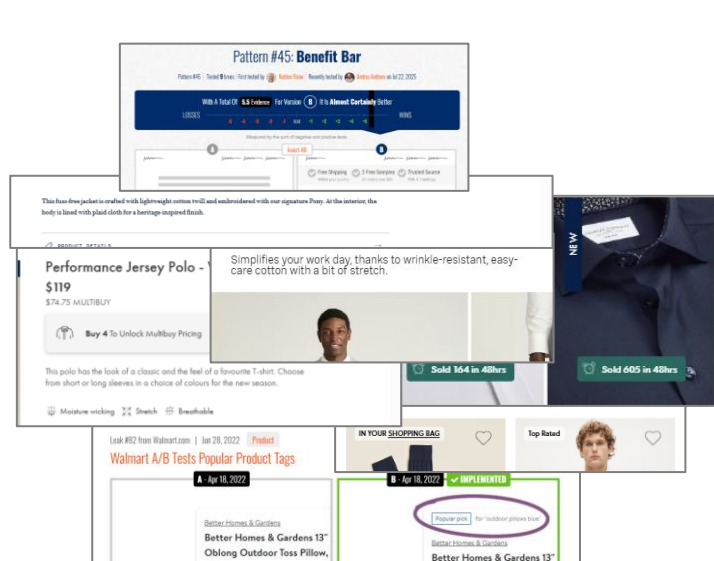

Enhanced Visual Understanding

Clothing is visual, which is why image-based filtering and displays make product selection easier

*Address social commerce trend

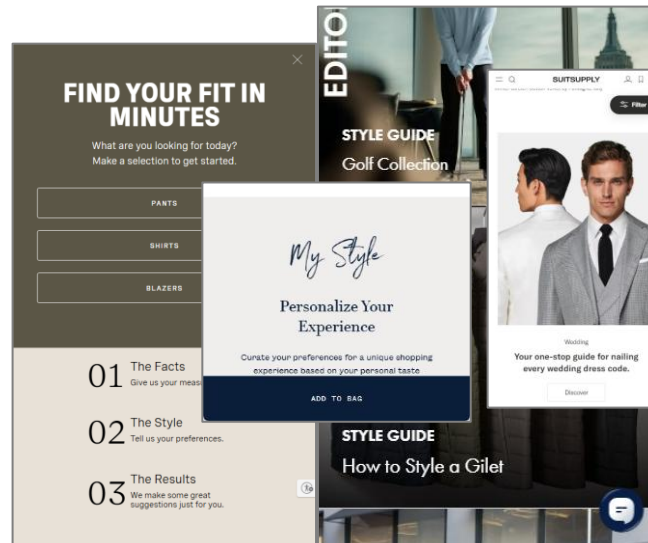

Product Education Gives Users The Confidence To Move Forward With Products Of Interest

Benefit Summaries & Info Tags

Benefit summaries concisely affirm why users should buy this product

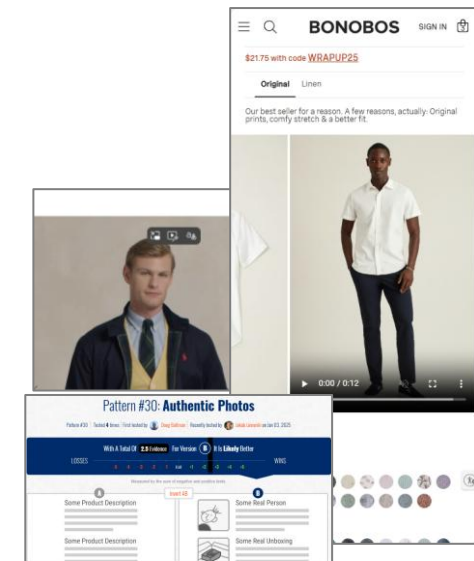

Info tags efficiently communicate information with limited real-estate & without displacing other important content / features

Gamified Learning / Filtering

Gamified learning / filtering progresses users through the funnel while collecting information to help display the best products. It also helps users move from awareness to consideration

***Addresses social commerce trend**

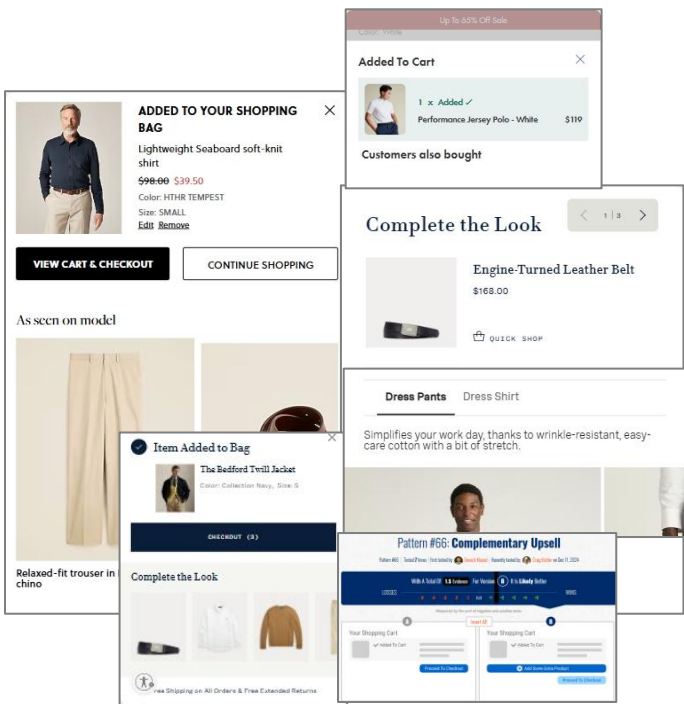

Short Form Video

Short form product videos give better view of how products look from all angles and when worn

***Addresses social commerce trend**

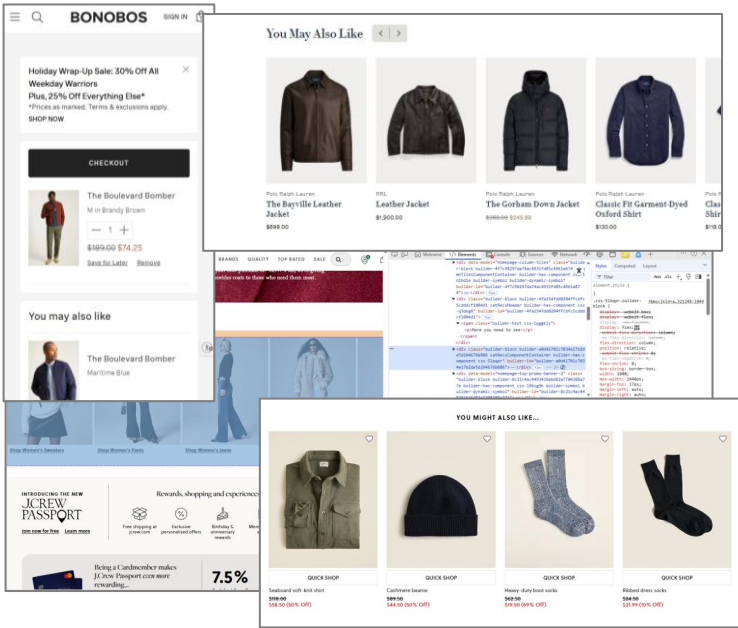

Personalized Product Recommendations Increase Cross-Sell Relevance

Product-based Personalizations

Product-based personalizations sell additional products to users who are buying for specific occasions OR like inspiration

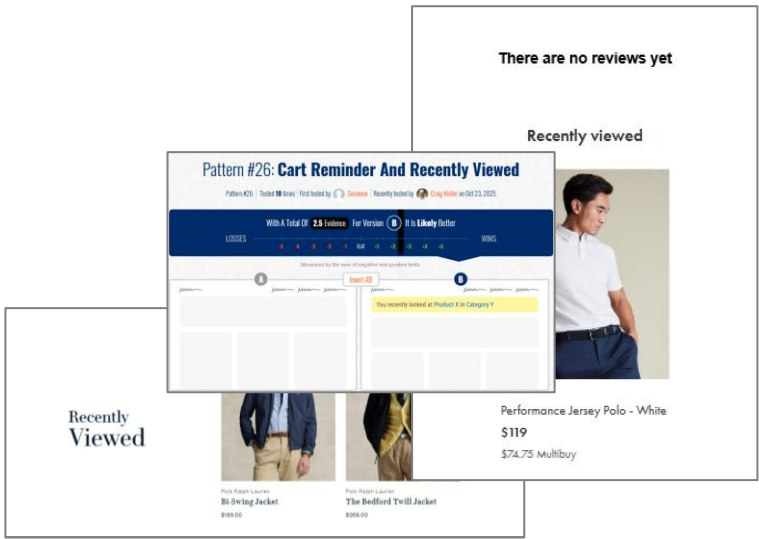

*Addresses personalization trend

Algorithmic Recommendations

Algorithmic recommendations display products based on user behavior and historic propensity for similar users to purchase

*Addresses personalization trend

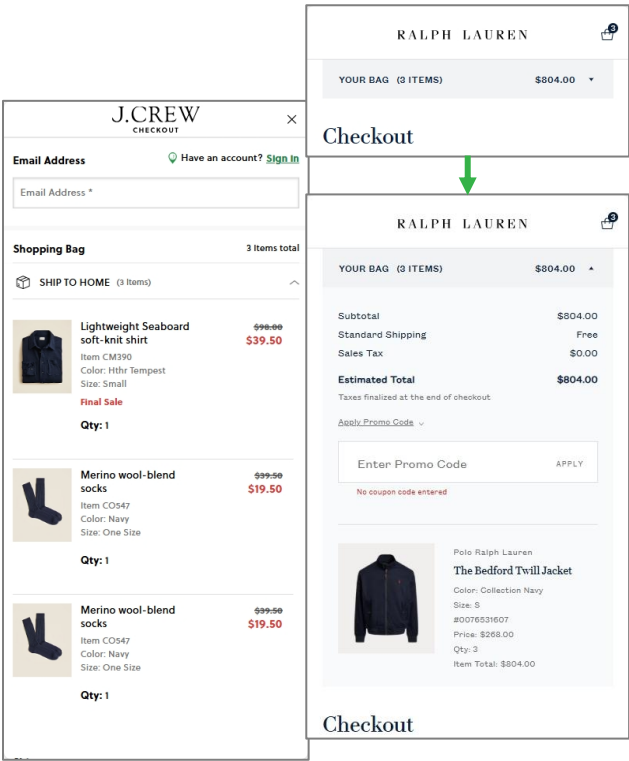

Recently Viewed

Recently viewed personalizations bring back up previously interesting products in case a quick reminder might trigger re-engagement

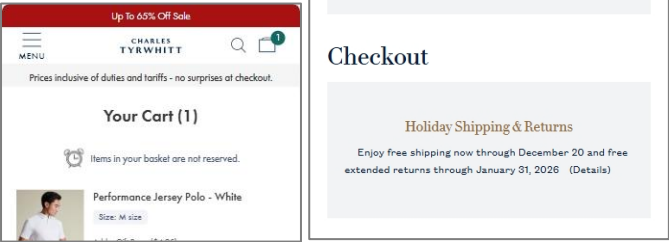

*Addresses personalization trend

In-checkout Bag Summaries & Urgency Keep Users In Flow & Motivate Immediate Action

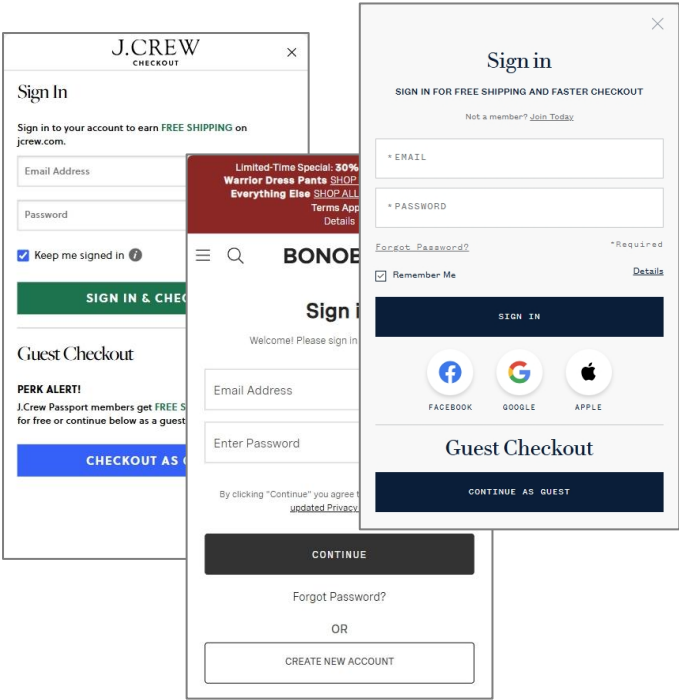

Bag Summary In Checkout

Bag summaries in checkout confirm items in cart and prices are correct to eliminate need for backtracking

In-Cart Urgency

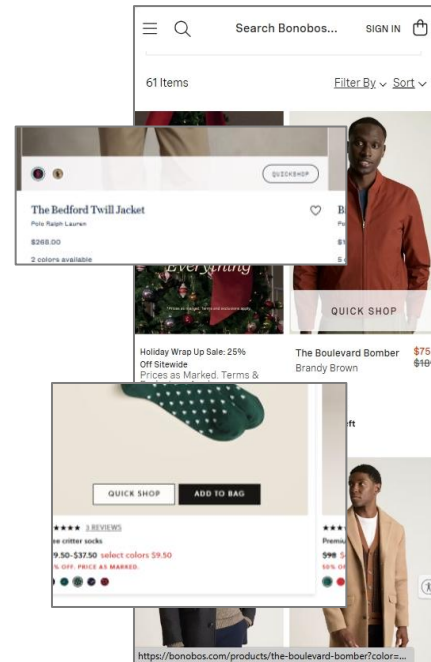

Urgency messages encourage action for fear of lost opportunities

Stand-alone Sign In

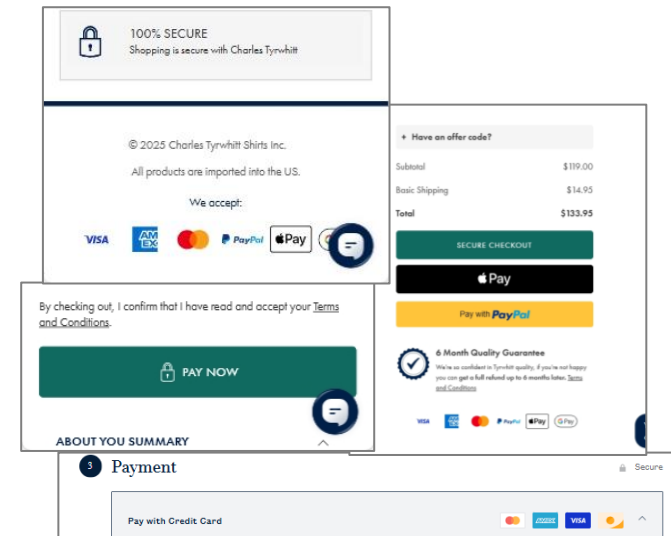

A stand-alone sign-in page emphasizes valuable accoutn creation while removing need for sign in during form fill

Reassurances Via Lower Commitment CTAs and Secure Messaging Make Progression Easier

Lower Commitment CTA Language

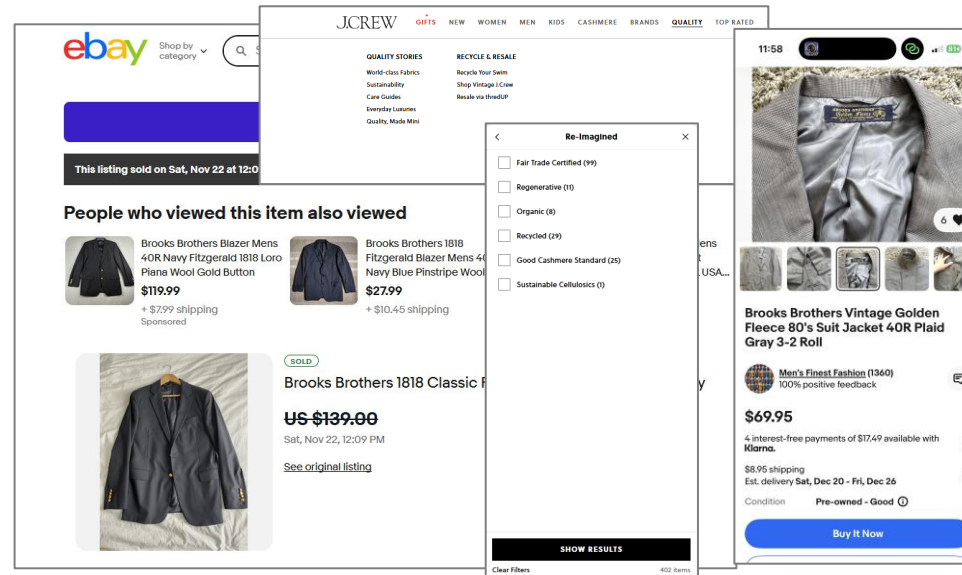

Lower commitment TA language makes progression easier, building commitment toward eventual purchase

Secure Payment Messaging

Secure payment messaging is an easy way to make users feel safe on your site

Re-Sale Programs Or Even Green Labels Capitalize On Modern Trends

Re-sale Content & Opps

Re-sale trends can be addressed via re-selling but also via environmentally friendly labelling and filtering. If Brooks Brothers products are going to be re-sold, Brooks Brothers should take part in those profits

*Addresses re-sale trend

Best Practices Support Brooks Brothers' Digital Experience Optimization

Exposed Sorting & Filtering

Separating sorting & filtering grants easier access to sort feature and exposing filter options makes that too more usable too

Sort & Filter Enhancements

Adding important values, describing confusing fields and ensuring users are aware of current view

Concise Benefits

Benefits summaries and product info tags communicate value without overwhelming users or displacing valuable content

Urgency In Selection & Checkout

Urgency encourages immediate action for fear of lost opportunities

Checkout Confidence

Affirming user choices in checkout enables confident progression without backtracking

Personalized Recommendations

Personalized recommendations display relevant products to increase AOV

Market Trends Identify Underutilized Growth Opportunities

Casual Product Discoverability

While formal attire is Brooks Brothers' brand, increasing discoverability of casual products may be beneficial

Short Form Video

Short form product videos give better view of how products look from all angles and when worn. They also appeal to an increasingly important social media audience

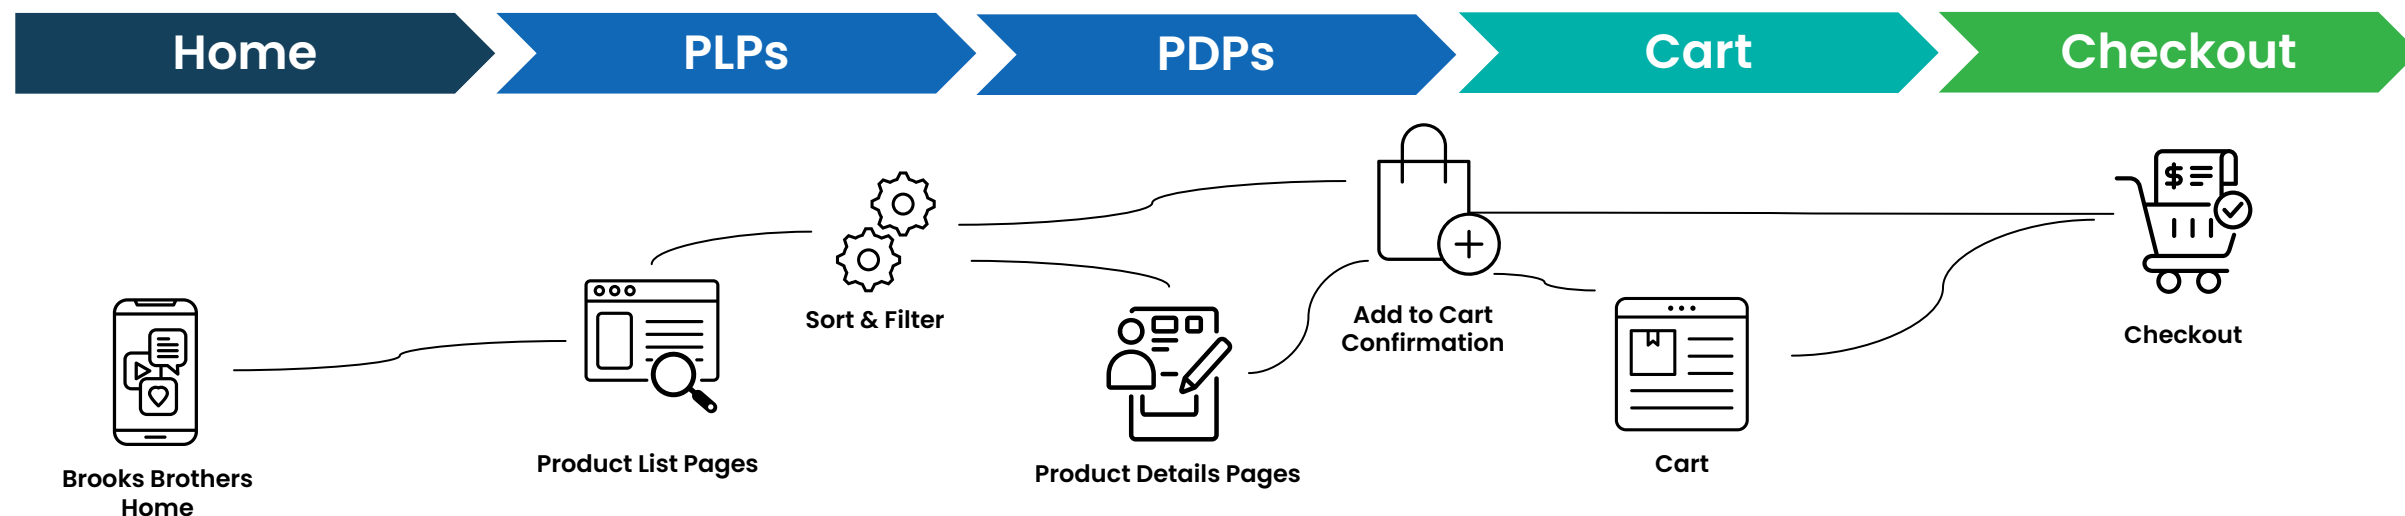

Re-Sale Content

Re-sale trends can be addressed via re-selling or environmentally friendly labelling and filtering. If Brooks Brothers' products are re-sold, Brooks Brothers should enjoy those profits

Gamified Learning & Occasion-Based Guidance

As RTO picks up and event frequency increases, style guides and gamified fitting goes from fun to valuable

Mapping The Customer Journey For Improved Purchase Rates & AOV

Awareness

- Home is where users discover Brooks Brothers' brand and priorities
- The PLPs let users discover all available product categories and subcategories, product features of importance and what they should be paying for what they want

Consideration

- Once users have refined their interests, they dive into PDPs for reviews, benefit details and bigger images for confirmation of look
- PDPs communicate to users that they were right in their initial assessment by readily providing all necessary details and customization options

Intent

- Once users know what they want, they add that product to cart. This is an opportunity to capitalize on intent by selling in complementary products
- A key checkout feature is also allowing users to re-affirm previous decisions without breaking up the purchase flow

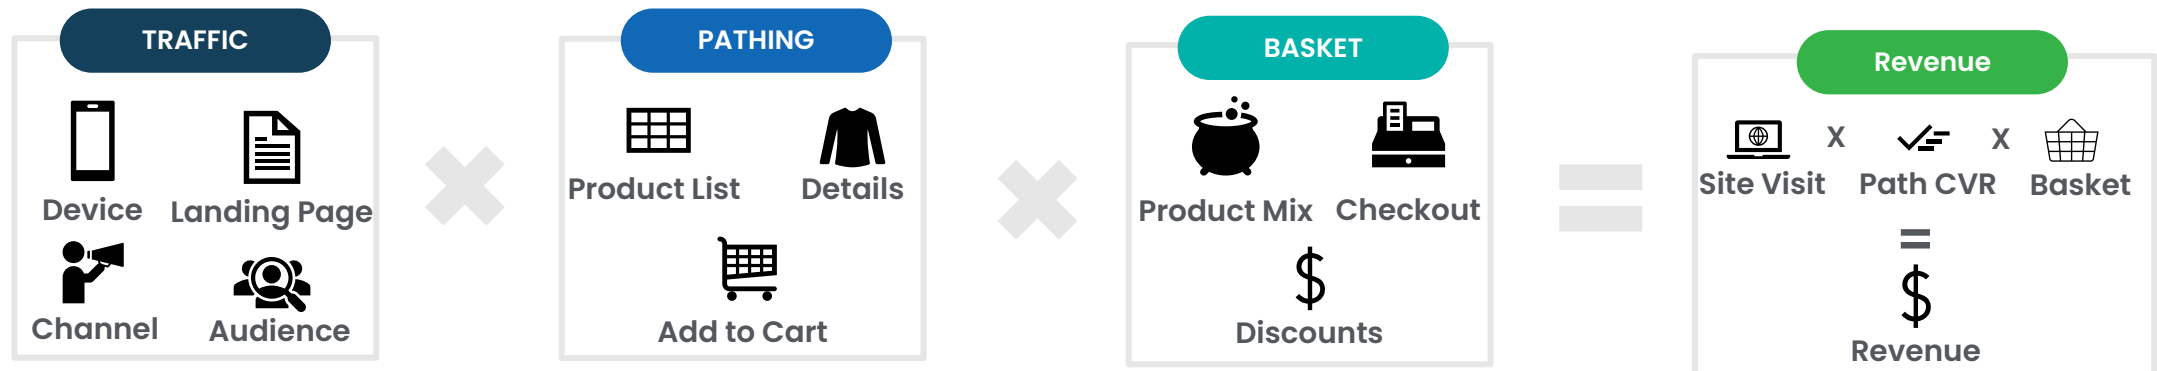

HORIZON x BROOKS BROTHERS

Purchase Journey Analysis

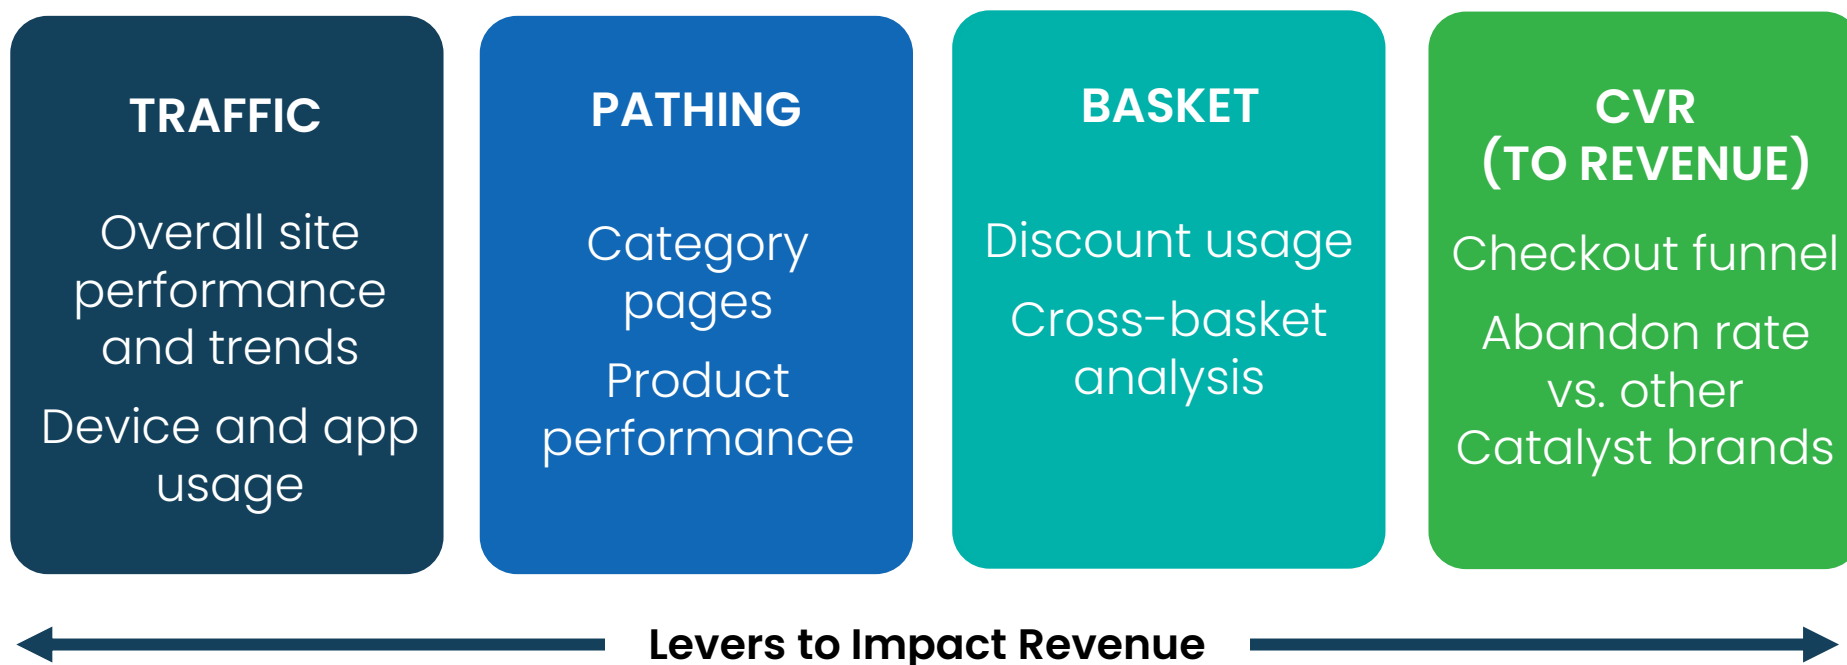

Examining the full path to purchase—from initial visit through to add-to-cart and checkout is crucial

Evaluating the purchase journey is essential for uncovering actionable insights

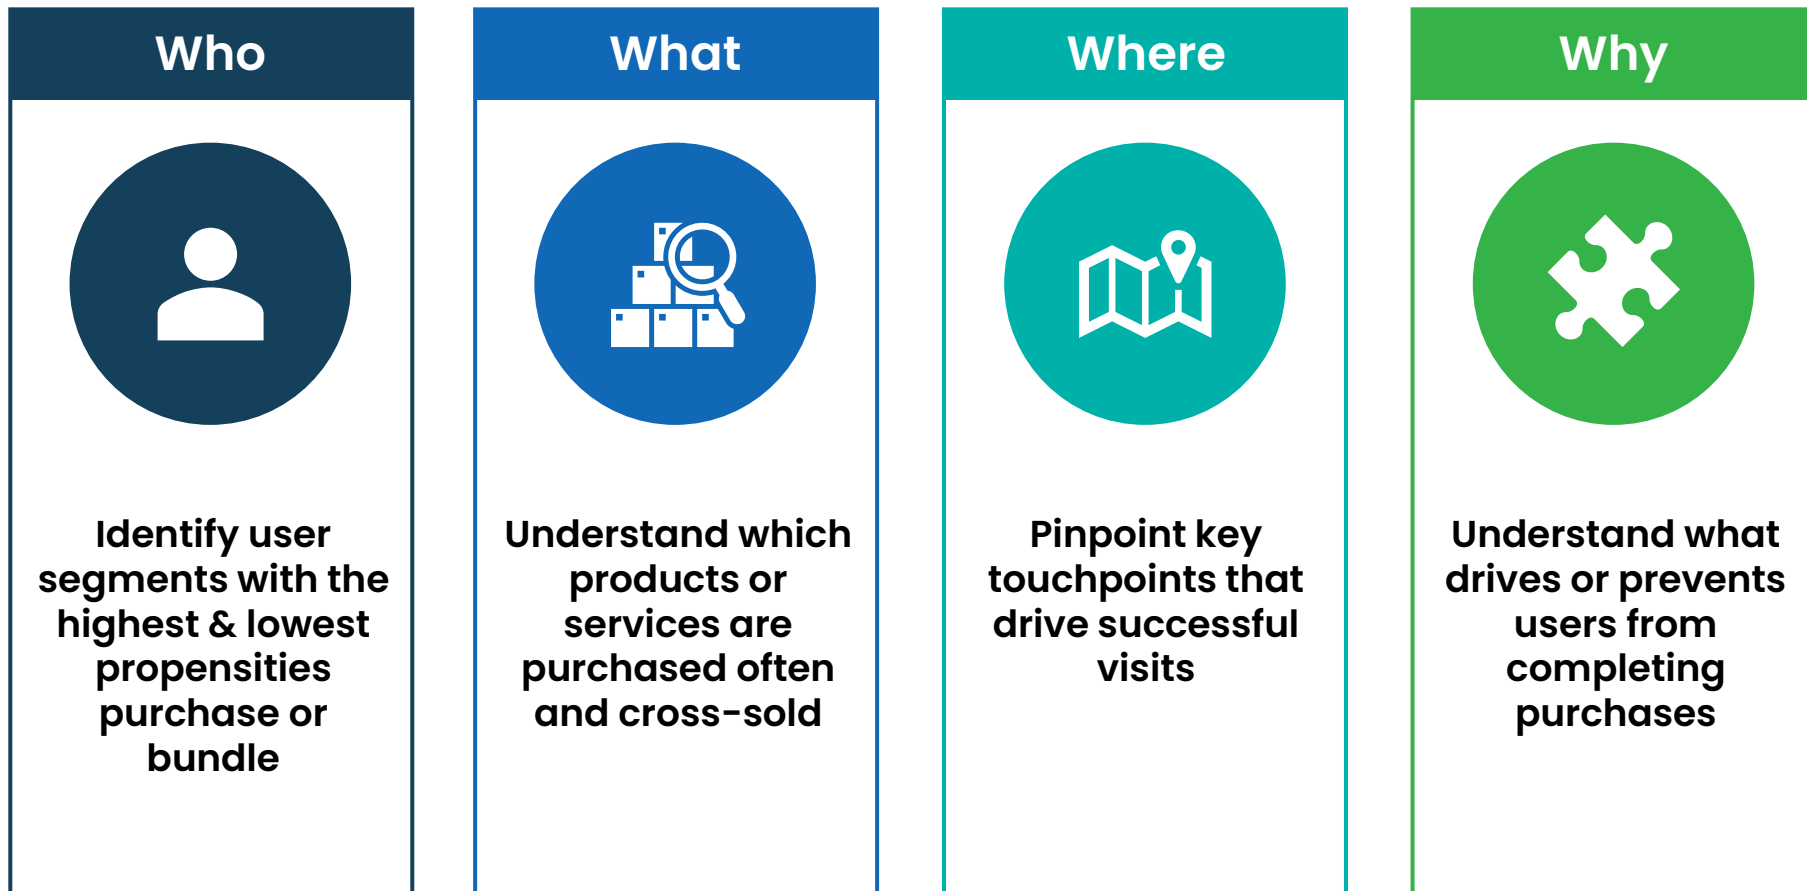

- Understand customer behavior
- Enhance the user experience
- Personalize content and engagement strategies
- Prioritize testable enhancements
- Identify opportunities to improve CVR and AOV

We evaluated every step of the purchase path in an analysis to identify findings for improvement

What We Looked for: Behavioral Signals Behind Higher RPV

**The impacts we anticipate:
improvements could drive \$10MM+ in incremental revenue**

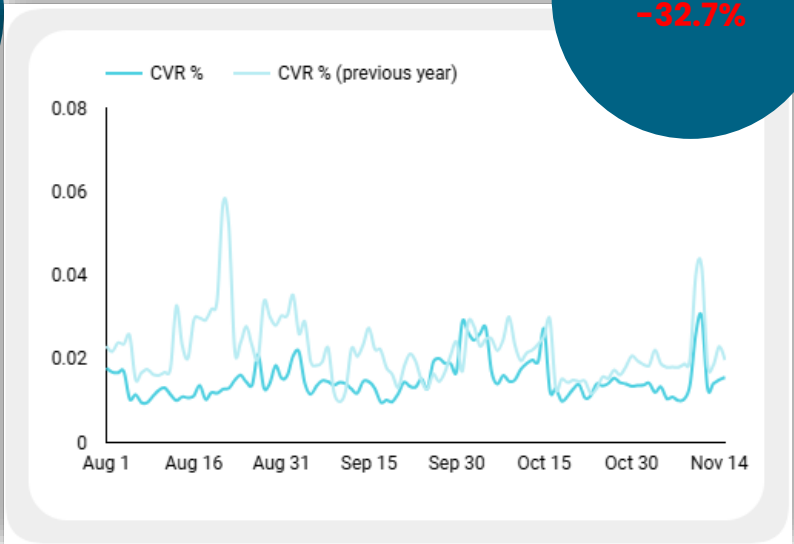

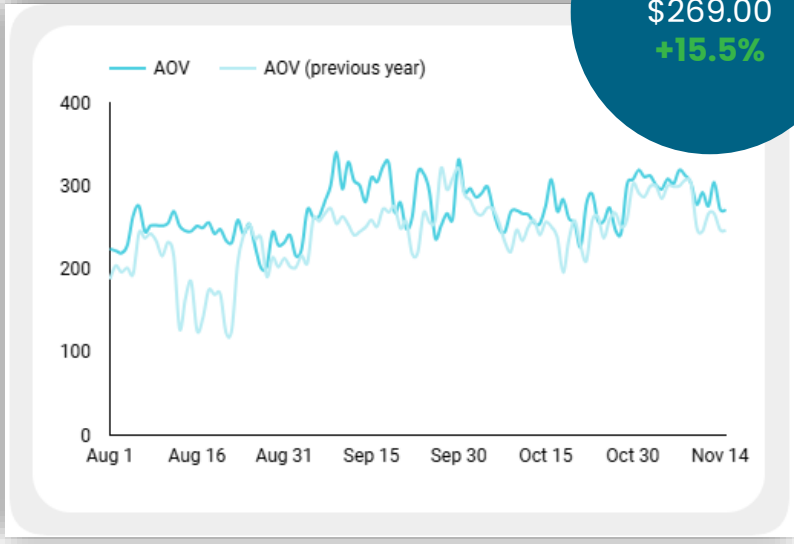

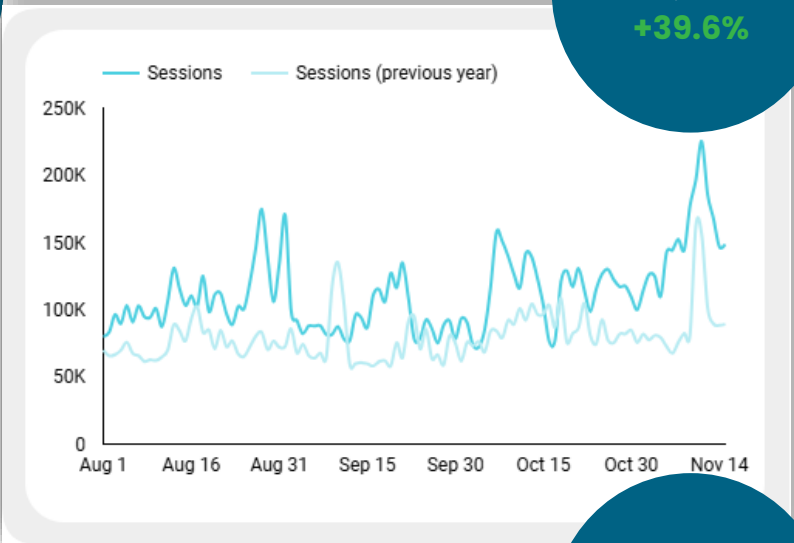

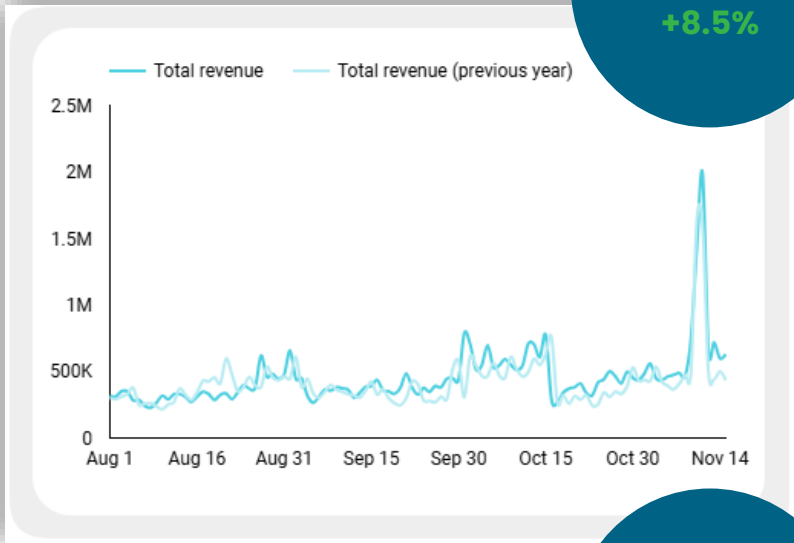

Finding Category	Opportunity Size	Proposed Change
Cross-selling/upselling in same category	\$1.9MM +	Enhance Upselling within product categories through enhanced surfacing of in category units on PDPs
Landing pages	\$1.5MM +	Test updated landing pages to send to categories from organic linking or media
Checkout optimization	\$7MM +	Clearly indicate required fields, reduce scroll on checkout and test one click payment methods
Product category optimization	\$1.1MM +	Showcase customer testimonials, awards, and endorsements earlier on home and product pages

HORIZON x BROOKS BROTHERS

Purchase Journey Performance

YoY revenue growth has been driven by increased traffic—further gains will come from improving conversion rates

Social & Search Channels Outpace Display & CRM And Overall CVR Falls As Social Volume Increases

High Intent Return Visits Decrease In CVR

- High RPV in Email and SMS demonstrates intent, but declining performance indicates opportunities for CRM work or on-site personalization
- Great success in paid social as the highest traffic channel demonstrates a need for broad appeal to those users

	Channel	Sessions	% Δ	Revenue ▾	% Δ
1.	Paid Search	1.5M	17.3% ↑	\$11.36M	41.4% ↑
2.	Direct	2.4M	90.4% ↑	\$8.04M	38.7% ↑
3.	Email	1.6M	10.2% ↑	\$7.23M	-6.3% ↓
4.	Organic Search	972.7K	26.0% ↑	\$4.69M	-1.9% ↓
5.	Paid Social	2.3M	87.0% ↑	\$2.31M	46.9% ↑
6.	Paid Affiliate	133.3K	22.6% ↑	\$1.58M	34.3% ↑
7.	SMS	349K	-55.3% ↓	\$1.38M	-72.1% ↓
8.	Unassigned	240K	167.8% ↑	\$673.37K	-16.0% ↓
9.	Display	277.2K	17.5% ↑	\$309.88K	-54.1% ↓
10.	Referral	46.4K	-2.5% ↓	\$306.25K	148.7% ↑

Channels On The Rise

- Paid social sessions and revenue grew 87% and 47%. Brooks Brothers can appeal to those users with situational imagery, short form video & gamified personalization
- Paid search was the largest driver of revenue. Enabling fast down-funnel progression can help high intent users

Channels Looking For Improvement

- While email still performs well, a wealth of data (typically in email platforms) can be used to further optimize the experience and make up for the backslide
 - Take it a step further with strategic auditing
- Clear decline in display indicates lack of channel alignment. Creative and audience auditing could help

Overall CVR Decline Due To Channel Weight

- Overall CVR declines as high CVR channels like search increase 17 – 26% while social increases in volume by 87%

Increased RTO Makes Formal Attire Stickier But Casual Apparel Still Drives More Volume & Higher CVR

Formal Attire Less Impacted By CVR Drop

- Dress shirts, suits, and sport coats & blazers declined by only ~10% compared to ~25% for sweaters, coats & jackers and chinos & casual pants. This is also seen in AOV rising disproportionately to UPT
- Casual apparel still received ~7.1M views (61% of top 10 product views)

Item category		Purchase-to-view rate	% Δ	Items viewed	% Δ
1.	Sport Shirts	5.33%	-16.9% ↓	2.5M	64.3% ↑
2.	Sweaters	3.21%	-26.1% ↓	2.1M	140.3% ↑
3.	Dress Shirts	9.83%	-7.4% ↓	1.5M	55.4% ↑
4.	Polos & T-Shirts	2.96%	-51.2% ↓	906.2K	585.8% ↑
5.	Suits	1.35%	-10.2% ↓	823.7K	29.7% ↑
6.	Coats & Jackets	1.31%	-25.9% ↓	816.6K	228.9% ↑
7.	Blouses & Shirts	3.63%	-19.0% ↓	771.8K	48.6% ↑
8.	Chinos & Casual Pants	5.13%	-22.9% ↓	750.9K	35.0% ↑
9.	Dresses	1.69%	-16.3% ↓	715.4K	-14.9% ↓
10.	Sport Coats & Blazers	3.03%	-11.9% ↓	698K	21.6% ↑

Capitalizing On RTO

- Outfit and event guides help users who haven't bought formal attire for work or other events in a while (or ever)
- Enhanced PLP tooling like occasion filters or important info explanations can give users confidence to buy

Maintaining Eye On Casual

- Promoting casual apparel on pages with broad audiences, like men's apparel, is likely to engage more users

Over 60% Of Cross-Sells Occur Within The Same Category And Most Are Tops

Same Product Need But Want Variety

- Many multi-product purchasers are buying multiples of the same product. They have a single need but need iterations to address variety and use frequency
- Could be addressed with recently viewed, frequently bought with or recommendation-based cross-sells

High PDP Drop-Off

- PDPs are the inflection point between purchase and exit. This is where users formalize decisions and conduct most in-depth research.
- Maximizing information accessibility without overwhelming users should move the needle

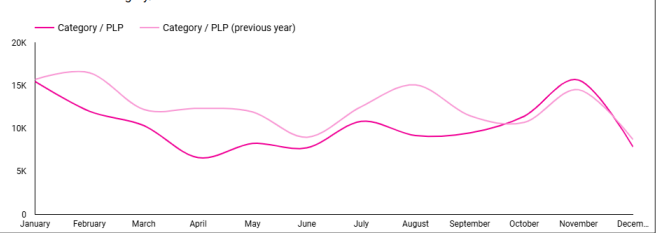

PLP CVR Being Lower On Brooks Brothers Than Other SPARC Brands Demonstrates opportunity

PLPs Below Benchmark

- Brooks Brothers’ Product View Rate and ATC From PLP Rate are the lowest of any SPARC brands and declined YoY

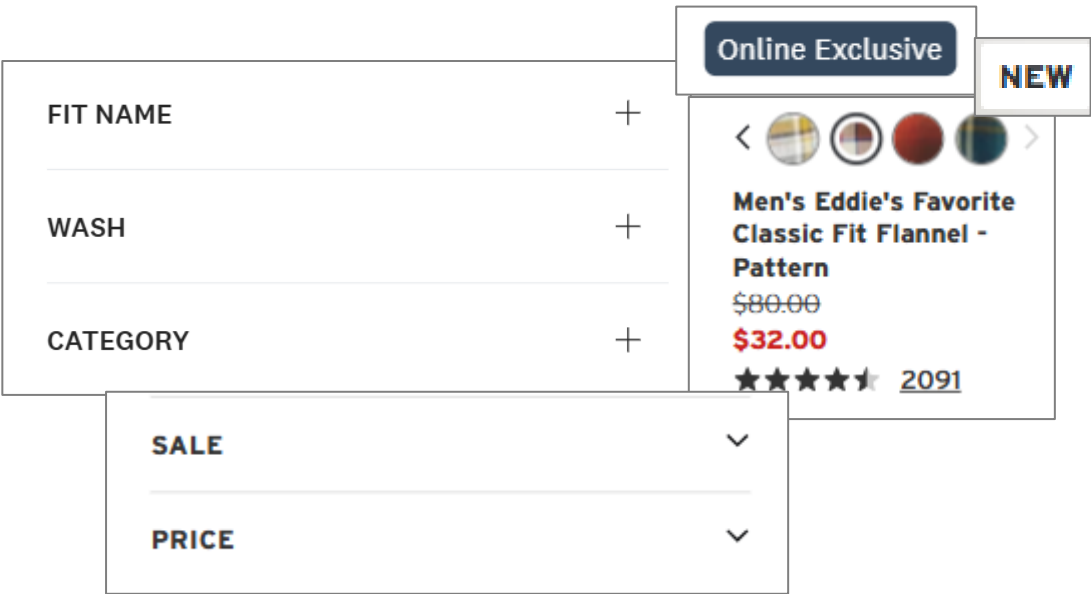

Brand	Product View Rate	ATC Rate from PLP
	51.8%	0.27%
LUCKY ♣ BRAND	61.1%	0.69%
NAUTICA	55.6%	0.32%
AÉROPOSTALE	53.9%	0.98%
EDDIE BAUER 	69.8%	

Add to Cart from Category/PLP

Informative Approach

- Taking a more informative approach by bringing product content onto PLPs may motivate further research
- Clearer directives to PDPs with the promise of greater detail could push users to interact

PLP, Home & Checkout Remain Relevant Due To Combination Of Volume & Intent

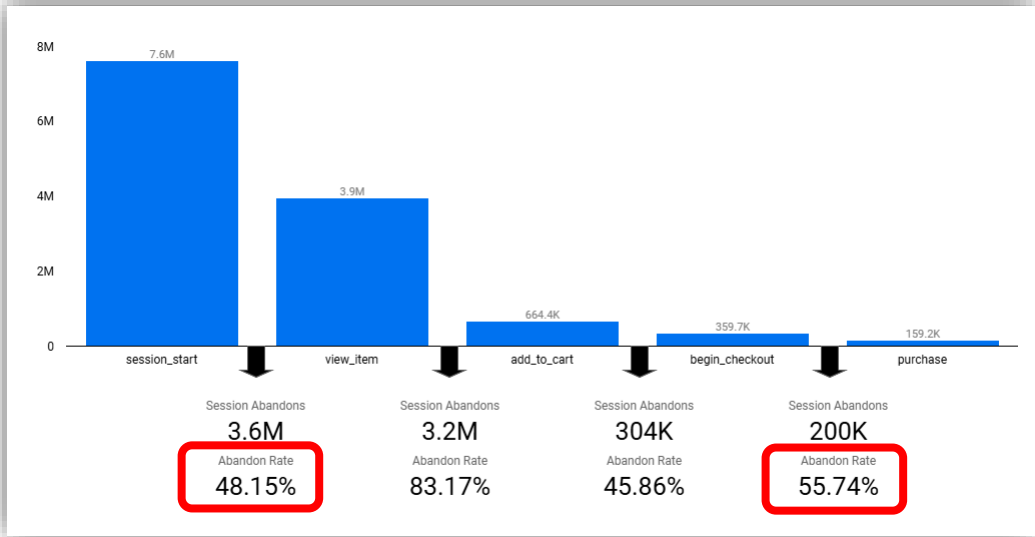

High Home & Checkout Intent

- PLPs also receive substantial traffic, especially on mobile
- While Home and the checkout flow lack user volume, high CVR makes these pages important drivers of transactions

	Device category	Landing Page Page Type	Sessions	Engaged sessions	Transactions	Purchase CVR	AOV

~50% Drop-Off Down-Funnel

- Despite high intent at checkout, over 50% of users still exit, indicating end of funnel friction, loss of interest or inability to re-affirm choices

Key Learnings & Actions To Influence High Order Volume & Value

Who

Search & social users are massive groups.

Search users perform but social struggles despite 2025 progress.

Create more specific and usable sort & filter with quick ATC and checkout flows for search.

Appeal to social users with short form videos and gamification.

What

Users are buying formal attire as RTO and events rise but casual apparel remains top of mind.

Tops, notably dress & sport shirts are common cross-sells.

Outfitting guides help users who struggle buying formal attire.

Enhanced PLP tooling like occasion filters or info drilldowns give users confidence to buy.

Where

PDPs are a significant decision point, but all major site sections are areas of opportunity.

Maximizing PDP info without overwhelming reduces drop-off.

Clearer upper funnel directives with promises of greater detail push users to interact.

Removing reasons to exit checkout keeps users in flow.

Why

Users drop-off throughout the funnel because they don't know what they're looking for or how to figure it out / find it, they're not sure if Brooks Brothers' products are the best fit or there's checkout friction.

HORIZON x BROOKS BROTHERS

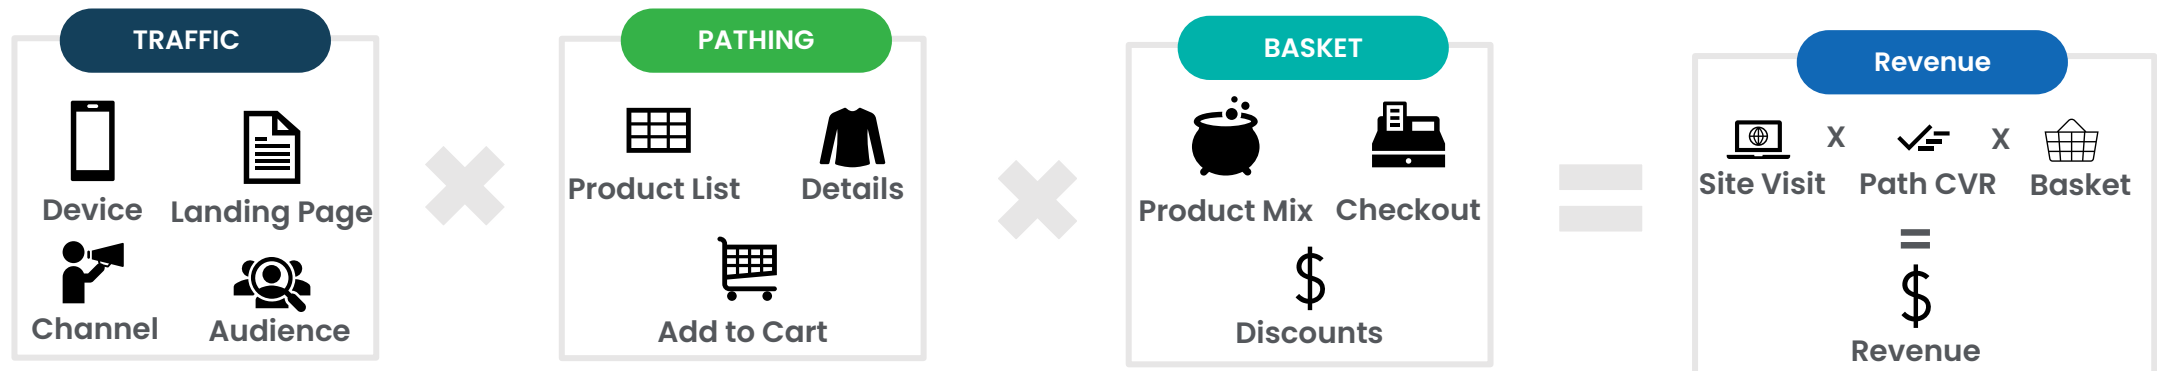

Purchase Journey

December 2025

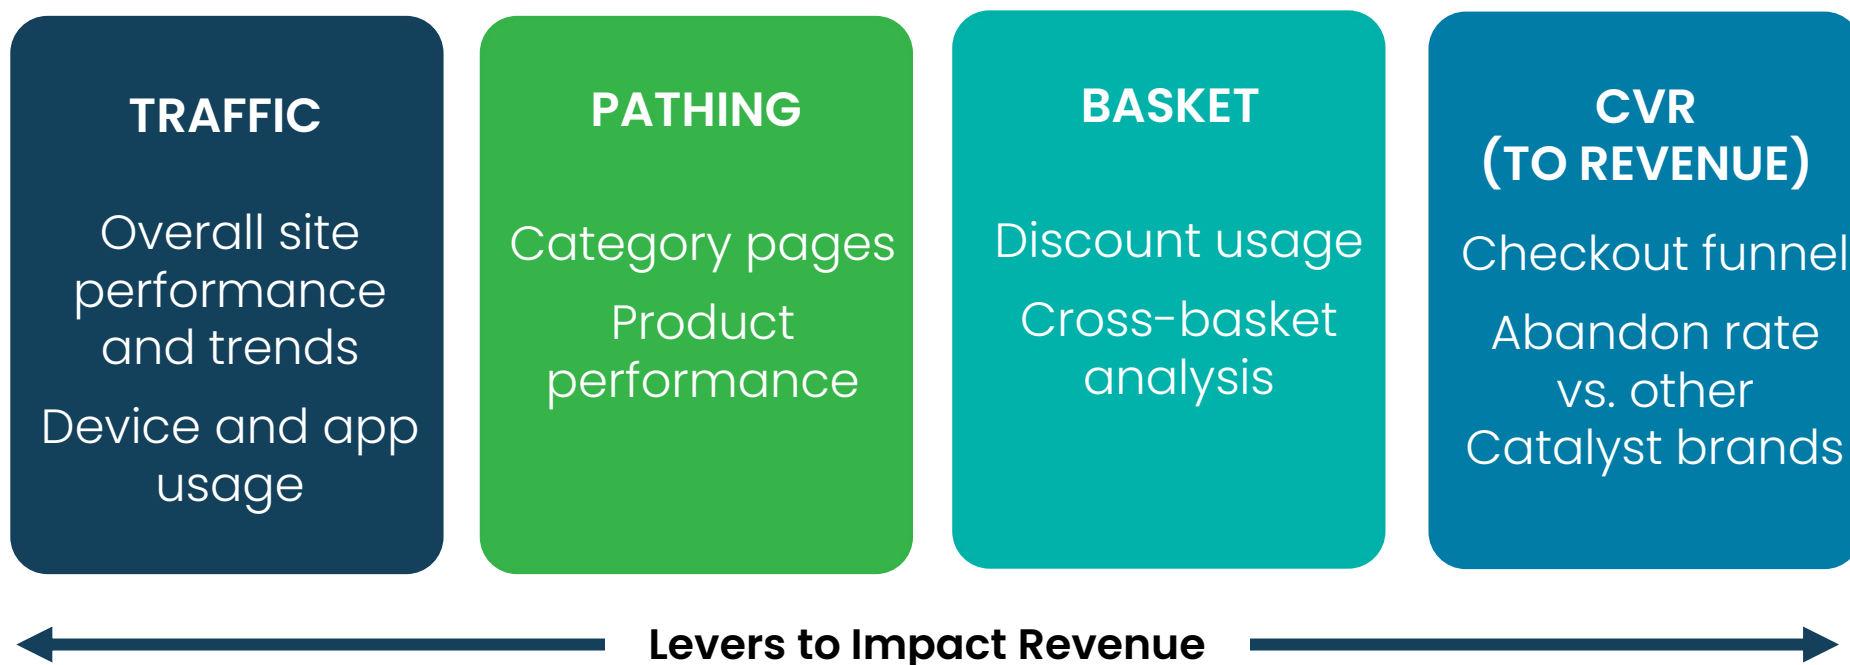

Examining the full path to purchase—from initial visit through to add-to-cart and checkout is crucial

Evaluating the purchase journey is essential for uncovering actionable insights

- Understand customer behavior
- Enhance the user experience
- Personalize content and engagement strategies
- Prioritize testable enhancements
- Identify opportunities to improve CVR and AOV

We evaluated every step of the purchase path in an analysis to identify findings for improvement

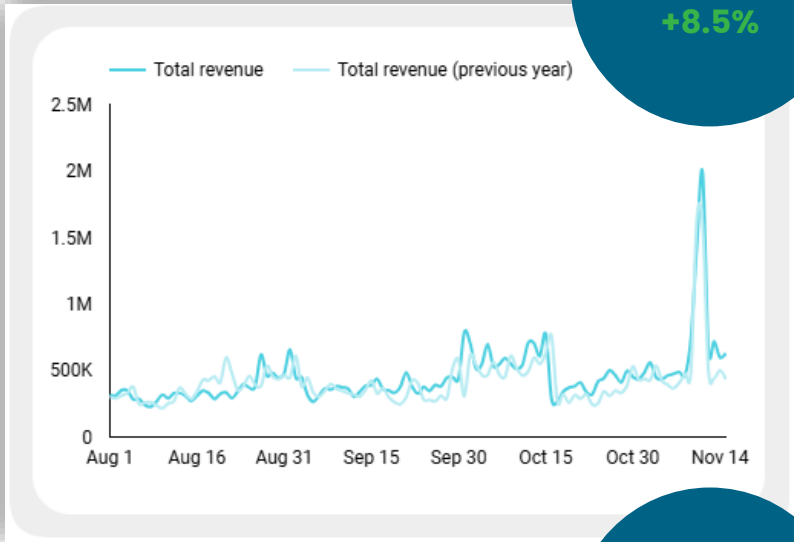

**The impacts we anticipate:
improvements could drive \$10MM+ in incremental revenue**

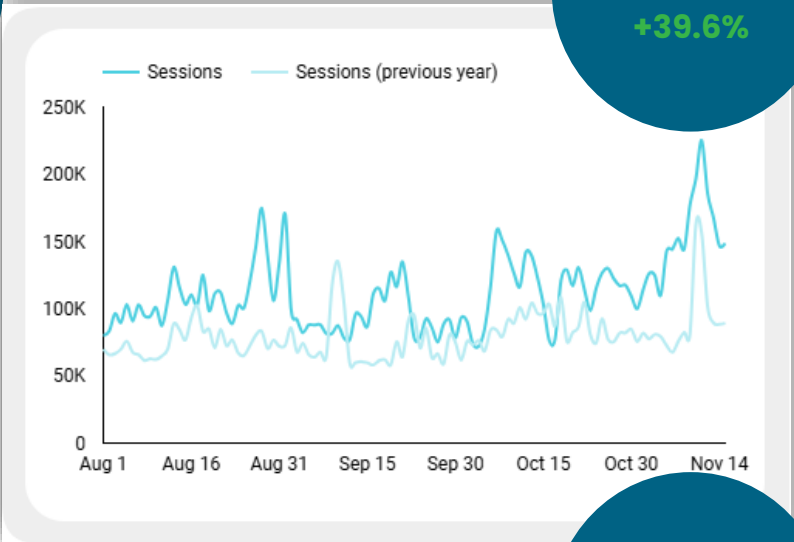

Finding Category	Opportunity Size	Proposed Change
Cross-selling/upselling in same category	\$1.9MM +	Enhance Upselling within product categories through enhanced surfacing of in category units on PDPs
Landing pages	\$1.5MM +	Test updated landing pages to send to categories from organic linking or media
Checkout optimization	\$7MM +	Clearly indicate required fields, reduce scroll on checkout and test one click payment methods
Product category optimization	\$1.1MM +	Showcase customer testimonials, awards, and endorsements earlier on home and product pages

13.	Organic Social	662	-	\$0	-

*Date range: Aug 1, 2025 – Oct 31, 2025

SMS sessions and revenue have **declined -55% and -72% YoY**

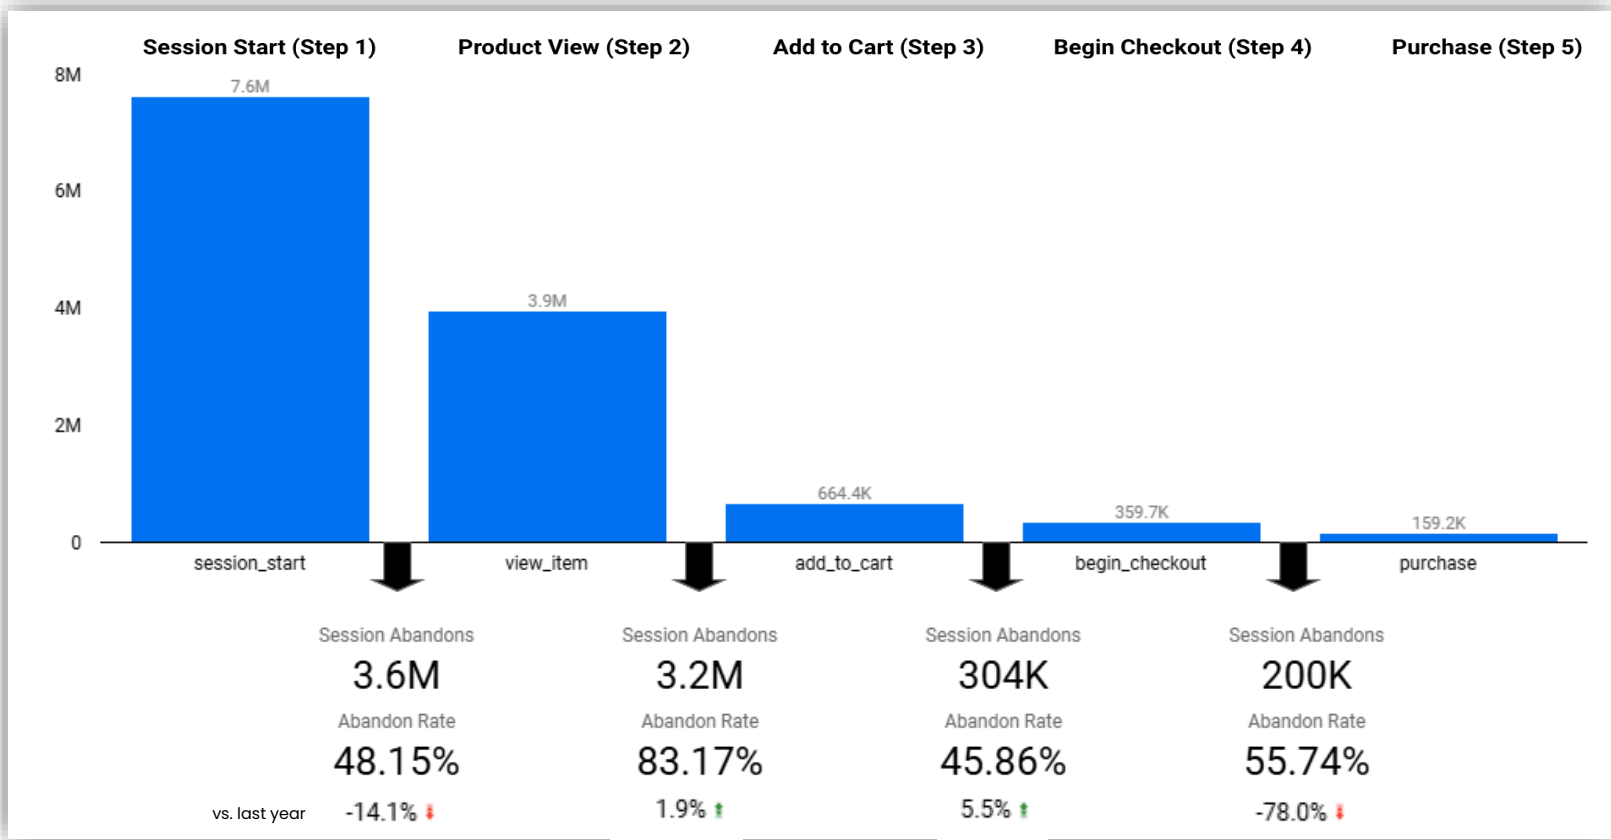

While **Email** sessions have increased +10, revenue has decreased -6%

Optimization Opportunity: Conduct a CRM strategy audit to identify opportunities to boost performance in owned channels

Display sessions grew 17% YoY but **revenue declined -54%**

Optimization Opportunity: Evaluate Display targeting quality, align creative, segmentation, and landing pages to improve conversion effectiveness.

Determining where we can reduce drop-off will improve UX

*Date range: Aug 1, 2025 – Nov 15, 2025

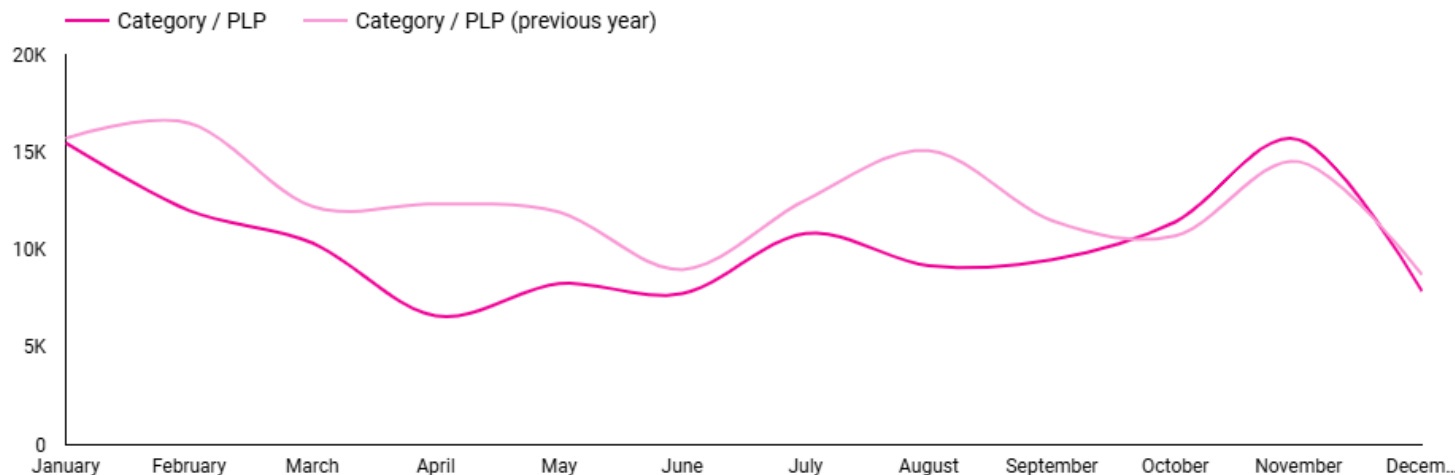

Brooks Brothers has an overall CVR of 1.48%, which is **below average** compared to other brands

Path analysis identified opportunities to optimize landing pages, product view progression, and cart/checkout abandonment

Optimization Opportunity: Focus optimization on areas of under performance relative to benchmark and other brand performance

Add-to-cart activity from category pages declined YoY before recovering late in the year

Add to Cart from Category/PLP

Optimization Opportunity: Focus optimization on strengthening Category/PLP to cart progression earlier in the year

Add-to-cart volume from category pages trailed last year for most of the year, indicating weaker mid-funnel engagement and reduced progression from browsing to purchase intent.

The gap narrows in Q4, suggesting **seasonality and promotions** helped offset underlying category-level friction rather than fully resolve it.

Brooks Brothers product view rate falls 8% below the average brand rate of 60%

Brand	Product View Rate
	51.8%
LUCKY ♣ BRAND	61.1%
NAUTICA	55.6%
AÉROPOSTALE	53.9%
EDDIE BAUER 	69.8%

Increasing product view rate to **60%** could generate 28,356 additional orders and **\$7.6 million in incremental revenue**

In a best-case scenario, boosting the rate to **68%** could yield 56,178 additional orders and **\$15 million in incremental revenue**

Optimization Opportunity: Test product category optimization

*Date range: Aug 1, 2025 – Nov 15, 2025

Product Listing Pages are underconverting to ATC

Brand	ATC Rate from PLP
 <i>Brooks Brothers</i>	0.27%
LUCKY ♣ BRAND	0.69%
NAUTICA	0.32%
AÉROPOSTALE	0.98%

Brooks Brothers' PLP ATC rate of 0.27% is meaningfully lower than peer benchmarks, indicating that a large share of **high-intent browsing traffic** is failing to take a decisive product action.

This behavior increases **funnel inefficiency** and places unnecessary pressure on PDP and checkout performance to compensate for early-stage drop-off.

Optimization Opportunity:
Test product category optimization

*Date range: Aug 1, 2025 – Nov 15, 2025

Mobile entry through category pages balances scale and purchase quality

	Device category	Landing Page Page Type	Sessions ① ▾	Engaged sessions ② ▾	Transactions	Purchase CVR	AOV
1.	mobile	Product Detail Page	3.4M	1.9M	31.3K	0.92%	\$220.24

3.	mobile	Homepage	1M	779.3K	24.1K	2.31%	\$272.04
4.	desktop	Product Detail Page	916.3K	640.3K	18K	1.96%	\$261.25
5.	desktop	Homepage	800.8K	638.6K	37.9K	4.74%	\$322.42
6.	desktop	Category / PLP	666.6K	528.9K	21.1K	3.16%	\$275.28
7.	mobile	Other	537.1K	291.3K	3.8K	0.71%	\$242.99
8.	desktop	Other	447.4K	354.6K	3.9K	0.88%	\$267.77
9.	tablet	Product Detail Page	137.5K	79.2K	1.4K	1.02%	\$223.11
10.	mobile	Checkout / Account	127.4K	70.3K	7.9K	6.23%	\$249.81
11.	tablet	Other	84K	70.6K	161	0.19%	\$276.61
12.	desktop	Checkout / Account	80.4K	58.1K	8.9K	11.03%	\$299.21
13.	tablet	Category / PLP	80.1K	56.1K	983	1.23%	\$239.13
14.	tablet	Homepage	43.9K	33.4K	1.5K	3.49%	\$282.21
15.	mobile	Search	38.7K	19.5K	603	1.56%	\$259.31

While PDPs drive the highest mobile session volume (3.4M sessions), **category landings** combine strong engagement (1.1M engaged sessions) with higher purchase efficiency (1.00% CVR), **outperforming PDP-first entry.**

Homepage entry converts best but lacks scale relative to category traffic. Mobile homepage landings show the highest CVR (2.31%) and AOV (\$272), but generate **nearly half the sessions of category pages**, limiting their overall revenue impact compared to category entry paths.

Optimization Opportunity: Prioritize mobile category experiences to convert high-volume traffic more efficiently.

High traffic growth categories are underperforming in conversion

Traffic is growing faster than conversions

Despite rising interest, overall conversion efficiency is declining, indicating **a widening gap between interest and conversion.**

Optimization Opportunity:

Enhance PDP experience and merchandising for high-visibility, low-conversion categories by improving product detail content, price positioning, and onsite visibility.

Item category	Purchase-to-view rate	% Δ	Items viewed	% Δ	Items added to cart	% Δ	Item revenue	% Δ	Items purchased	% Δ	Item unit price	% Δ

Bottlenecks: Path Drop offs

High-intent categories are losing users early in the journey

Despite strong purchase efficiency, steep drop-offs at the view → add-to-cart step, **signals hesitation before commitment rather than issues at checkout**

Optimization Opportunity:

Reduce mid-funnel friction by improving fit clarity, product differentiation, and cross-category bundling.

	Item category	Purchase-to-view rate	Items viewed	Items added to cart	Item revenue	Items purchased	Item unit price

1 - 100 / 101

*Date range: Aug 1, 2025 – Nov 15, 2025

Shoppers purchase multiple items within the same category

Over 60% of cross basket items come from the same category

Cross selling is concentrated across specific categories like Dress Shirts + Chinos or Dress Shirts + Sport Shirts

Optimization Opportunity:

Test upselling like items within the same product category. Create a full cross basket matrix in Tableau and incorporate enhanced categorization

	Belts	Big & Tall	Blazers	Blouses & Shirts	Chinos & Casual Pants	Coats & Jackets	Dress Pants	Dress Shirts	Dresses	Pajamas	Pajamas & Robes	Pants, Shorts & Skirts	Pants, Skirts & Shorts	Polos & T-Shirts	Polos, T-Shirts & Sweats	Shirts	Shoes	Shorts & Swimwear	Sport Coats & Blazers	Sport Shirts	Suit Separates	Suits	Suits & Blazers	Sweaters	T-Shirts & Sweats	Ties, Pocket Squares & More

Declining CVR signals mid-funnel inefficiencies, but high-value shoppers continue to convert

Items purchased	Item unit price	UPT	AOV
446,338	\$99.75	2.48	\$269.00
↓ -3.2%	↑ 12.1%	↑ 3.1%	↑ 15.5%

*Date range: Aug 1, 2025 – Nov 15, 2025 vs. Last Year

Strong improvements in AOV and UPT confirm that purchase intent remains healthy, and funnel refinement should be the priority.

Continue monitoring for future optimization

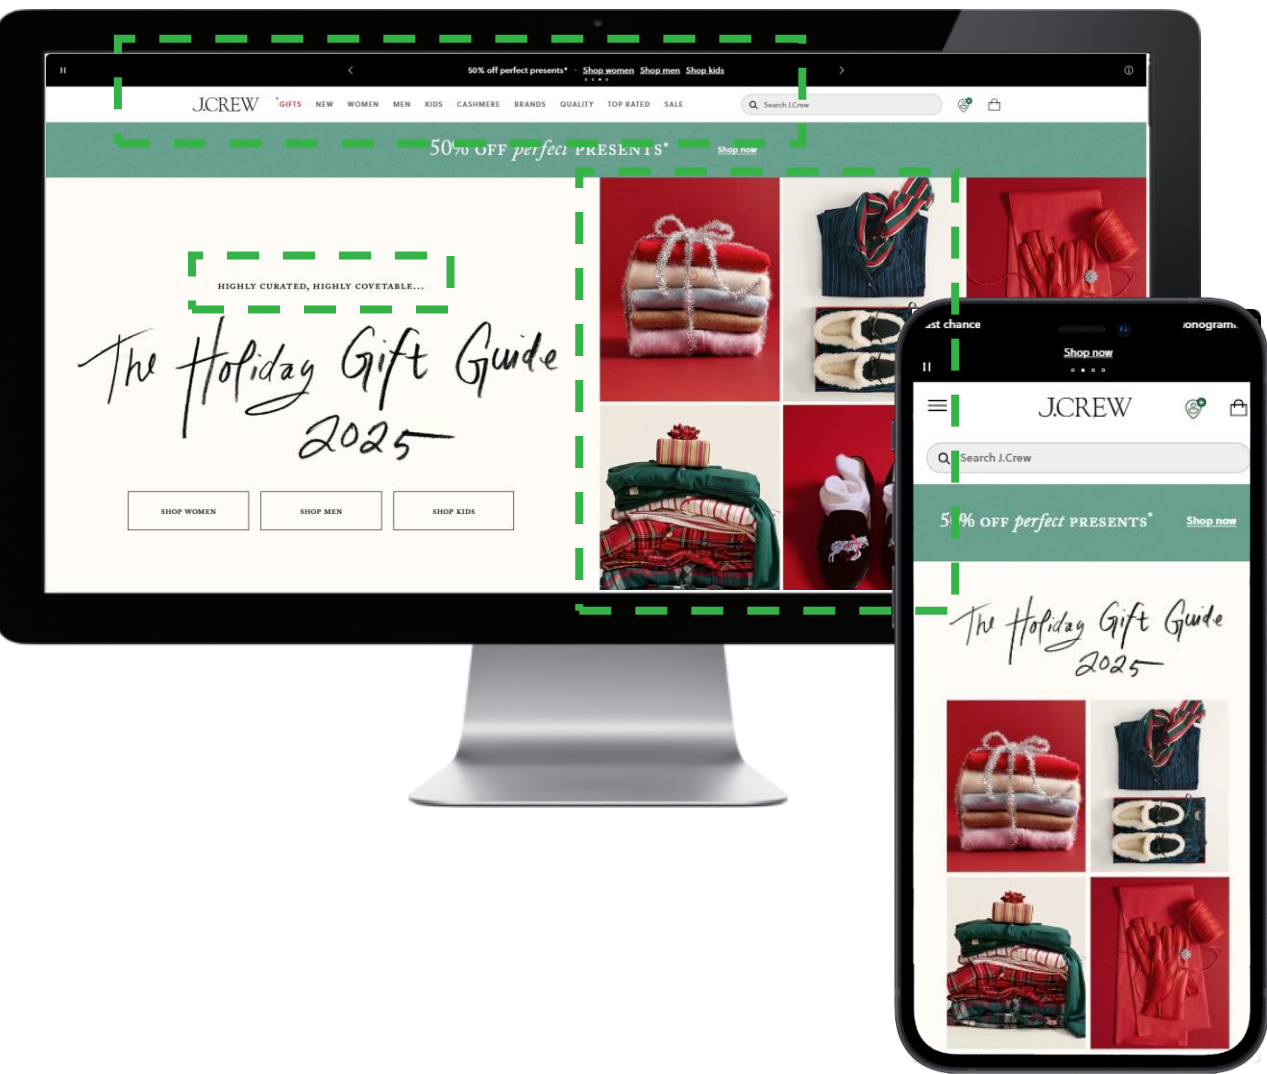

*CVR - Date range: Jan 1, 2025 – Nov 30, 2025 vs. Last Year

HORIZON x BROOKS BROTHERS **Competitive Audit Detailed**

J Crew

Early Exposure To Broad Product Assortment

All Parent Categories Visible In Exposed Nav
By placing all parent categories in the exposed nav, J Crew allows users to more quickly access customized offerings - may be confusing due to product granularity differences

H1 Value Prop
Writing a value prop in the H1 helps answer why a user should shop with your brand right here, right now

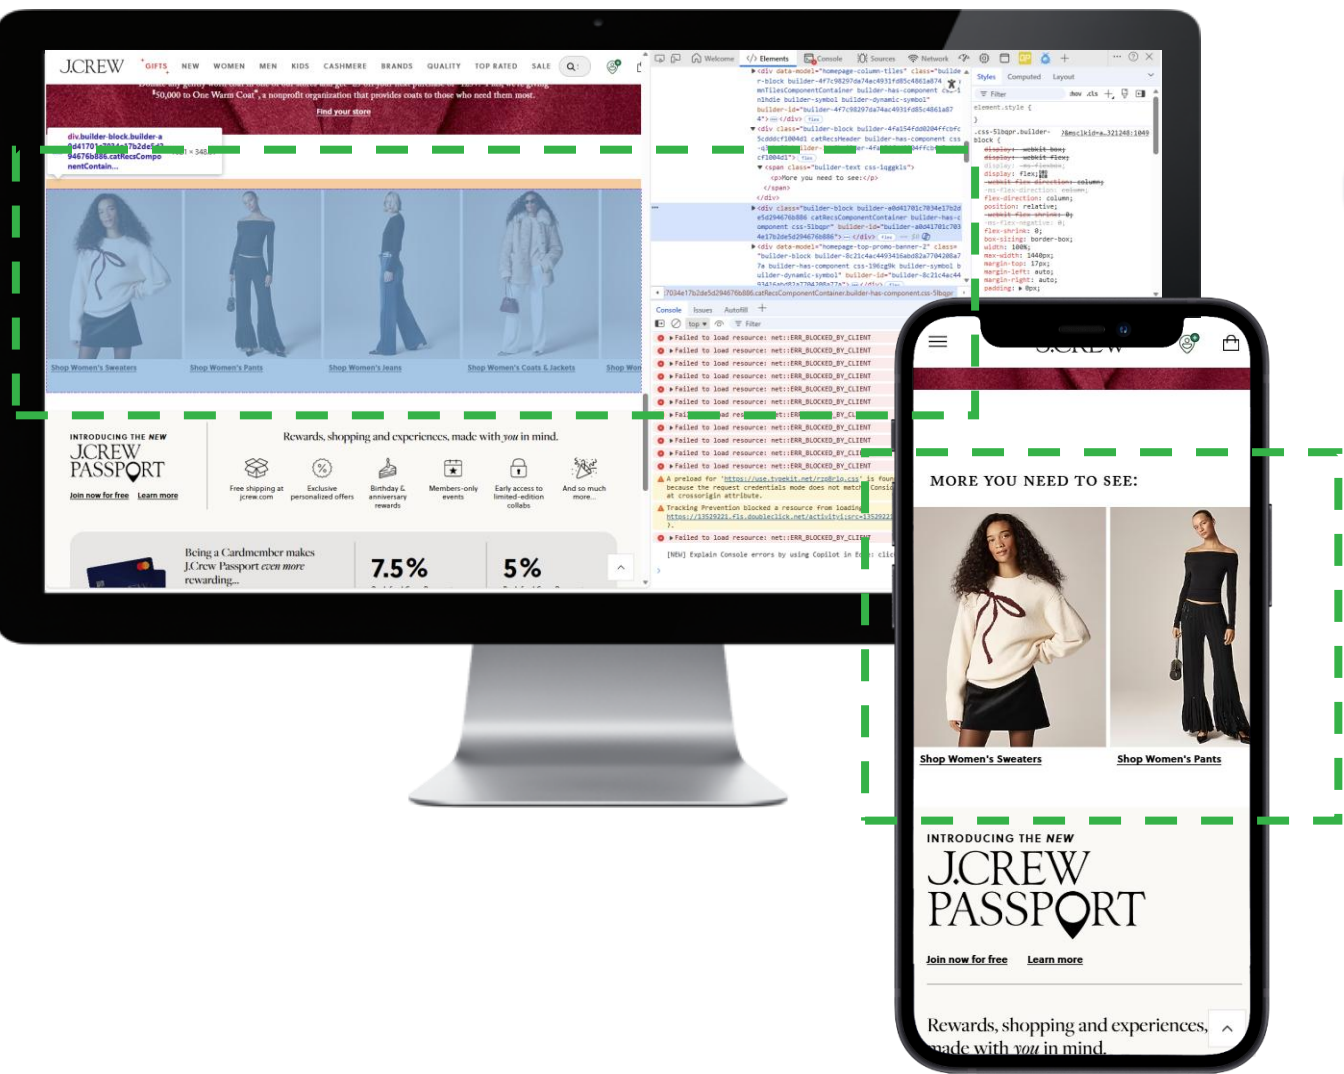

Promoting Casual Products
Selling comfy sweaters, slippers and pajamas capitalizes on growing casualization and need for comfy clothing with remote work

Takeaways:

Better product assortment exposure, especially to trending products, can improve early engagement and appropriate pathing

Plan Comparison Begins In Pre-Shop

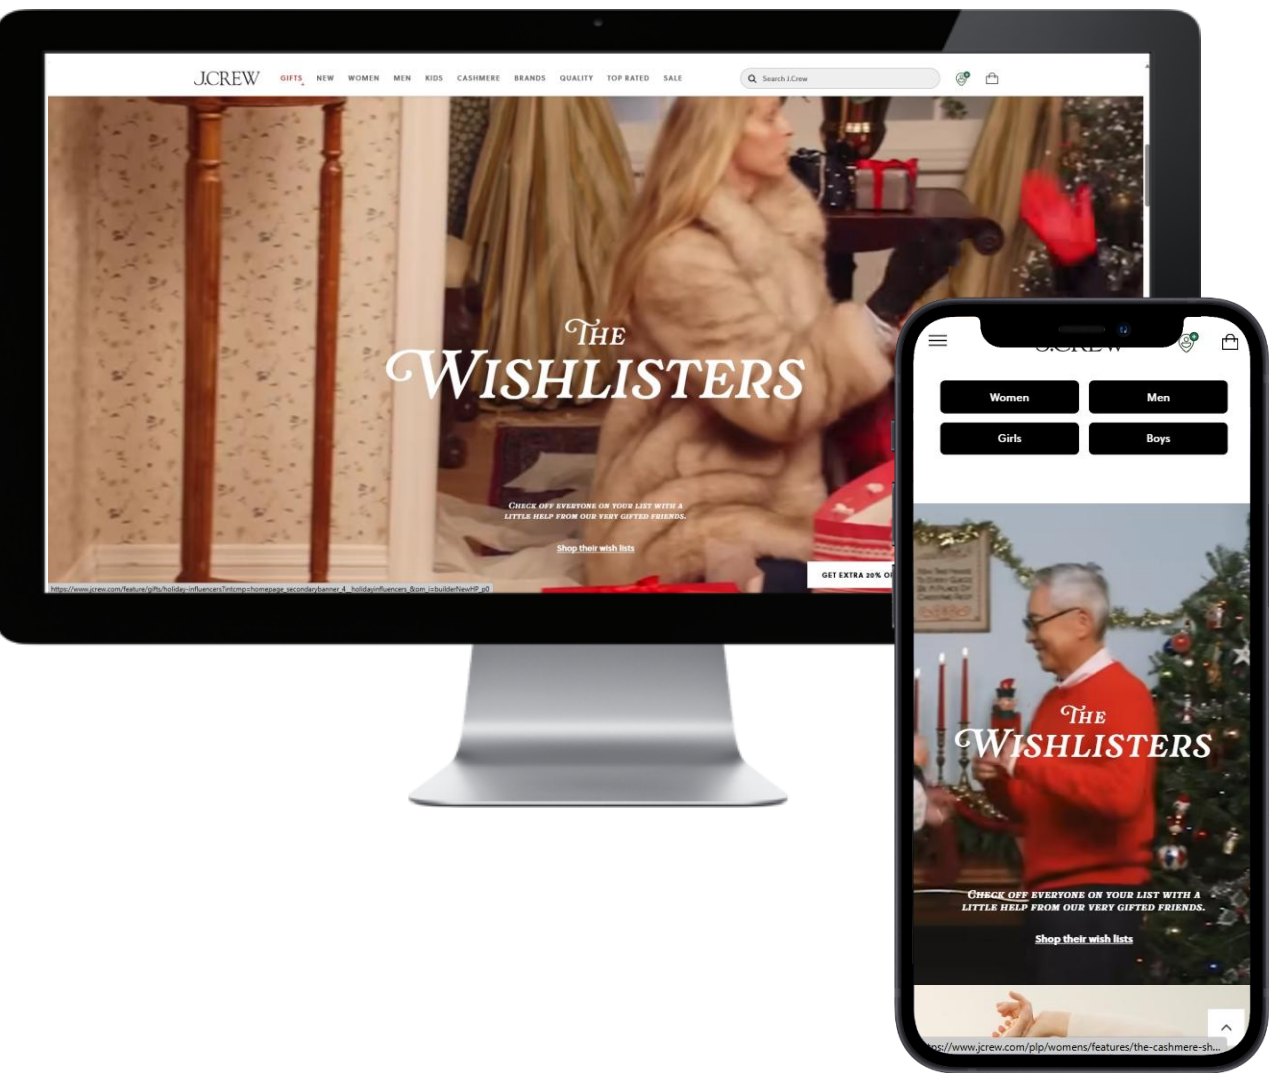

Recommendations At The Bottom

Promoting high priority items early on the page funnels users into desirable purchases, but users not engaging with earlier content may need a more personalized push

Takeaway:

Recommendations are a great way to not only have personalize and engaging product recommendations but also communicate that personalized selection

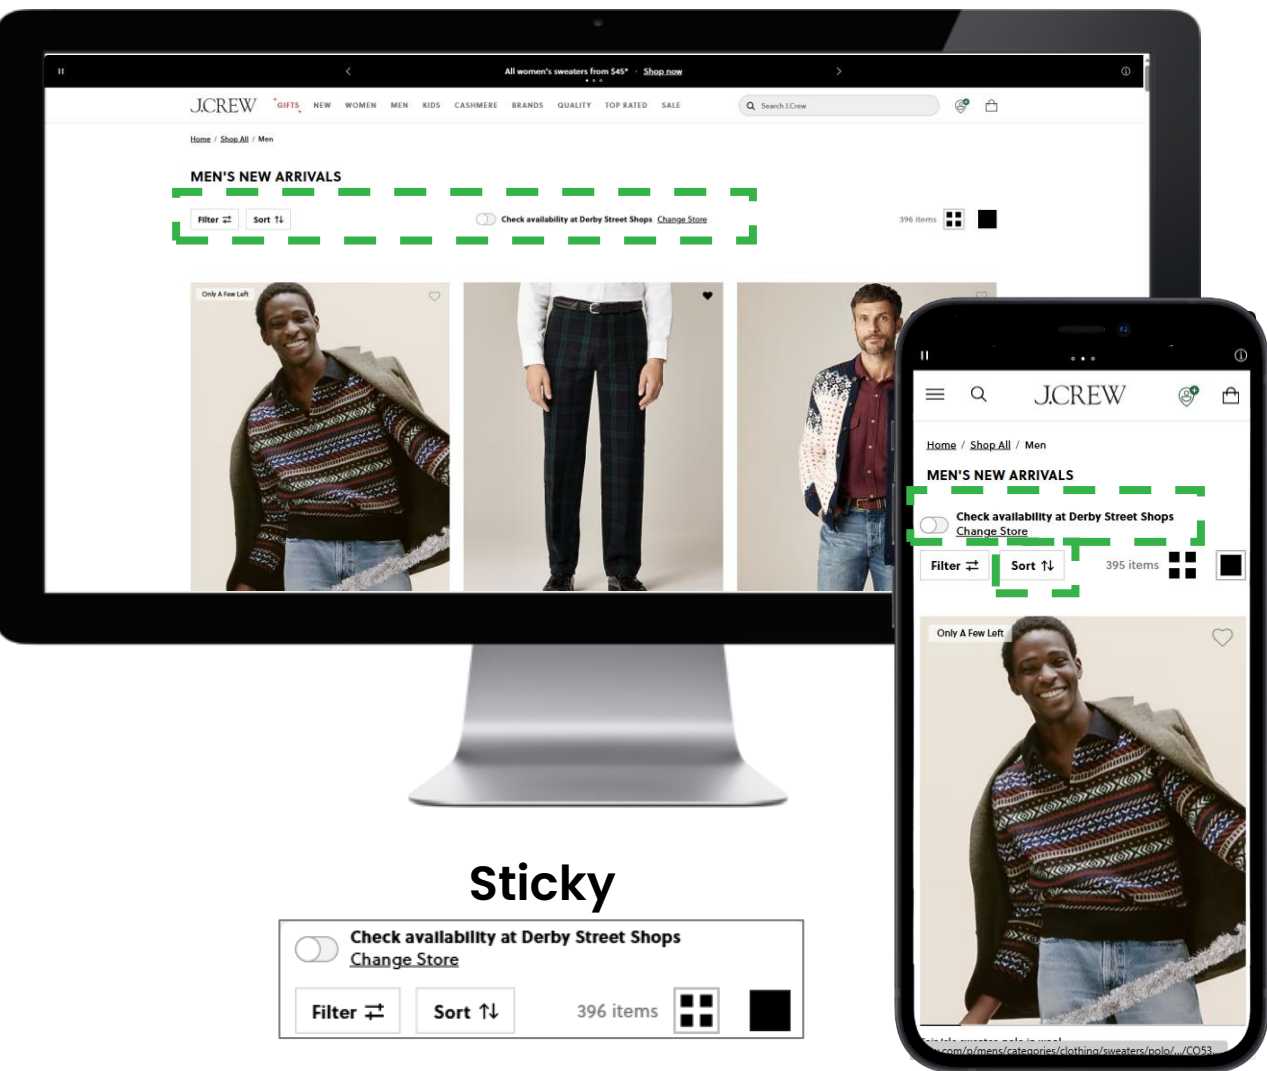

Plan Comparison Begins In Pre-Shop

Short Form Product Video
Short form product videos not only appeal to the increasingly popular social selling but also show users how products look in the real world, on real people

Takeaway:
Fun, short videos can appeal to an increasingly social media-driven audience that enjoys similarly fun look & feel with short, happy videos and real(ish) context

Early Exposure To Broad Product Assortment

More Accessible & Obvious Product Sorting

Separated filter & sort buttons with sticky display and dropdown sort functionality rather than new screen overlay make finding the right products easy

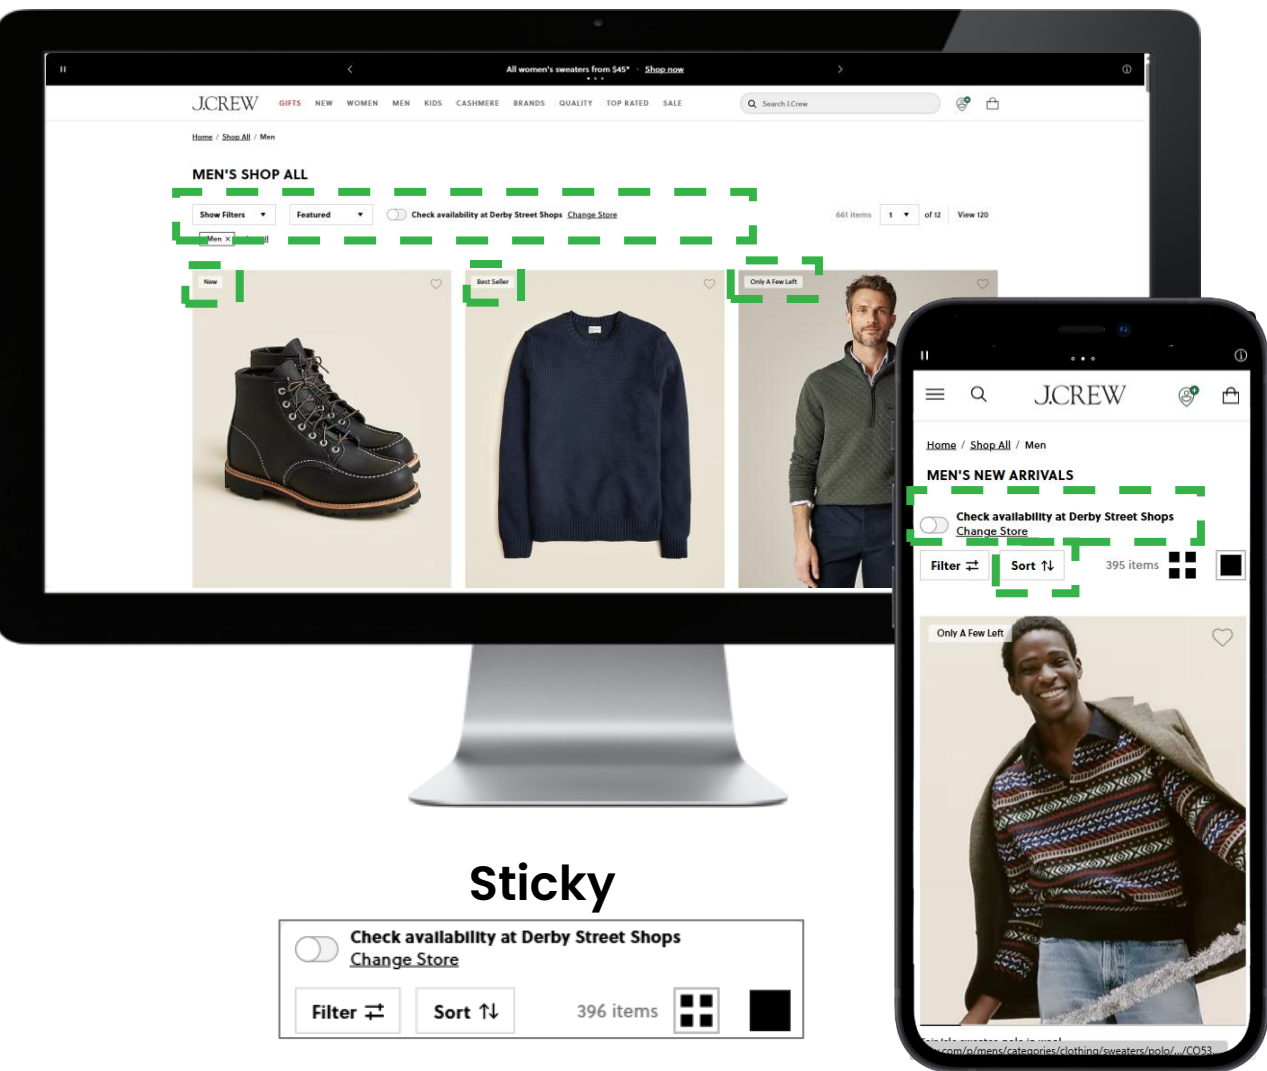

In-Store Availability Check

Giving users the options to go in store for in-person product evaluation and immediate purchase gratification can boost in-store sales

Takeaways:

Easier sorting, filtering and evaluation method access can make purchase decision easier

Early Exposure To Broad Product Assortment

More Accessible & Obvious Product Sorting

Separated filter & sort buttons with sticky display and dropdown sort functionality rather than new screen overlay make finding the right products easy

In-Store Availability Check

Giving users the options to go in store for in-person product evaluation and immediate purchase gratification can boost in-store sales

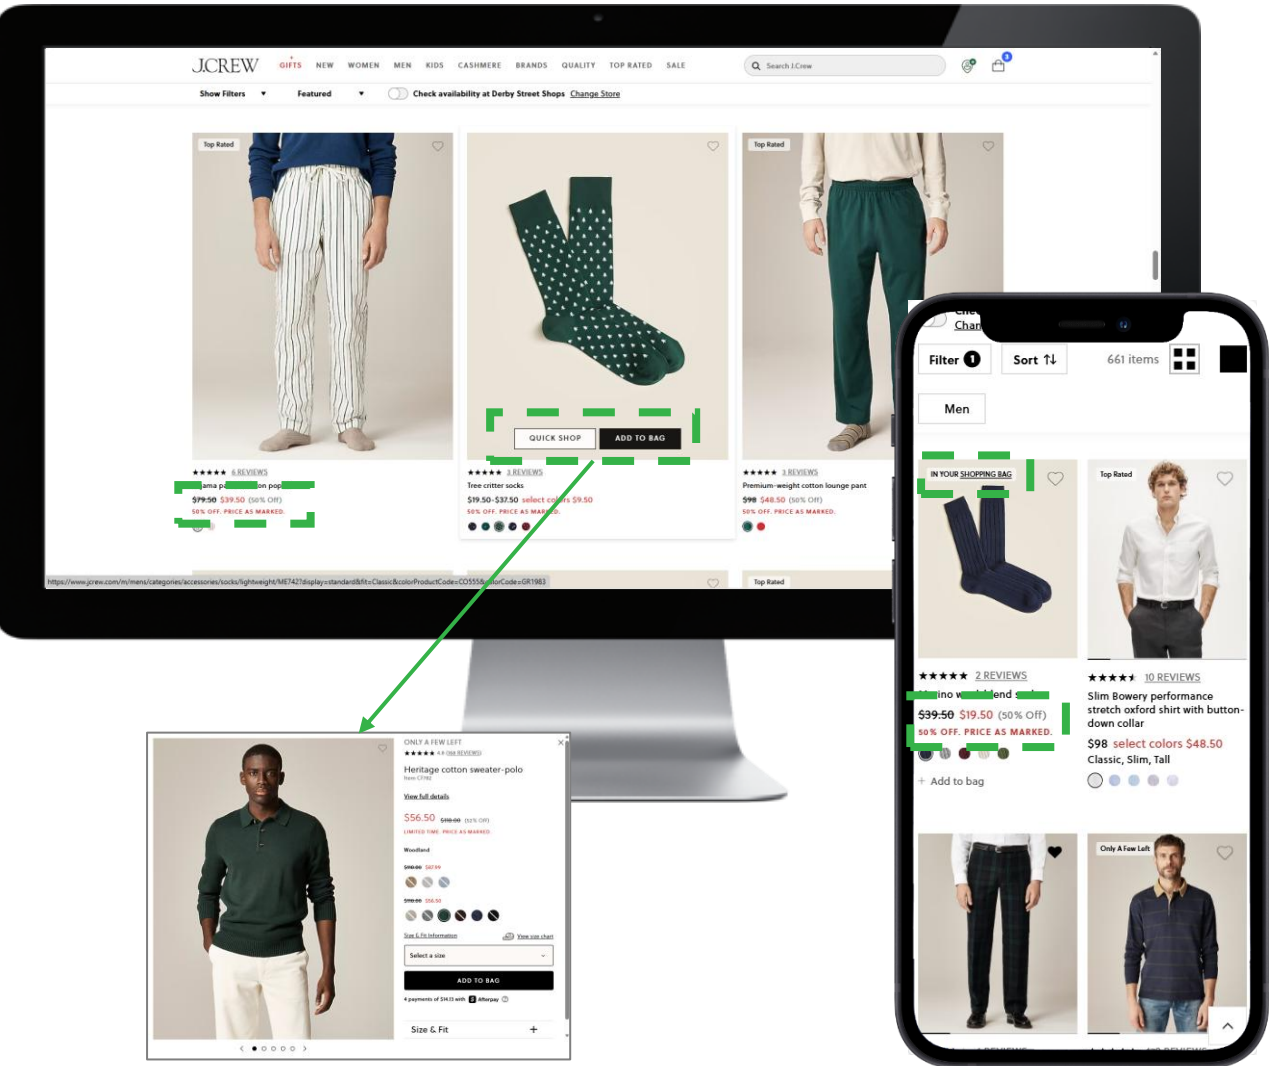

Product Info Badges

Placing product-specific info in the top-left of the image can grab user attention and motivate action

Takeaways:

Easier sorting, filtering and evaluation method access can make purchase decision easier

Early Exposure To Broad Product Assortment

In-bag Awareness

Clarifying if an item is already in bag can reduce down-funnel friction for users

Urgent Sale Communication

Red text color and ALL CAPS indicate urgency and importance of sale information, potentially motivating more immediate action

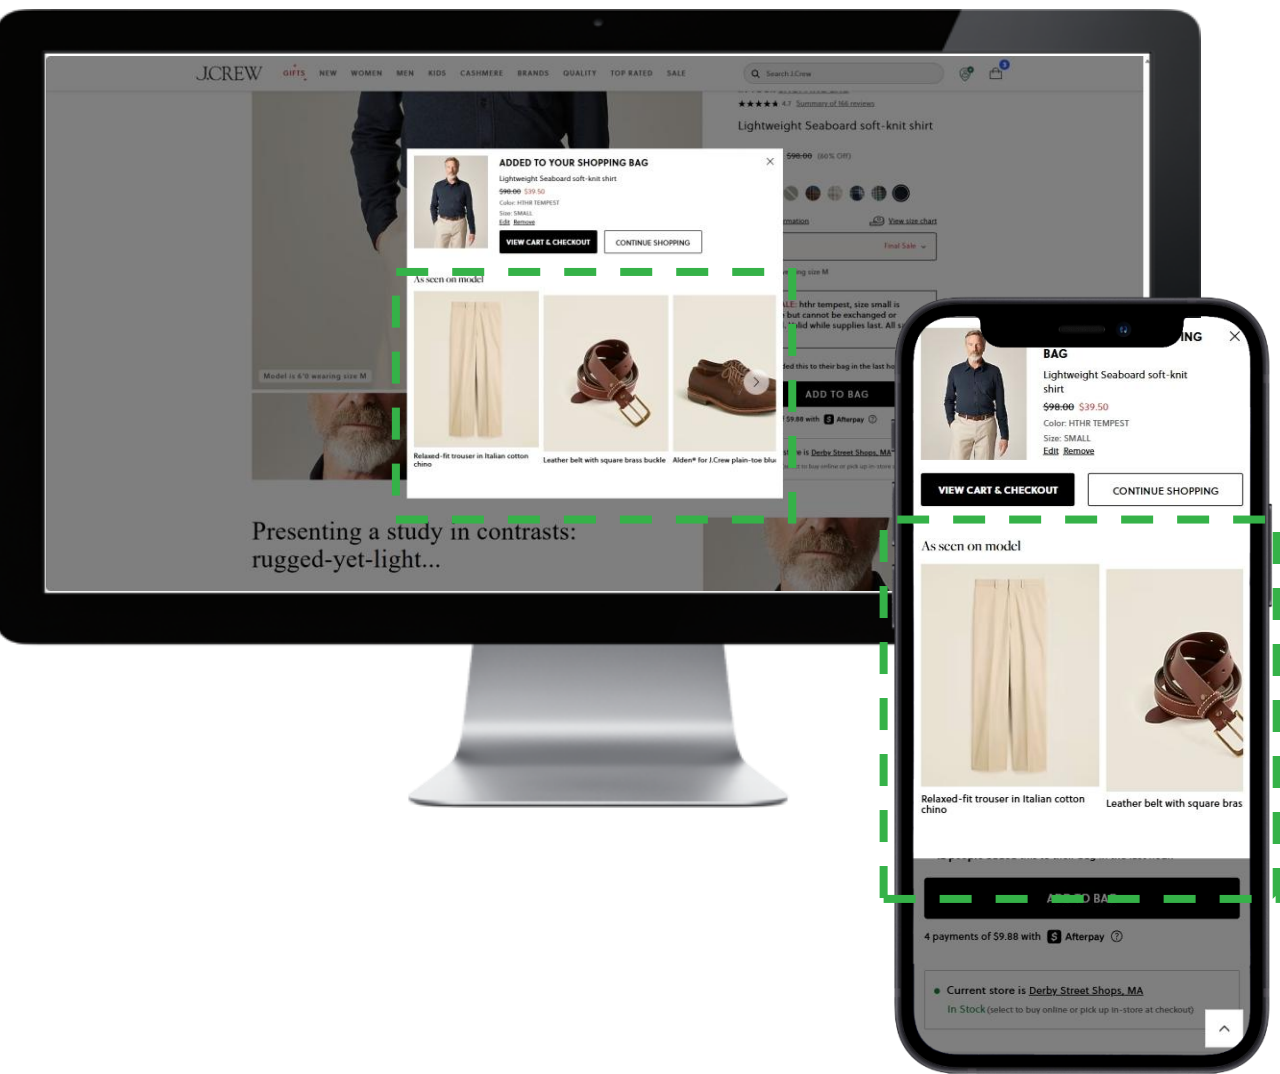

Add To Bag May Feel Like Too Much

Including a "Quick Shop" option that displays an additional screen may increase user confidence in funnel progression and subsequent completion

Takeaways:

Greater user awareness of urgency and product information may motivate action and sustain intent

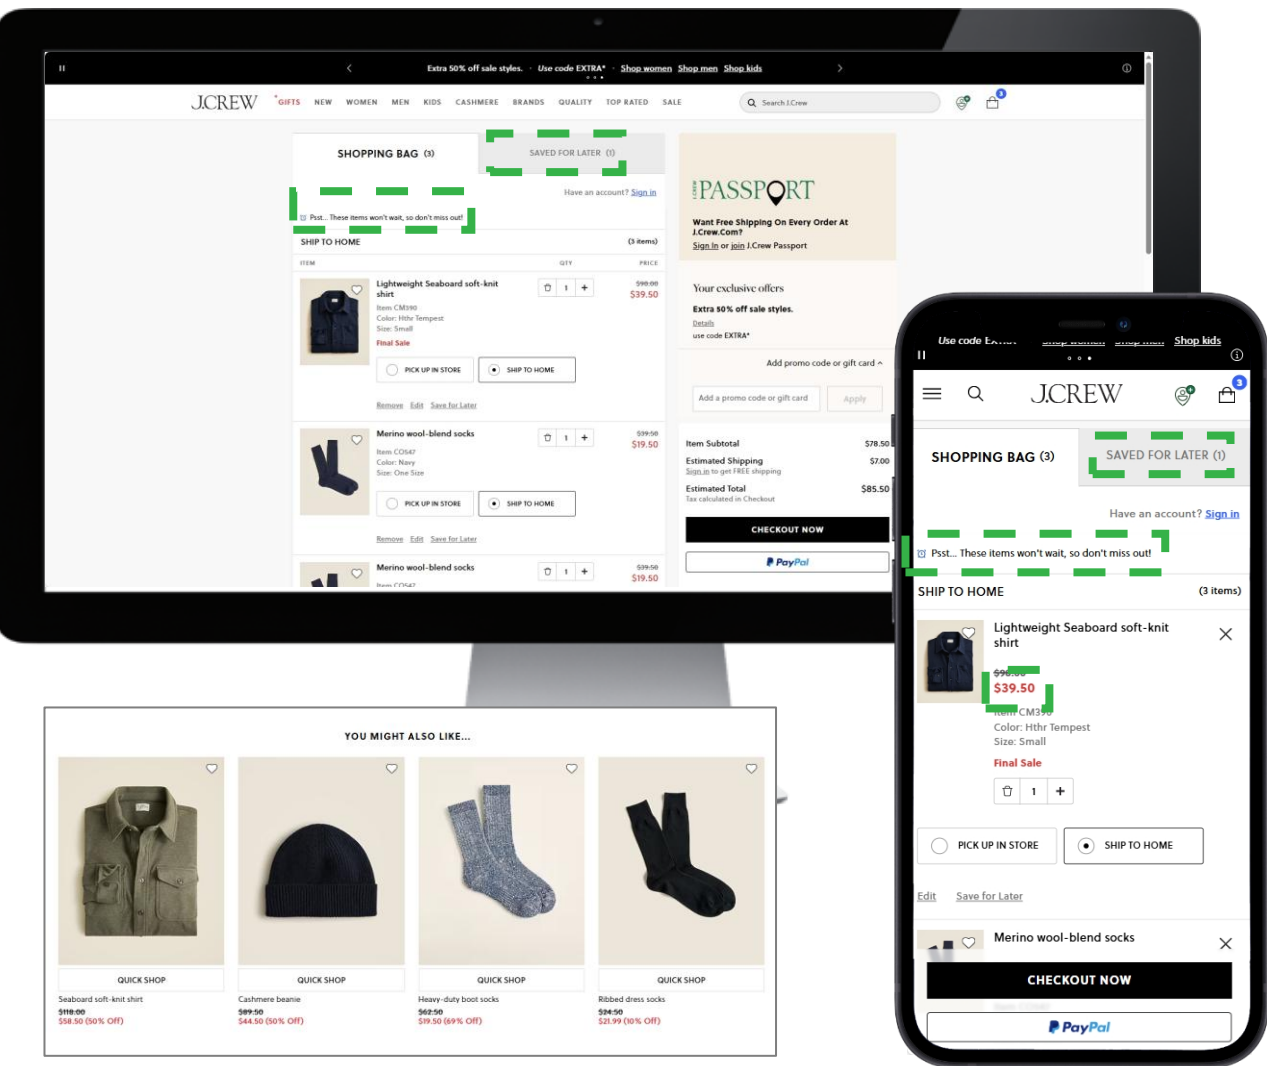

Early Exposure To Broad Product Assortment

Personalized Cross-sell After ATB
By cross-selling items related to the look that engaged a user enough for the first cart addition, J Crew is potentially able to sell a whole outfit, not just 1 product

Takeaways:
Personalized cross-sells are engaging but also build on already earned momentum

Early Exposure To Broad Product Assortment

Readily Accessible Saved Items

Showing users items they've previously liked and saved enables one last check to see if they want to buy now

Urgent Sale Communication

Red text color (again) and urgency text above cart motivate more immediate action

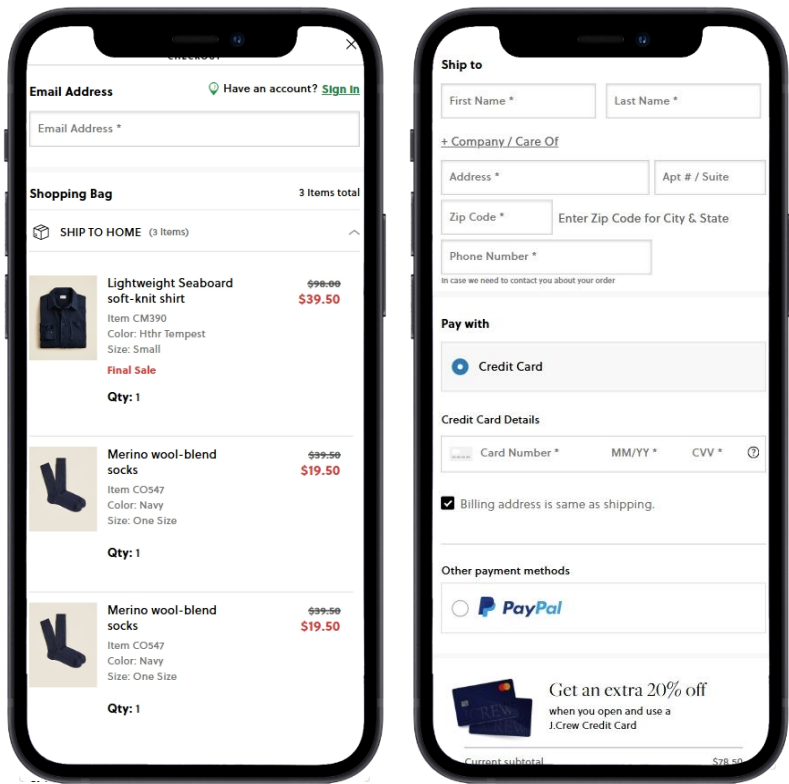

More Personalized Recommendations

Personalized recommendations engage users with the prospect of personalization while also promoting relevant cross-sells

Takeaways:

Urgency in cart can encourage progression / purchase while personalization can increase cart value

Early Exposure To Broad Product Assortment

Bag Visible In Checkout Flow
Single page checkout may reduce

Single Page checkout
Single page checkout may speed up process as page navigatin is no longer necessary

Takeaways:

Consolidation of as much as possible into a single page can help users reaffirm interest in bag items as they checkout with reduced friction and effort to get that confirmation

A Stand-alone Sign In Page Encourages Account Creation For Easier Future Purchases

CHECKOUT AS GUEST

Stand-alone Sign In Page
A stand-alone sign in page puts full emphasis on account creation for data capture and faster checkout in the future

Takeaways:
While the added page may harm current session conversions, a longer term view may show positive impact

J Crew Also Has a Re-Sale Program & Promotes Recycled Materials

Bonobos

Early Exposure To Broad Product Assortment & Personalization Potential

All Parent Categories Visible In Exposed Nav
By placing all parent categories in the exposed nav, Bonobos allows users to more quickly access customized offerings, **especially on mobile** - may be confusing due to product granularity differences.

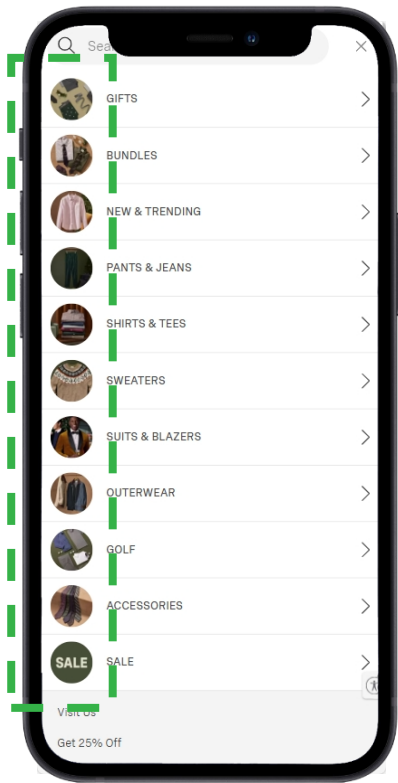

Value Prop Badges
Bonobos emphasizes its sales with copy but still communicates value props with badges

Find Your Fit
Bonobos has a unique and gamified "Find your fit" path that customize the PLP destination based on a series of selections

Takeaways:
Better product assortment exposure, value education and personalization can improve early engagement and appropriate pathing

Visually Appealing Nav Links

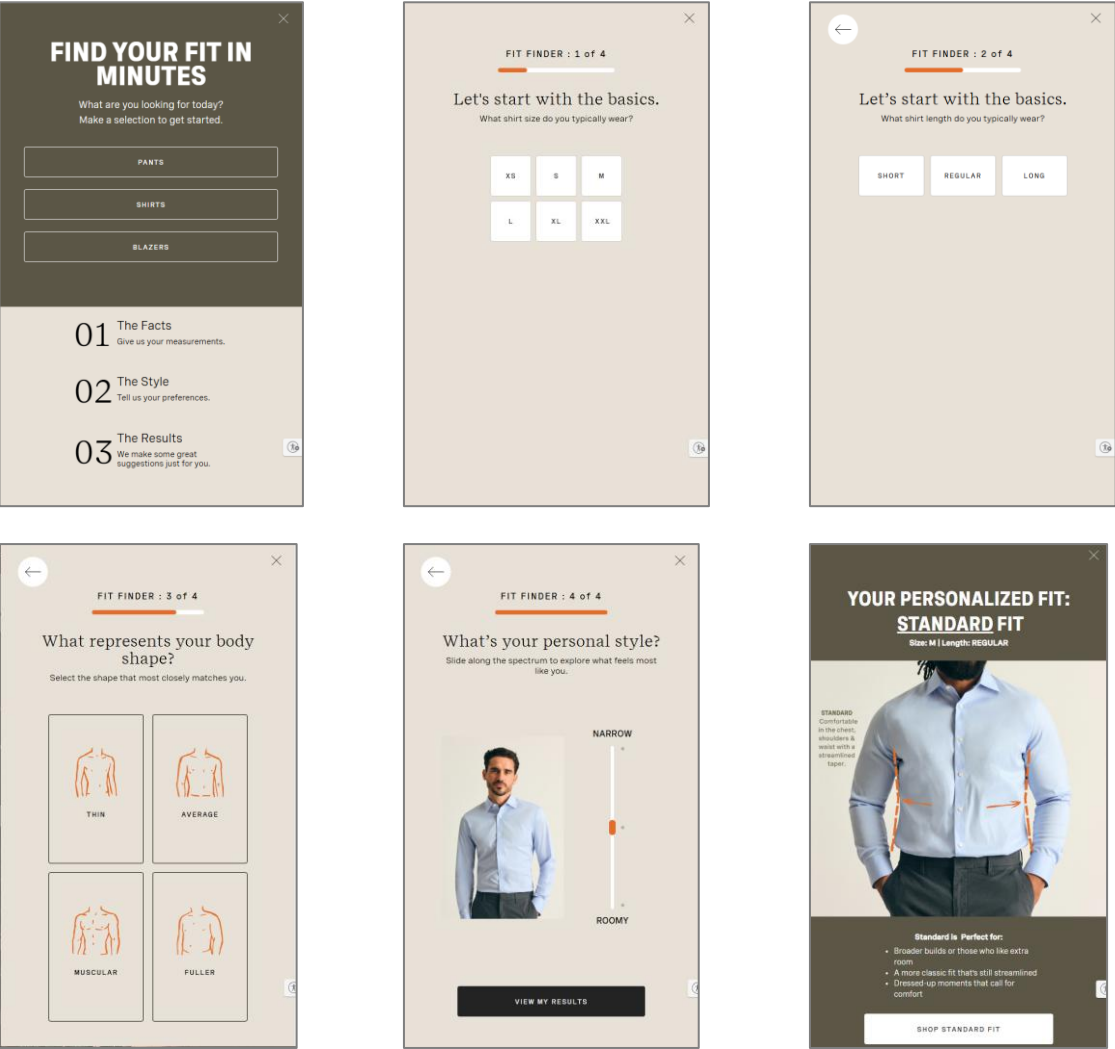

Images Attached To Mobile Nav Links

Attaching images to mobile nav links improves list digestibility and product navigation

Takeaways:

Better product assortment exposure, value education and personalization can improve early engagement and appropriate pathing

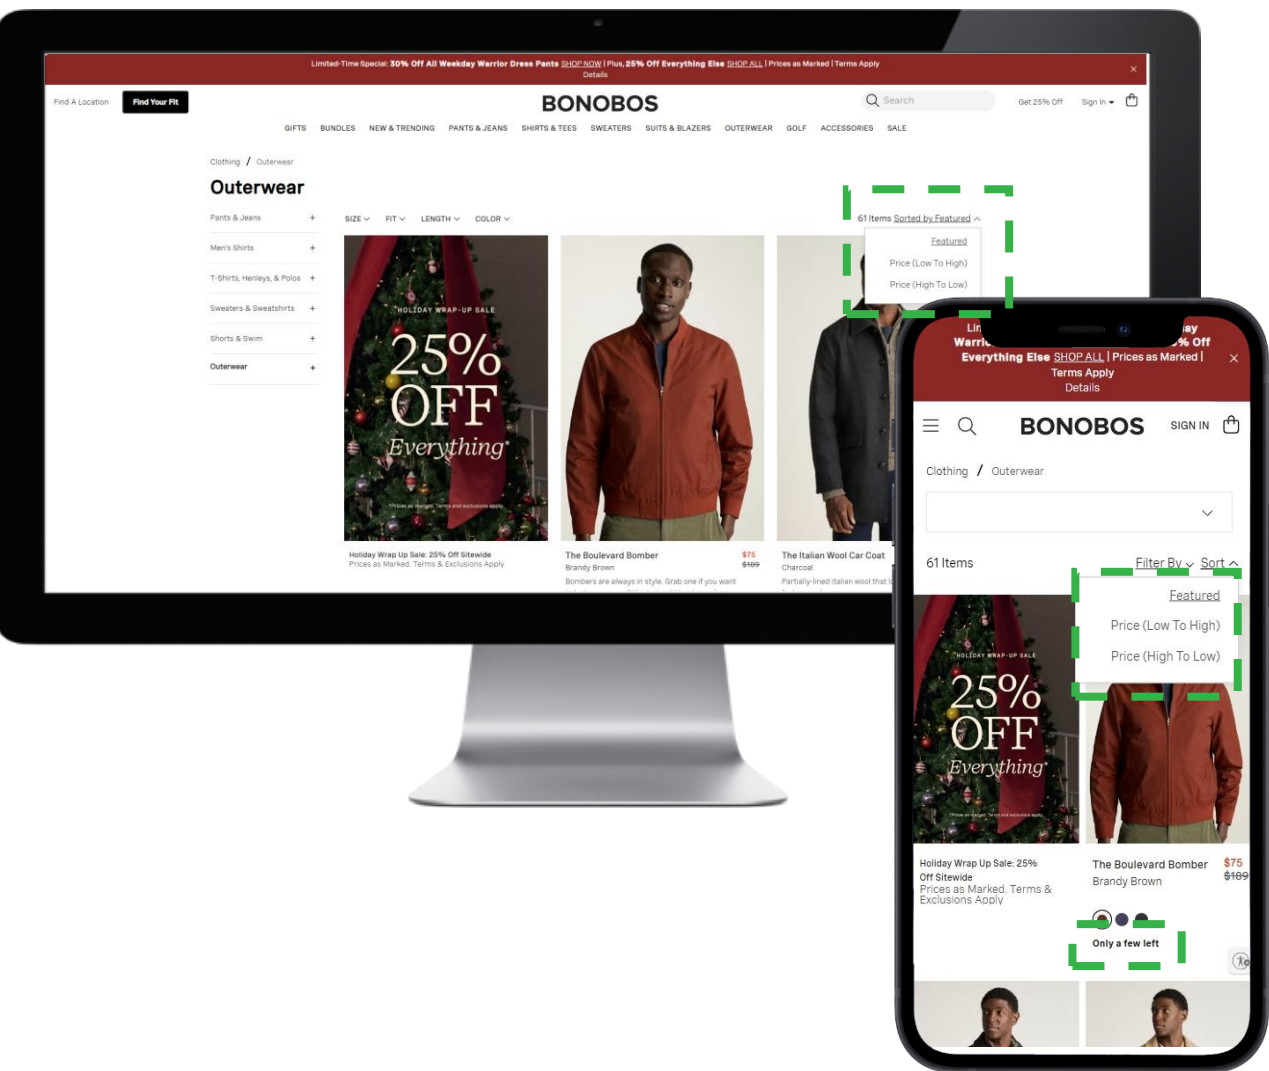

Gamified Personalization Pushes Users Into Better Products While Collecting Data

Gamified PLP Filtering
Gamification is a great way to engage users while giving them valuable personalization in return

Takeaways:
Gamification is an interesting way to engage users and put the best fit products in front of them

Easy Sort Feature Use Reduces Frustration & Keeps Users Engaged With The Right Products

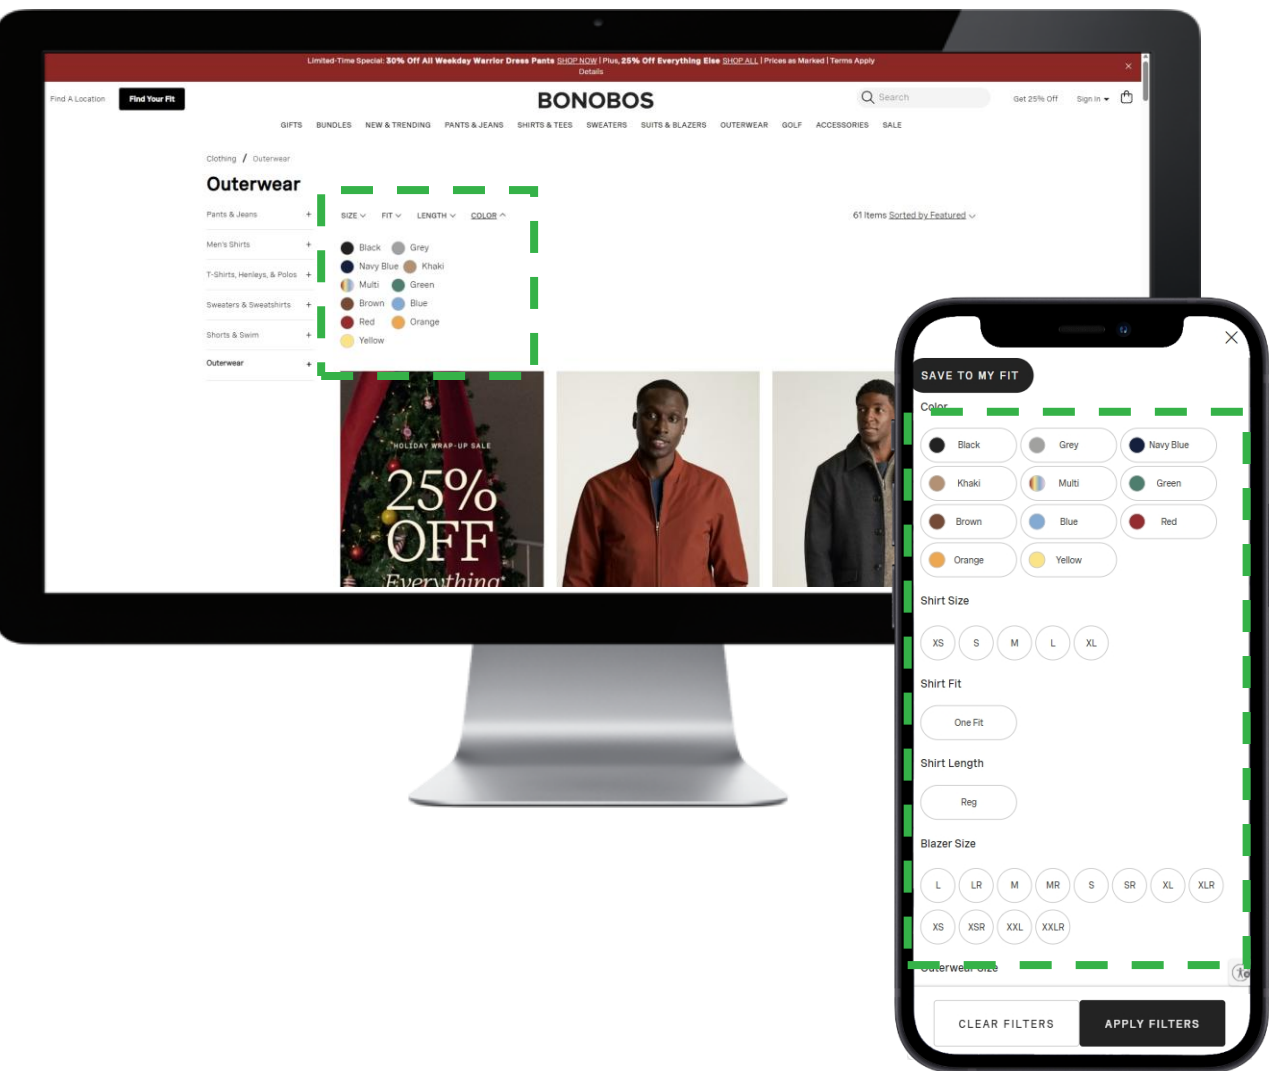

In-page Sort Dropdown
More accessible and fewer step sorting makes product selection easier

Stock-based Urgency
Indicators of limited stock encourage immediate action to avoid losing out on the product / deal

Takeaways:
Immediately present on-page information informs decision-making

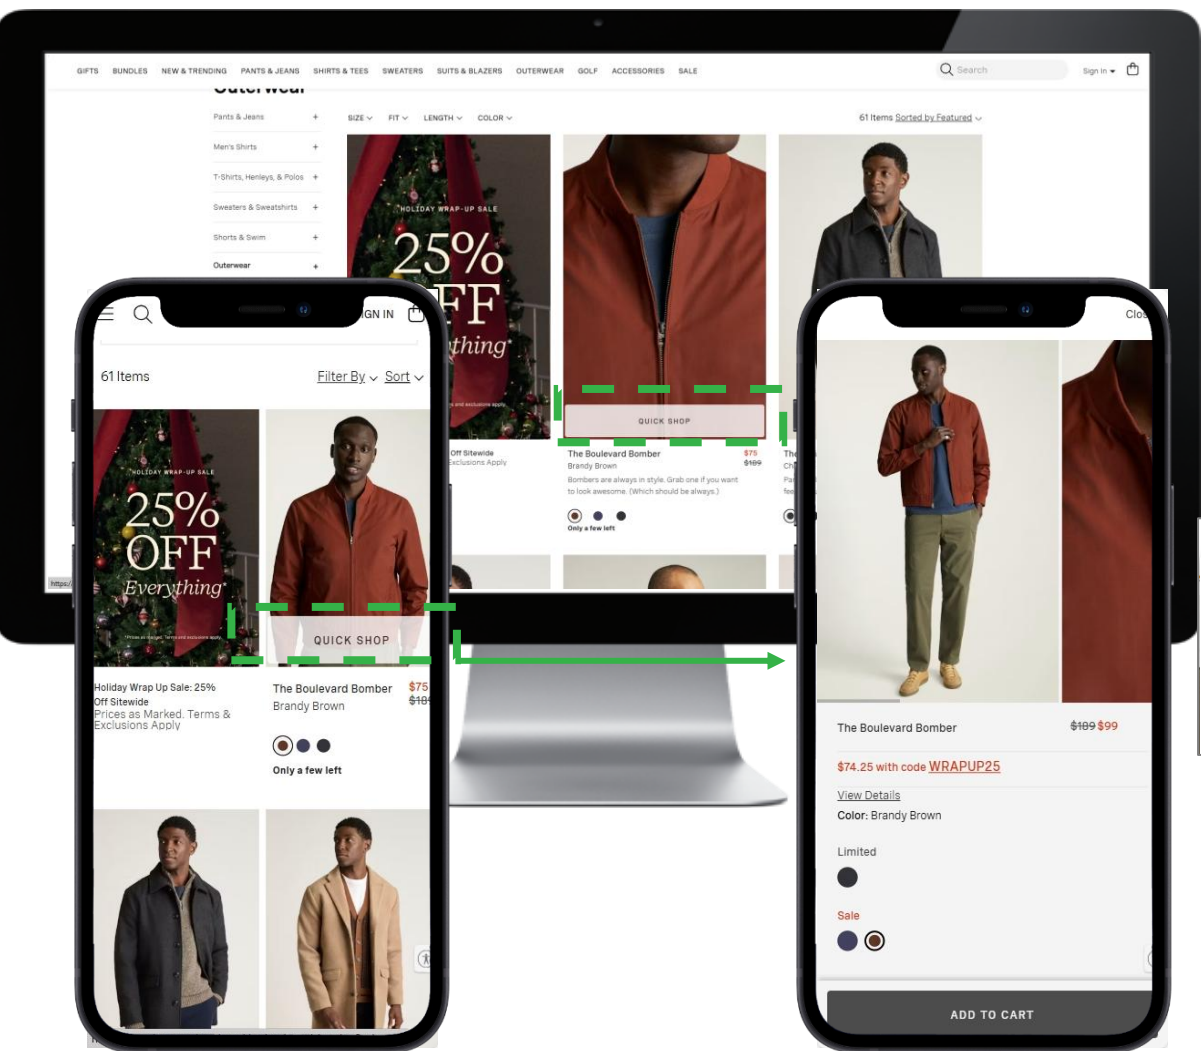

Exposed Filter Options Not Only Make Filtering Easier But Also Communicate What Can Be Filtered

Exposed Filters
Filters that are exposed on desktop and entirely visible after initial button click on mobile reduce effort to get to appropriate filtering

Takeaways:
Ease of use is always important, especially on a site that emphasizes choice among similar products

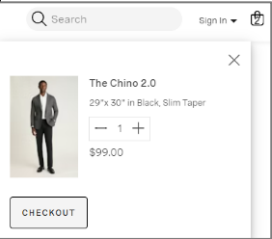

Quick Shop Reduces Commitment Barriers To ATB & Keeps Users Shopping Until They're Checkout Ready

Quick Shop Lowers Commitment
“Quick Shop” language is lower commitment than “Add to Cart”

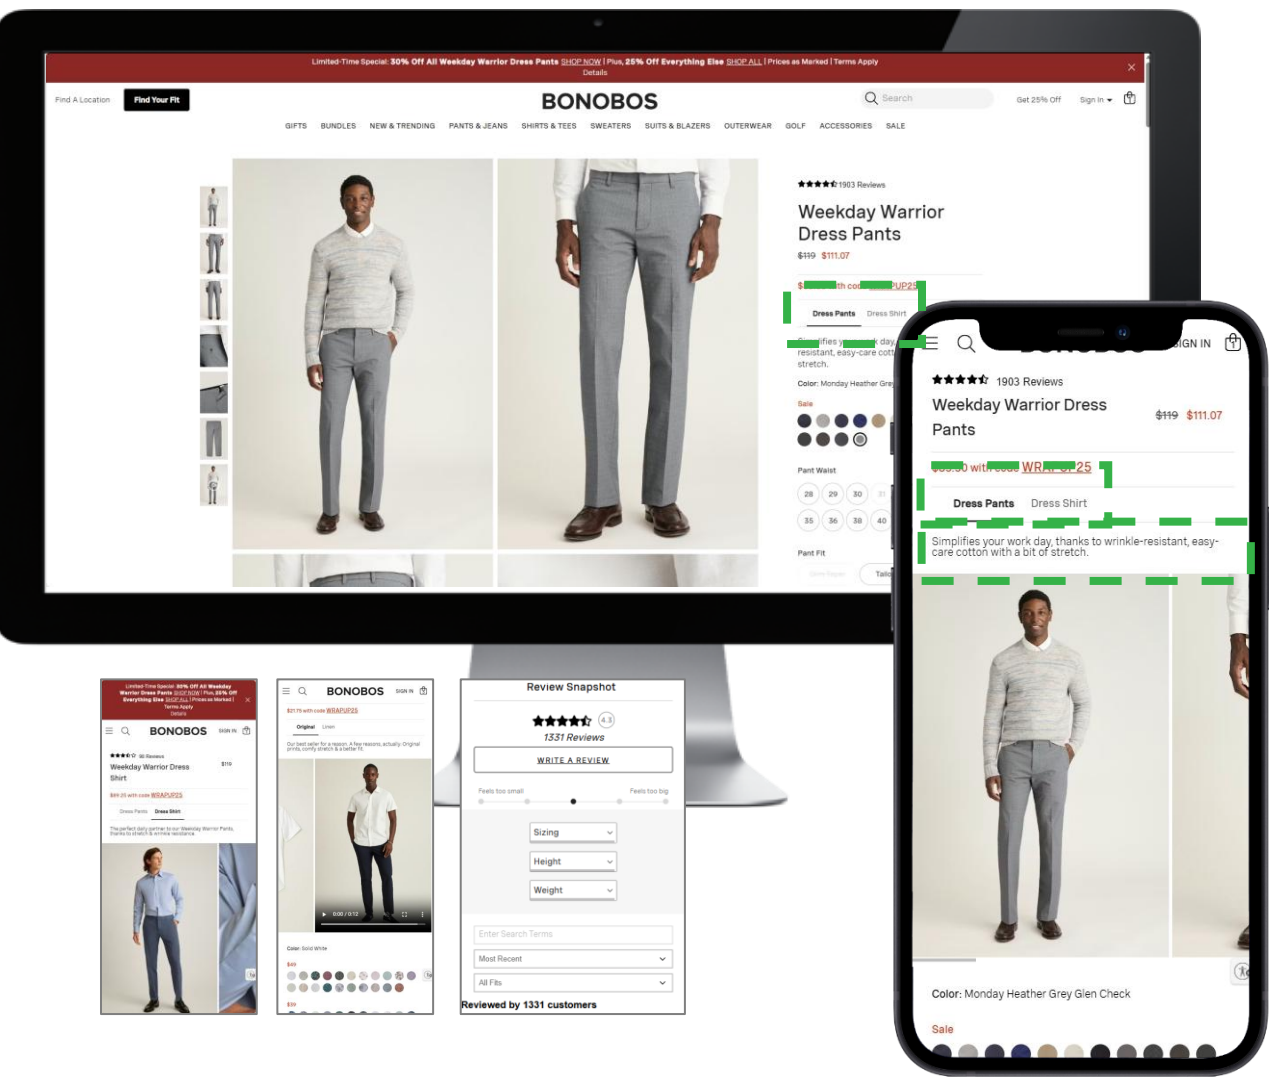

Temporary ATB Animation Minimizes Disruption
Opening a checkout module at the top of the screen and then having it disappear presents the checkout option without feeling too pushy

Takeaways:

Lower commitment and disruption in the PLP experience may keep users on site for longer and allow them to engage with more products

PDP Education Powers Confident Decisions

Top Of Page Value Prop
Gamification is a great way to engage users while giving them valuable personalization in return

Logical Cross-sell Tab
For products with a logical pairing, a reminder that the pairing / potential need exists with easy access to the cross-sell can improve cart additions

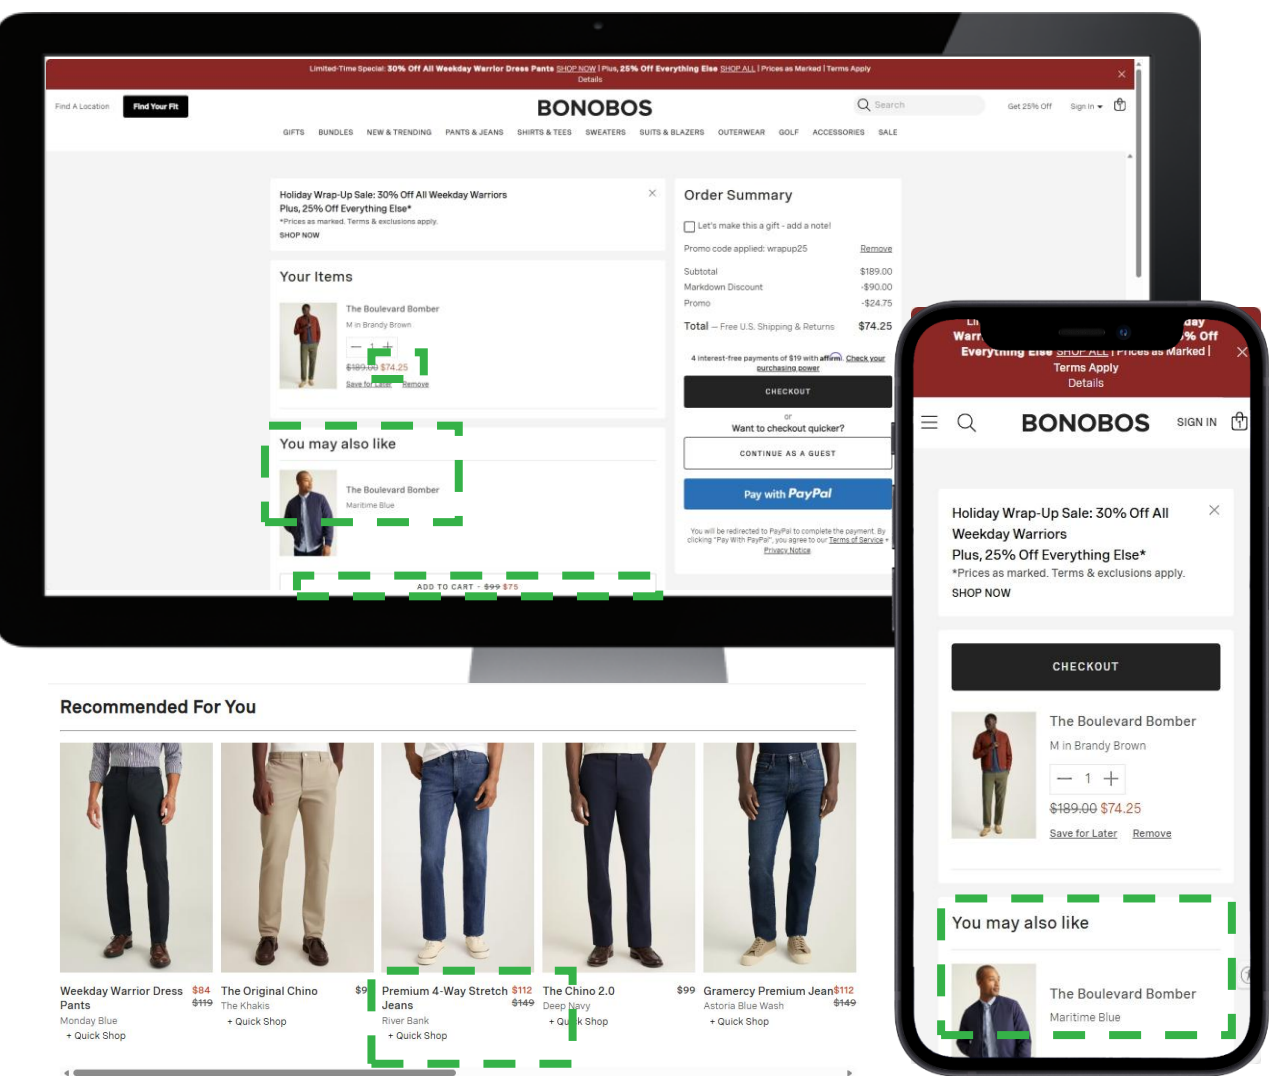

Short Form Video Gives Better Visual
Video is the best way to evaluate if a product fits and moves as customers want. It also appeals to the increasing number of users coming from social platforms

Takeaways:

Bonobos’ use of PDPs as a comprehensive education tool powers confident decision making to motivate the addition of this product to bag but also reduce drop-off down-funnel

Gamified Personalization Pushes Users Into Better Products While Collecting Data

Multiple Recommendations

Repeated personalization impressions attempt to increase cart value

On-page ATB Options

On-page ATB functionality prevents extra cart additions from creating friction

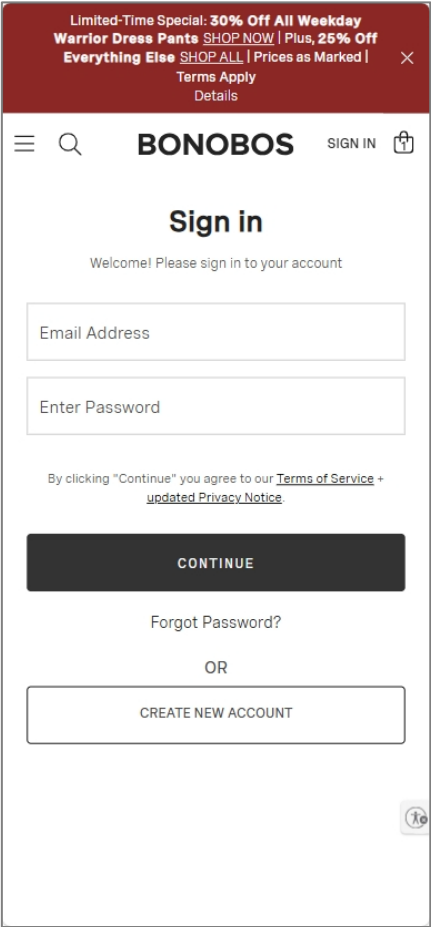

Red Sale Text

Red, urgent text color for sales remind users of value

Takeaways:

Gamification is an interesting way to engage users and put the best fit products in front of them

A Stand-alone Sign In Page Encourages Account Creation For Easier Future Purchases

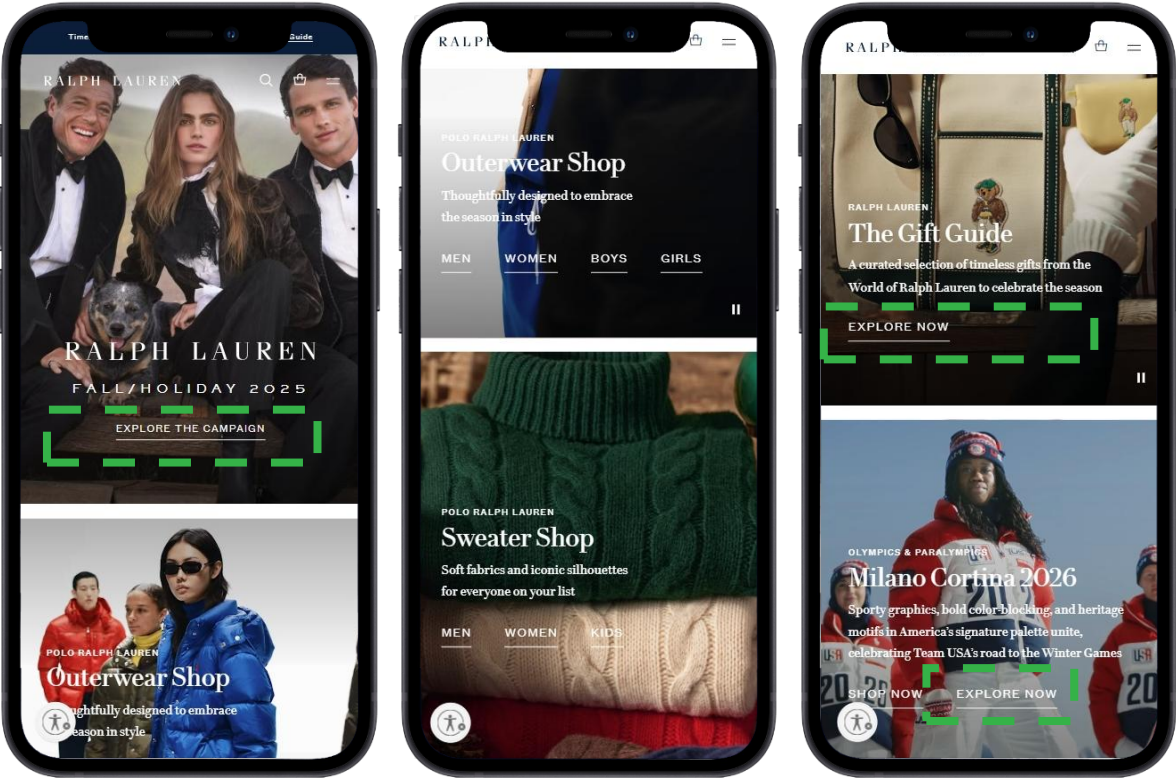

Stand-alone Sign In Page
A stand-alone sign in page puts full emphasis on account creation for data capture and faster checkout in the future

Takeaways:

While the added page may harm current session conversions, a longer term view may show positive impact

Ralph Lauren

Unique Pathing With Non-PLP Pages & Consistent Breakdown By Wearer Makes Exploration Easy

Explore Pathing To Non-PLP Pages

Allowing users to stay in the upper funnel enables exploration with more brand-style content, which may improve long-term performance

Video, Animation & Interactivity

Lots of video and interactive elements give the Ralph Lauren site a more fun look and feel

Men, women & Kids Selection

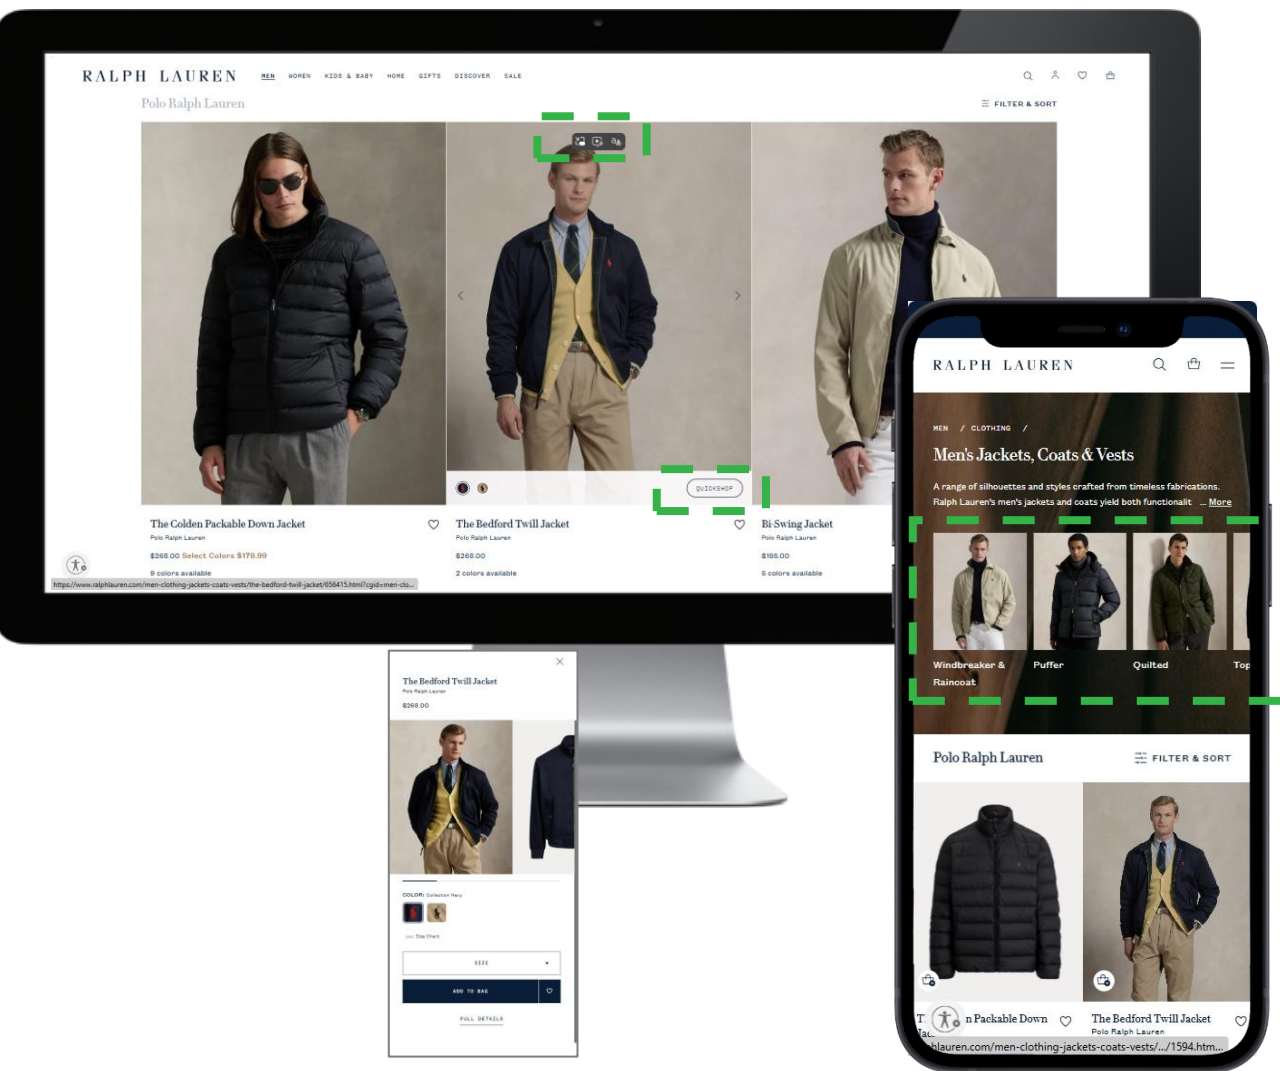

Ralph Lauren's segmentation of the site by men, women, boys and girls allows users to identify who they're shopping for as they click into specific products

Takeaways:

Pathing to non-PLP pages makes engagement without truly shopping easier.

Consistently separating links by the clothing wearer makes pathing easy. Clothing type may work as well but requires more links.

Enhanced Visual Selection Better Informs Decisions

Try-on Video For All Items
Video is the best way to assess real fit of a product, giving users confidence that they understand product look & fit

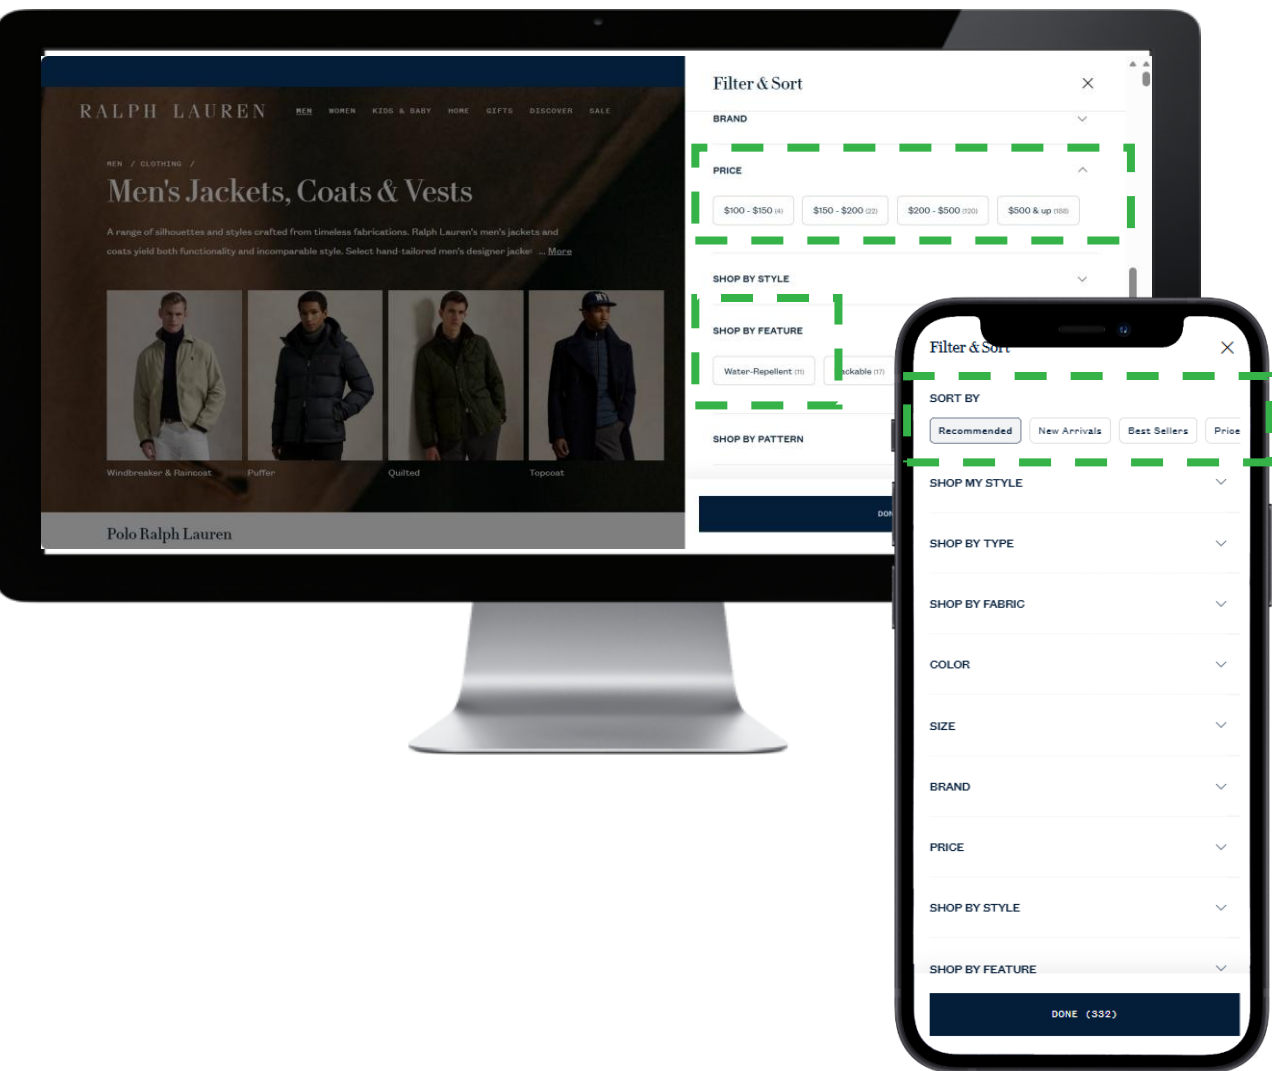

Quick Shop Copy Lowers Commitment Barriers
Desktop users benefit from lower commitment copy that accomplishes the same goal as "Add to Bag"

Image-Based PLP Filtering
Images for product sub-types make narrowing down selection easier

Takeaways:
PLPs are crowded, but brands still must find a way to maximize product education without increasing friction

Maximizing Sort & Filter Use Gets Users To The Right Products with Minimal Frustration

Exposed Sort Options In Filter
Exposed sort options reduce clicks required to sort a PLP and communicate the value of the sort feature by showing the ways in which a PLP could be sorted

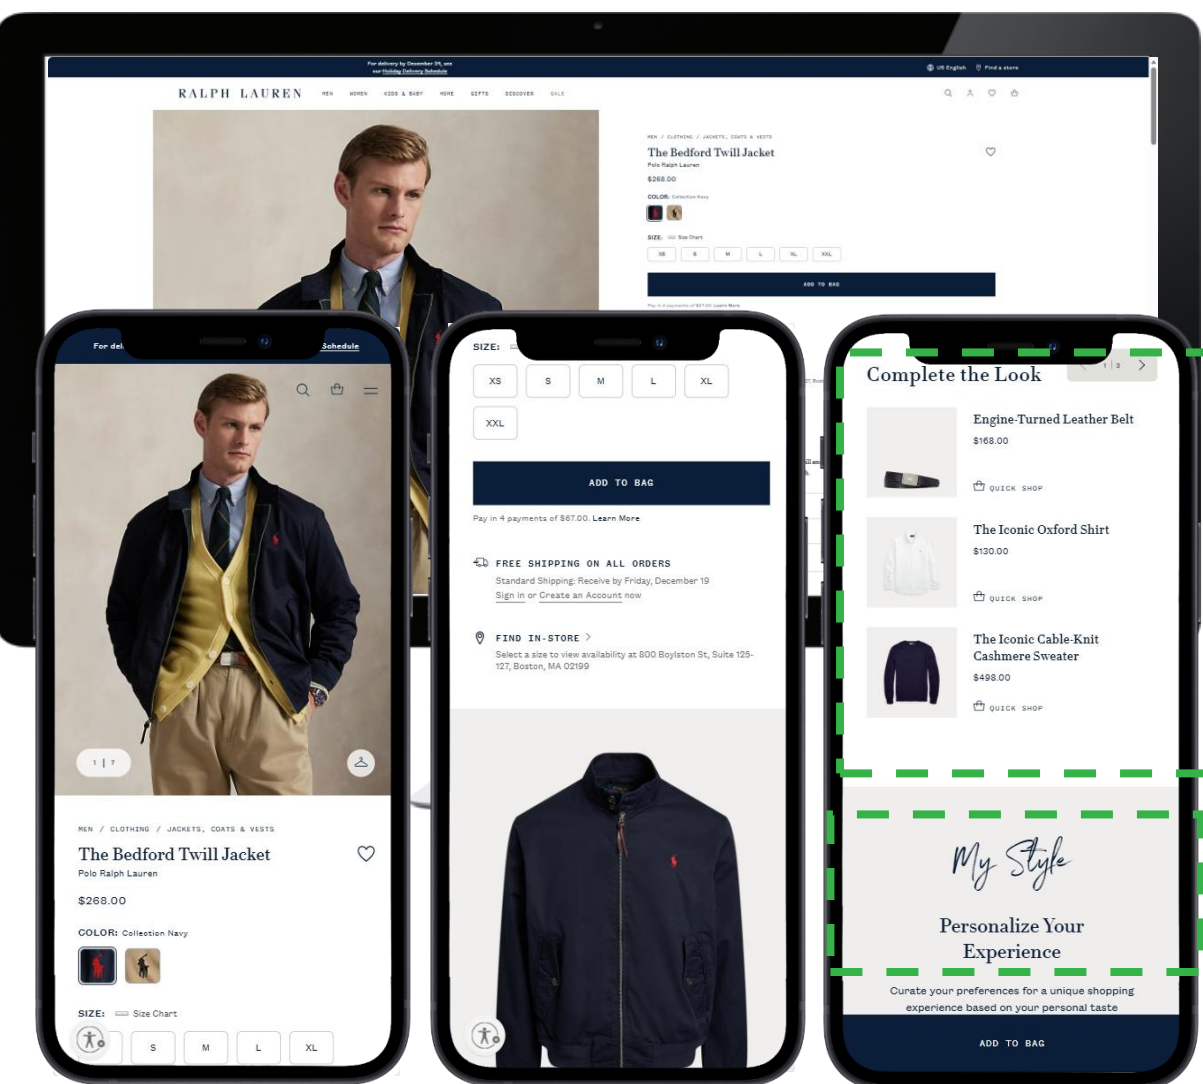

Detailed Filter Options
Filter options such as price, feature, or even review ratings / volume are valuable to users

Takeaways:

Sort & filter functionality should be comprehensive to give users the best experience and the best products

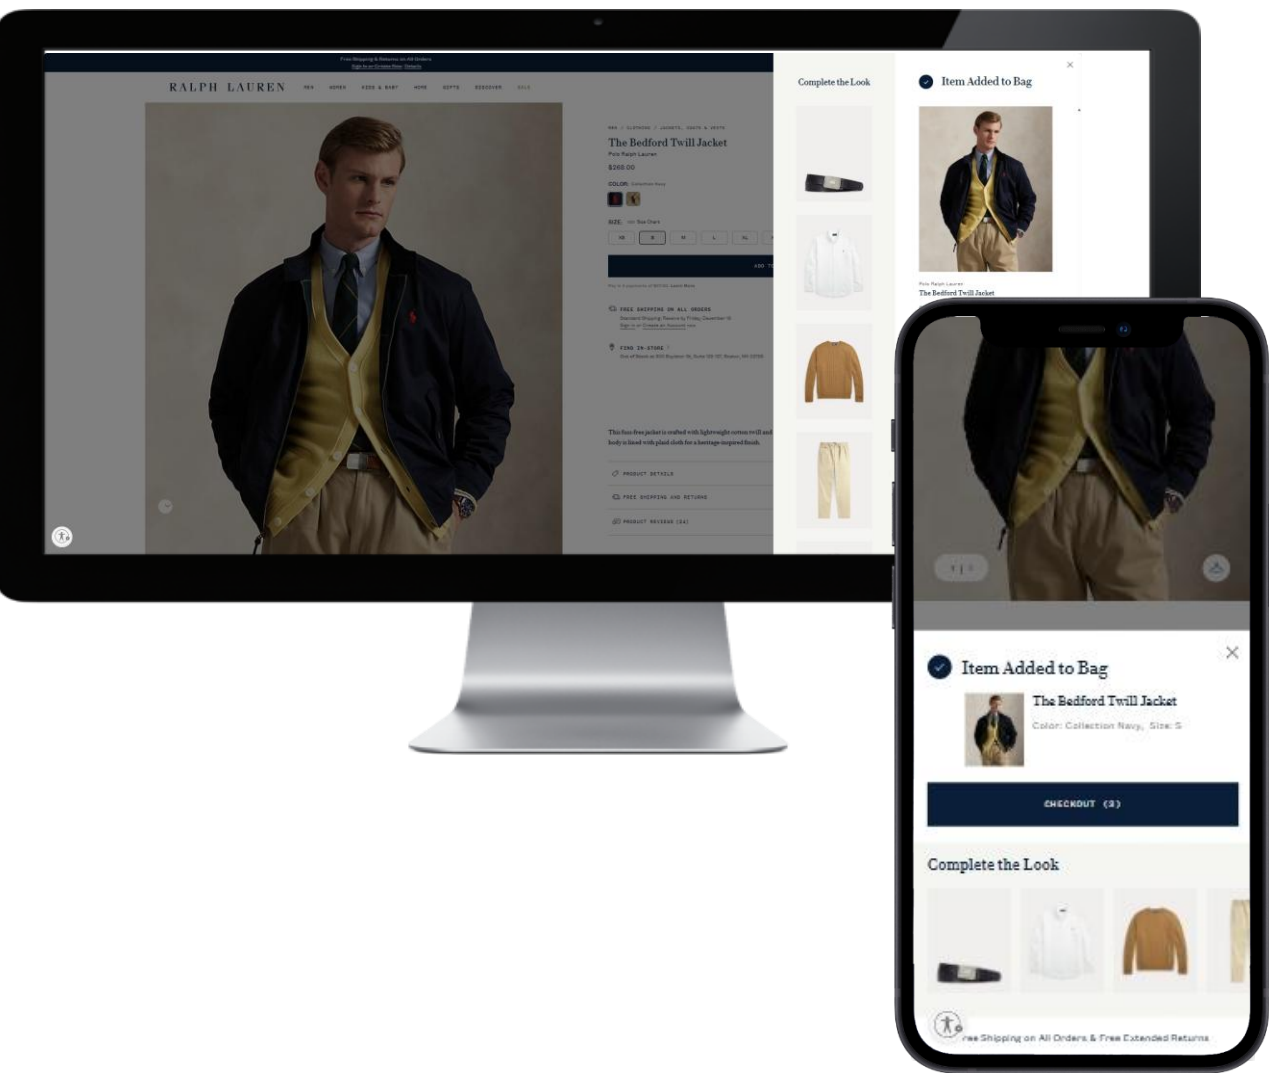

Emphasizing customizability On PDPs Can Increase Cross-sell Opportunity

Multiple “Complete the Look” Options
Giving multiple styles for cross-sold products around the initial item addresses more users with potential cross-sell inspiration

Takeaways:
Customizability, especially in the context of a complete outfit can demonstrate the diversity of the product while also exposing users to cross-sell inspiration

Doubling Down With Cross-sells Repeated After ATB

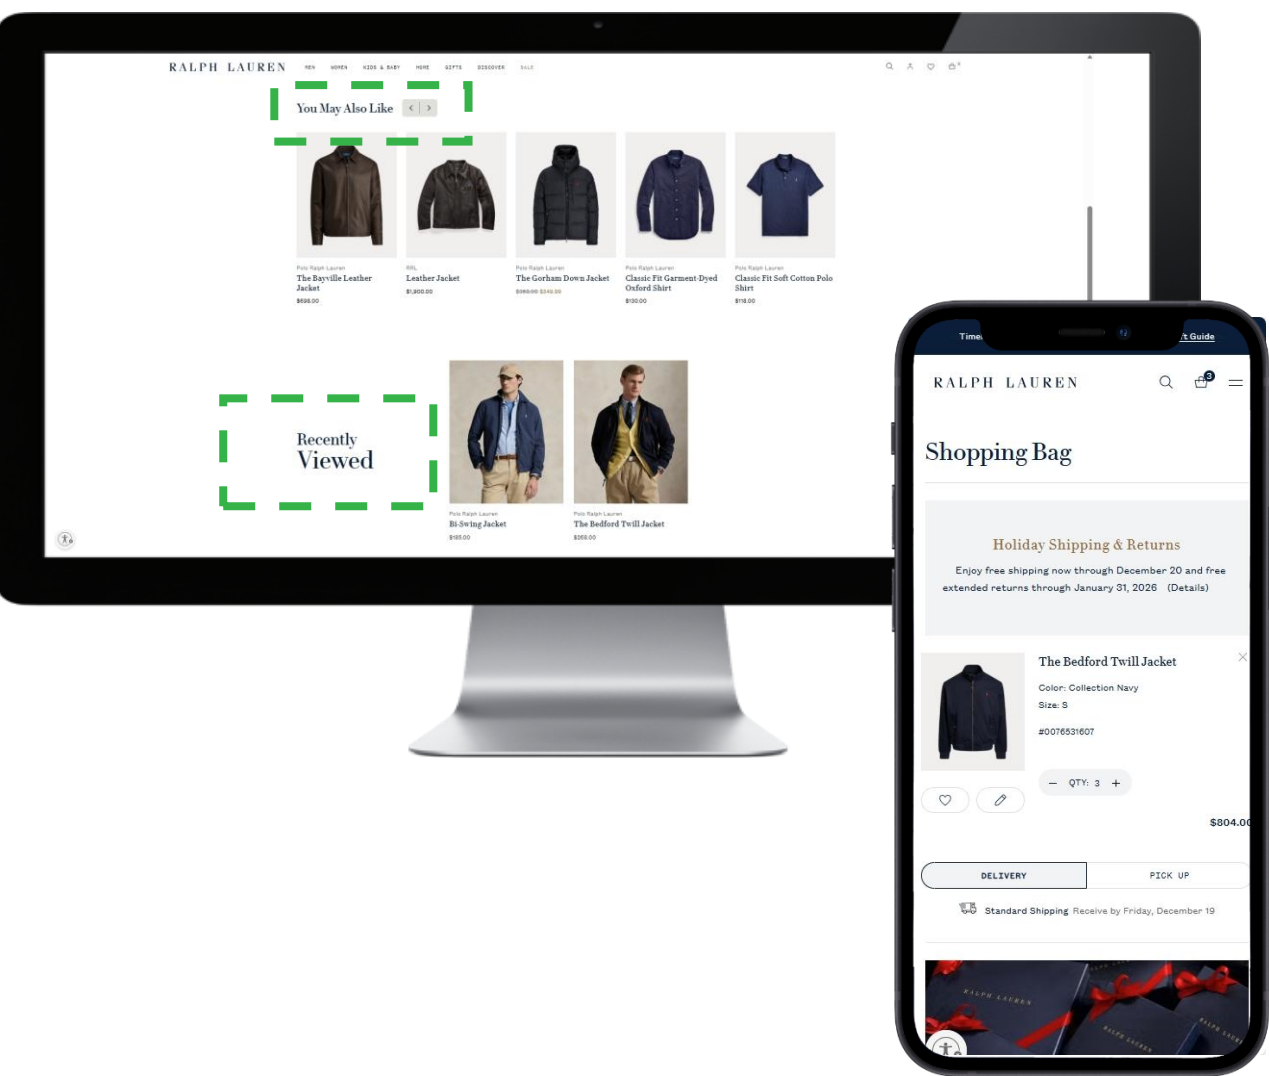

Cross-sell After ATB
Cross-selling after ATB matches consideration of new products with the appropriate journey stage

Single Item Confirmation
Single item confirmation simplifies progression to checkout

Takeaways:
Simple progression allows for cross-sell opportunity

Personalized Cross-sells Consistently Message The Same Best-fit Products

2

Two Personalized Recommendations
“You May Like” and “Recently Viewed” recommendations capture attention in different ways

Takeaways:

Continuous personalized recommendations can improve cart additions, especially when you cover all your bases

A Stand-alone Sign In Page Encourages Account Creation For Easier Future Purchases

Stand-alone Sign In Page
A stand-alone sign in page puts full emphasis on account creation for data capture and faster checkout in the future

Many Progression Options
While the added page adds difficulty, enabling sign-in via email, Facebook, Google and Apple while maintaining a guest checkout option mitigates added friction

Takeaways:
Account creation is clearly valuable but also adds checkout friction. Granting as many sign-in methods as possible mitigates that friction

Obvious Bag Access Makes Information Fill Less Scary

Sticky Bag Summary

“You May Like” and “Recently Viewed” recommendations capture attention in different ways

Full Cart Visibility

“You May Like” and “Recently Viewed” recommendations capture attention in different ways

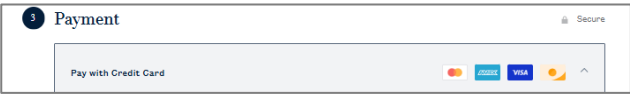

No Sign In

“You May Like” and “Recently Viewed” recommendations capture attention in different ways

Takeaways:

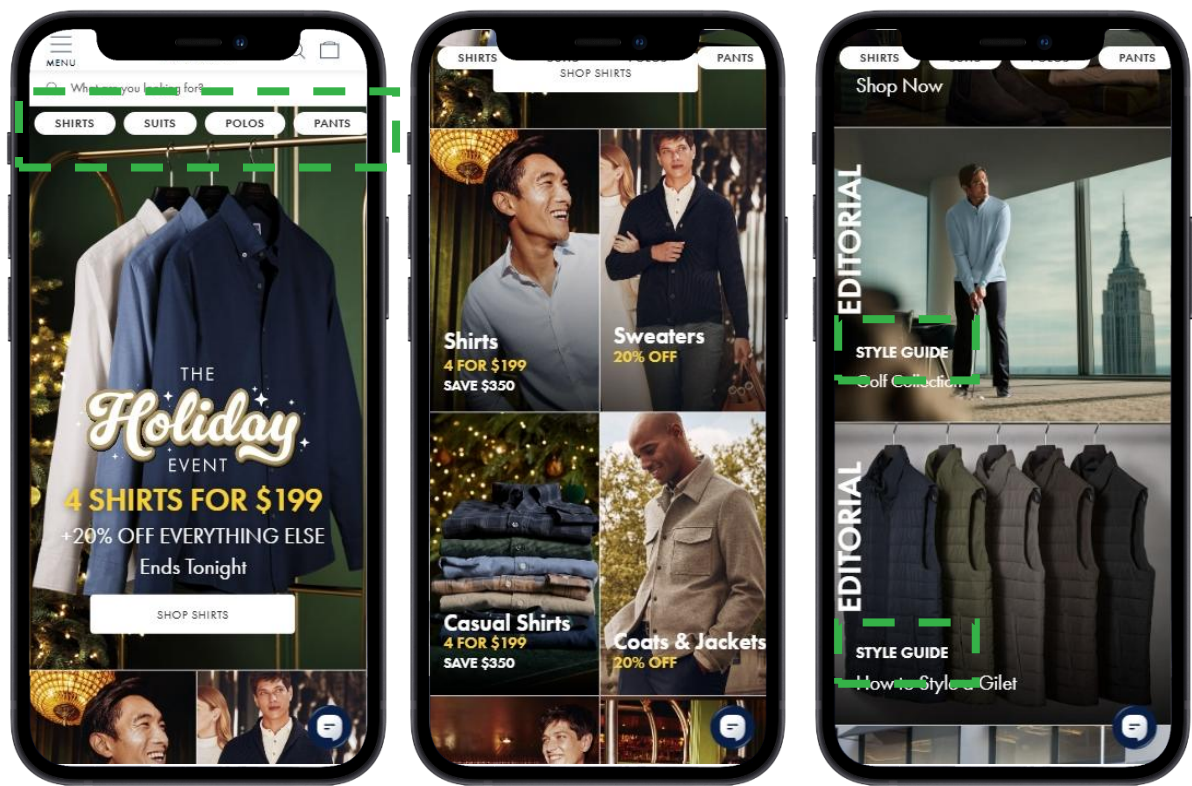

Placing bag summary access at the top of the checkout screen gives users confidence to move forward

Having a standalone sign in page removes the need for a sign in feature in the checkout flow

Charles Tyrwhitt

Unique Pathing Inclusive Of Styles Personalized To Occasions Educates Shoppers

Sticky Product Type Buttons

Sticky product type buttons maintain popular links and allow users to progress down the appropriate funnel for the product of interest

Style Guides Educate To Remove Indecision

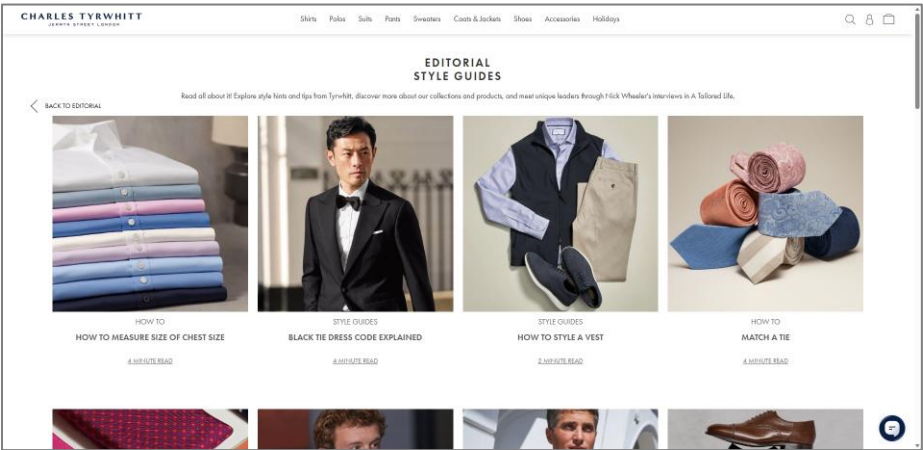

Style guides tell shoppers what they need if they're shopping for a specific occasion, decreasing indecision

Takeaways:

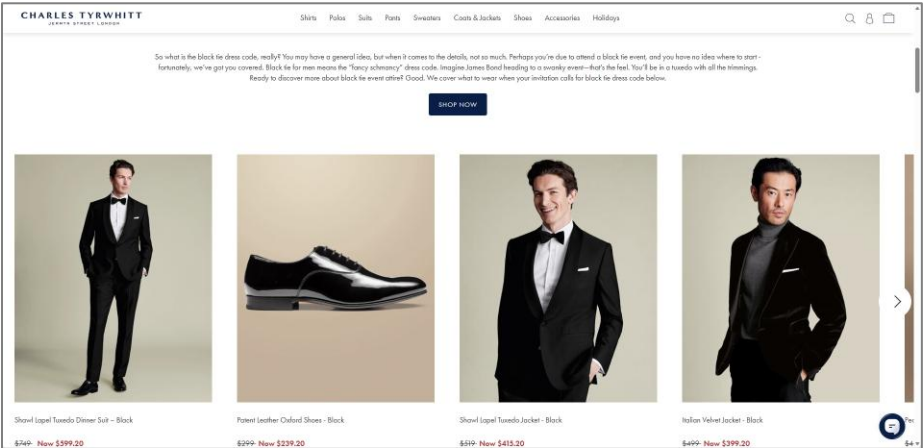

Product type pathing allows shoppers to immediately get started on what they're looking for

Style guides add inspiration and education on what is needed for specific occasions

Style Guides Help Shoppers Decide

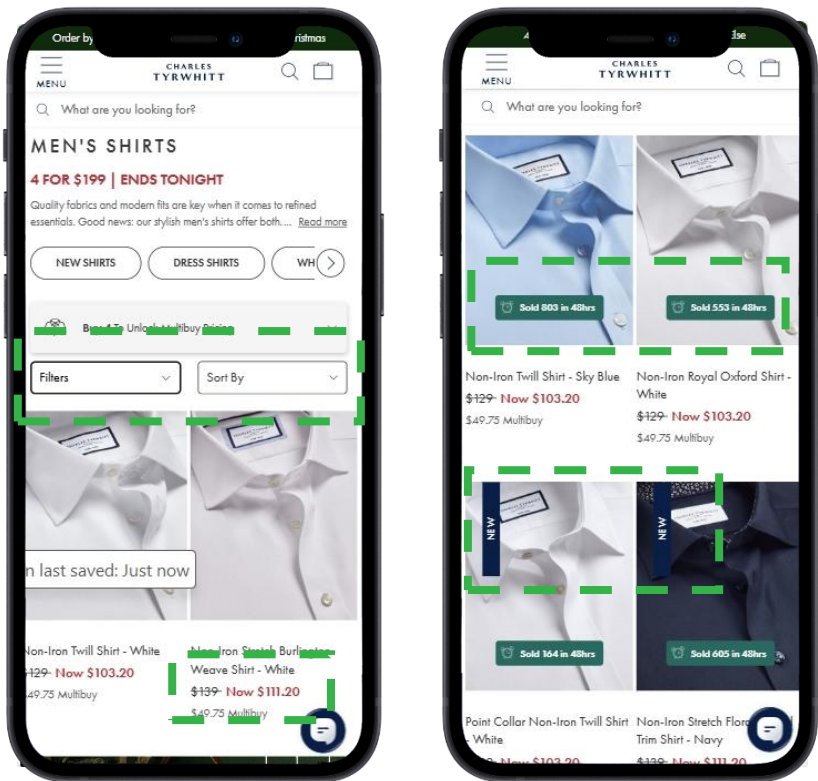

Style Guides Help Shoppers Decide
Helping users understand what to wear on certain occasions can help move them from awareness to consideration

Takeaways:
Helping users understand what to wear on certain occasions can help move them from awareness to consideration

Product Information Available On Load Makes Decisions Easier

Popular & New Product Tags

Information tags present buy signals in a digestible way that doesn't compete with other important information

Red Sale Text

Red sale text demonstrates the urgency of the sale and encourages immediate purchase to capitalize

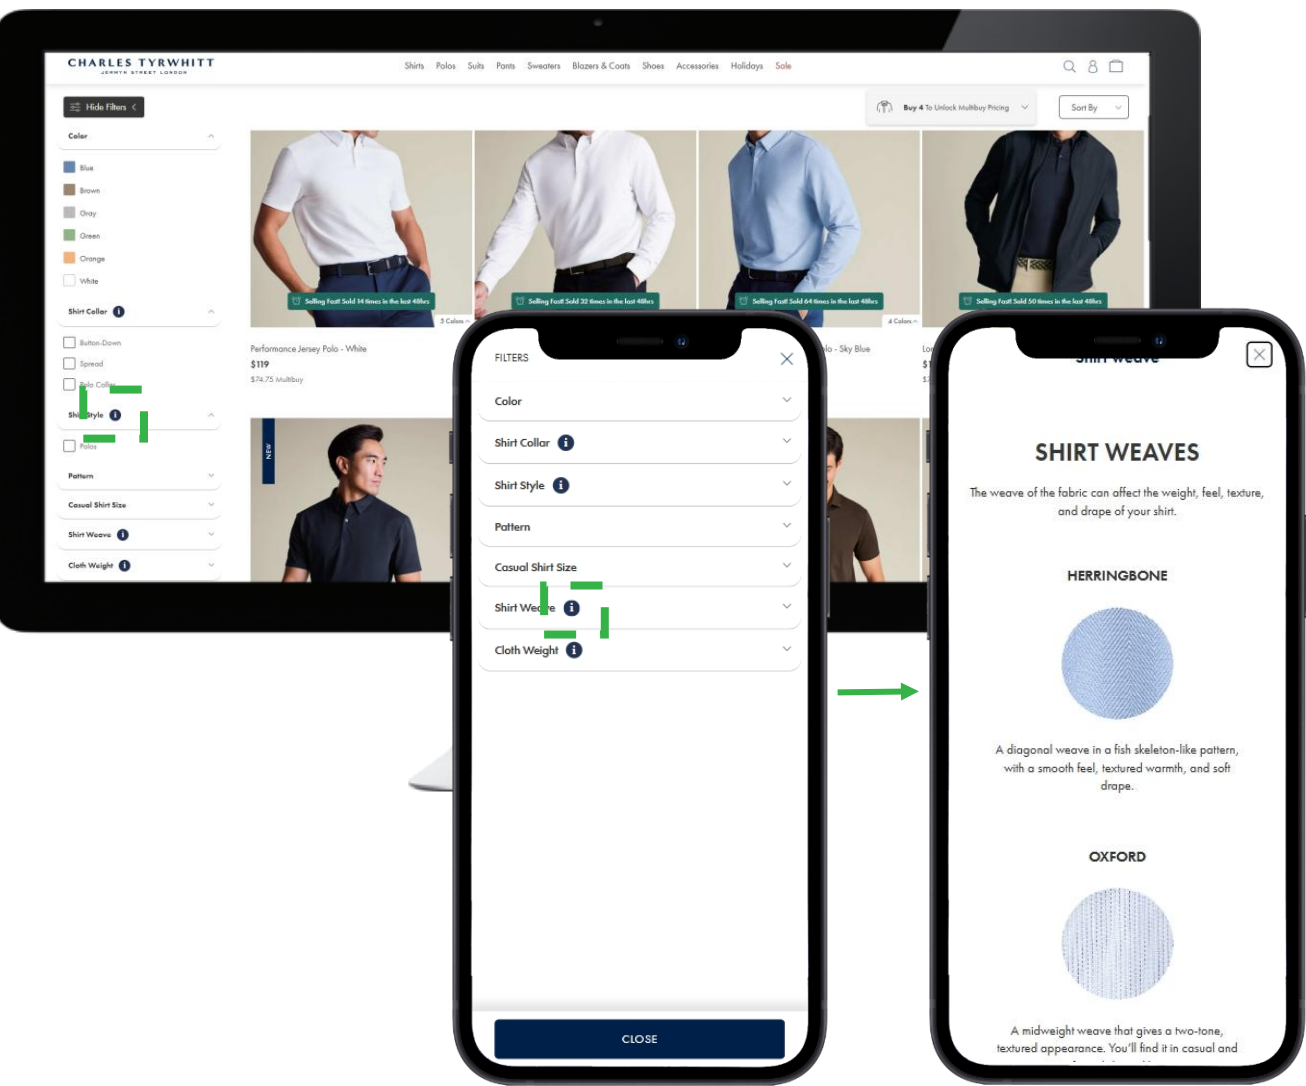

In-Page Sort Dropdown

Separating the sort & filter dropdowns makes sorting easier

Takeaways:

Having information as accessible as possible makes decisions easy and reduces user fatigue as shoppers progress

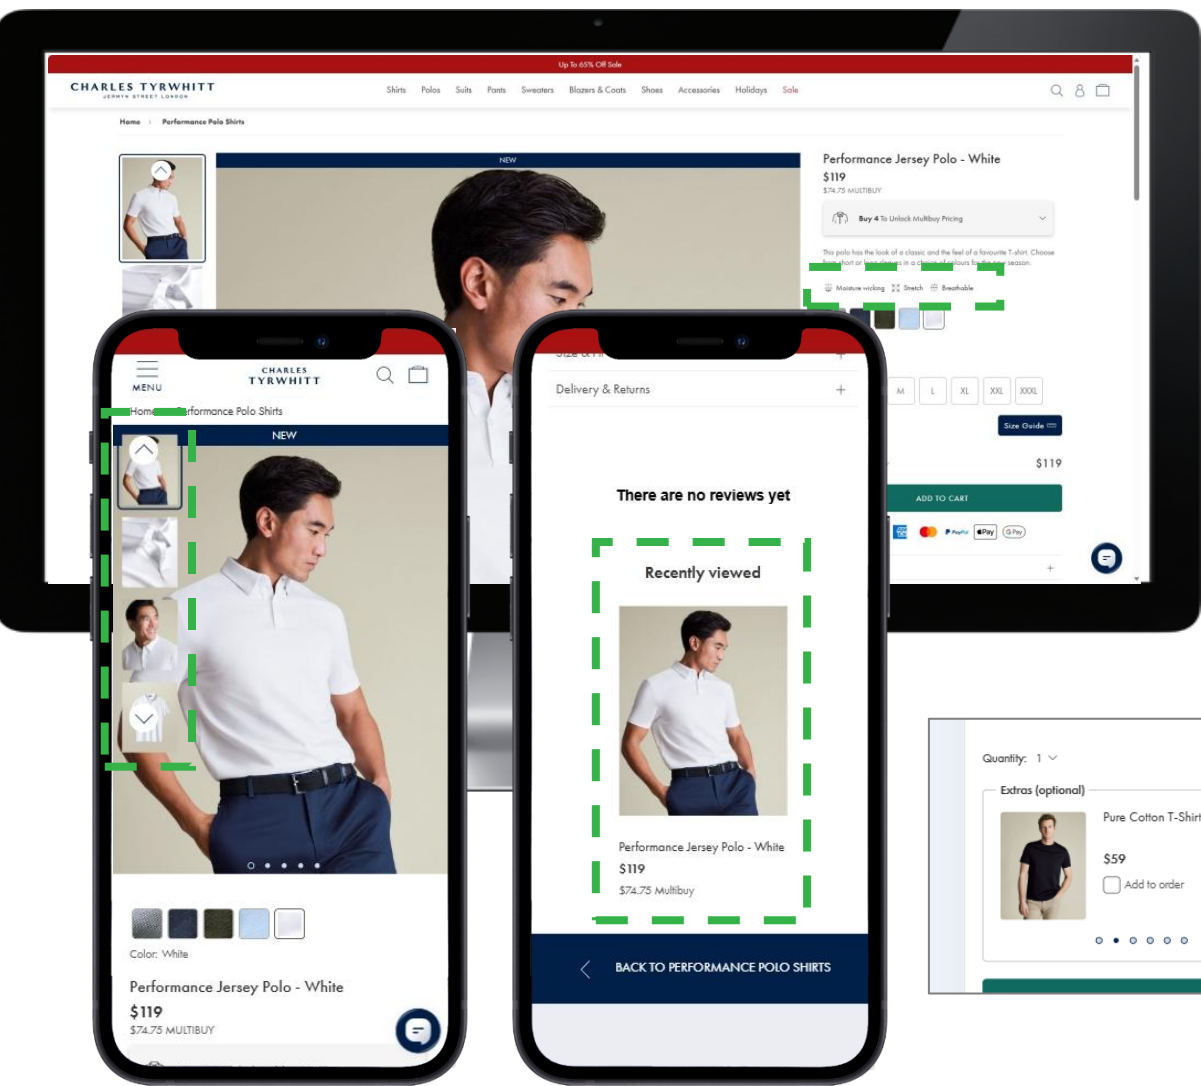

Detailed Information Gives Users Confidence & Control

Filter Info + Visuals
Adding info icons that lead to clearer descriptions of filters and their values gives users greater ability to find the right product for them

Takeaways:
Giving maximum detail without disrupting or displacing important information and functionality should improve user selection / education capabilities

Efficient Layouts Communicate Without Displacing

Efficient Layout

Adding product images on top of the main image reduces use of vertical space on the mobile page

Recently Viewed & Extras

Recently viewed personalizations help engage users for relevant cross-sells

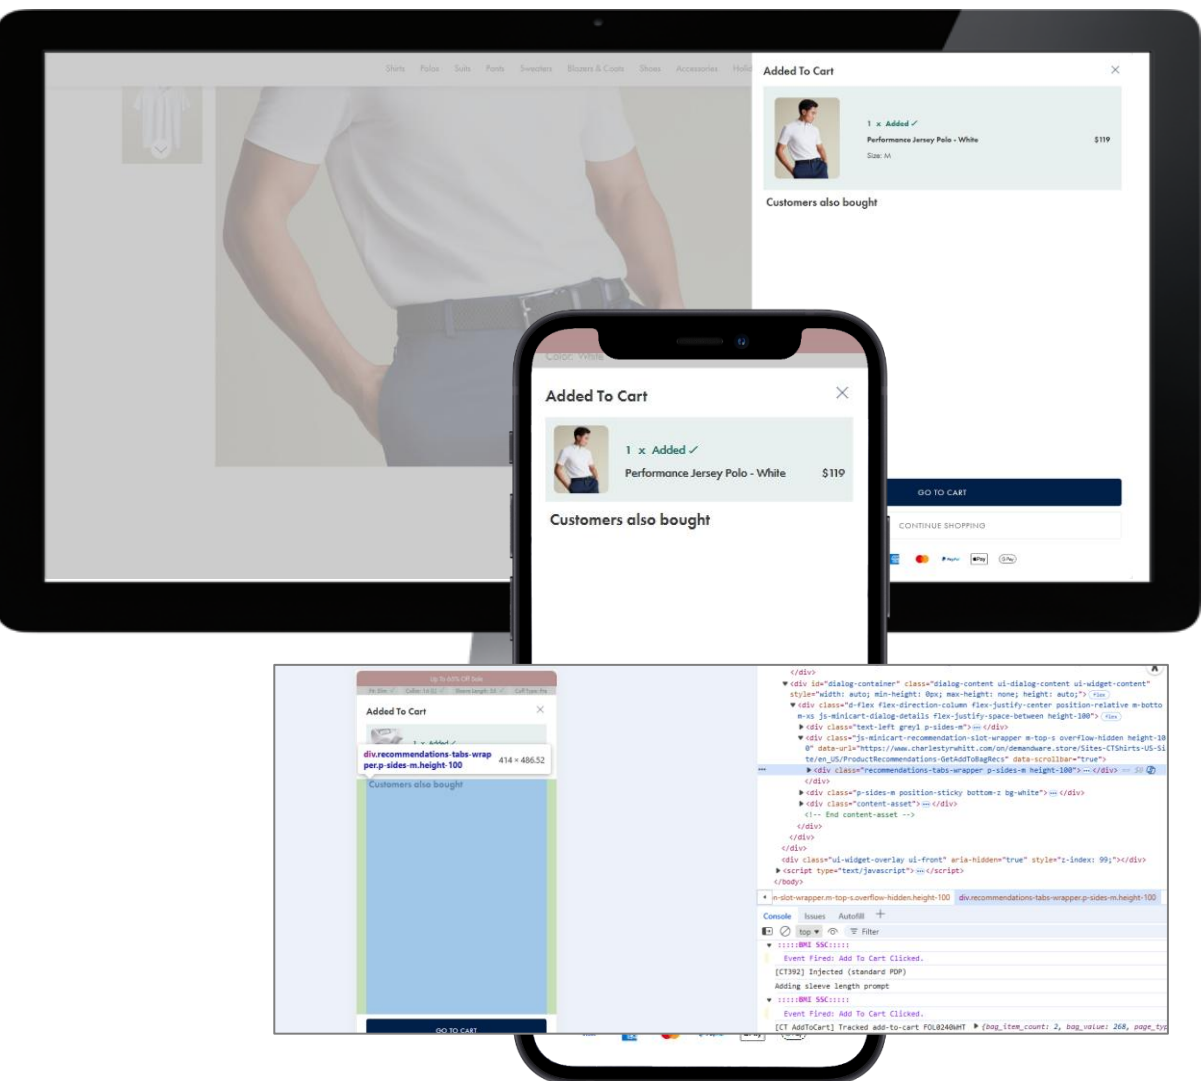

Benefits Bar

A short list of benefits confirms for users why they are interested in this product, in addition to the obvious of they like the way it looks

Takeaways:

Making the most of on-page real-estate maximizes page value

Focused Confirmations With Recommendations

Cart Confirmations Only On Most Recent

Because Charles Tyrwhitt forces users to view cart before checking out, a single product in mini cart keeps views simple while still providing enough information

Relevant Cross-sell

Cross-selling during product selection aligns better to journey stages and places a relevant product in front of a user at the right time

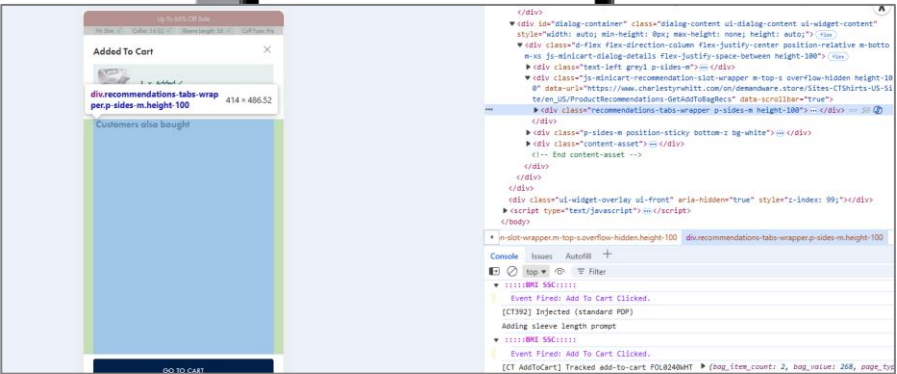

Personalized Recommendations

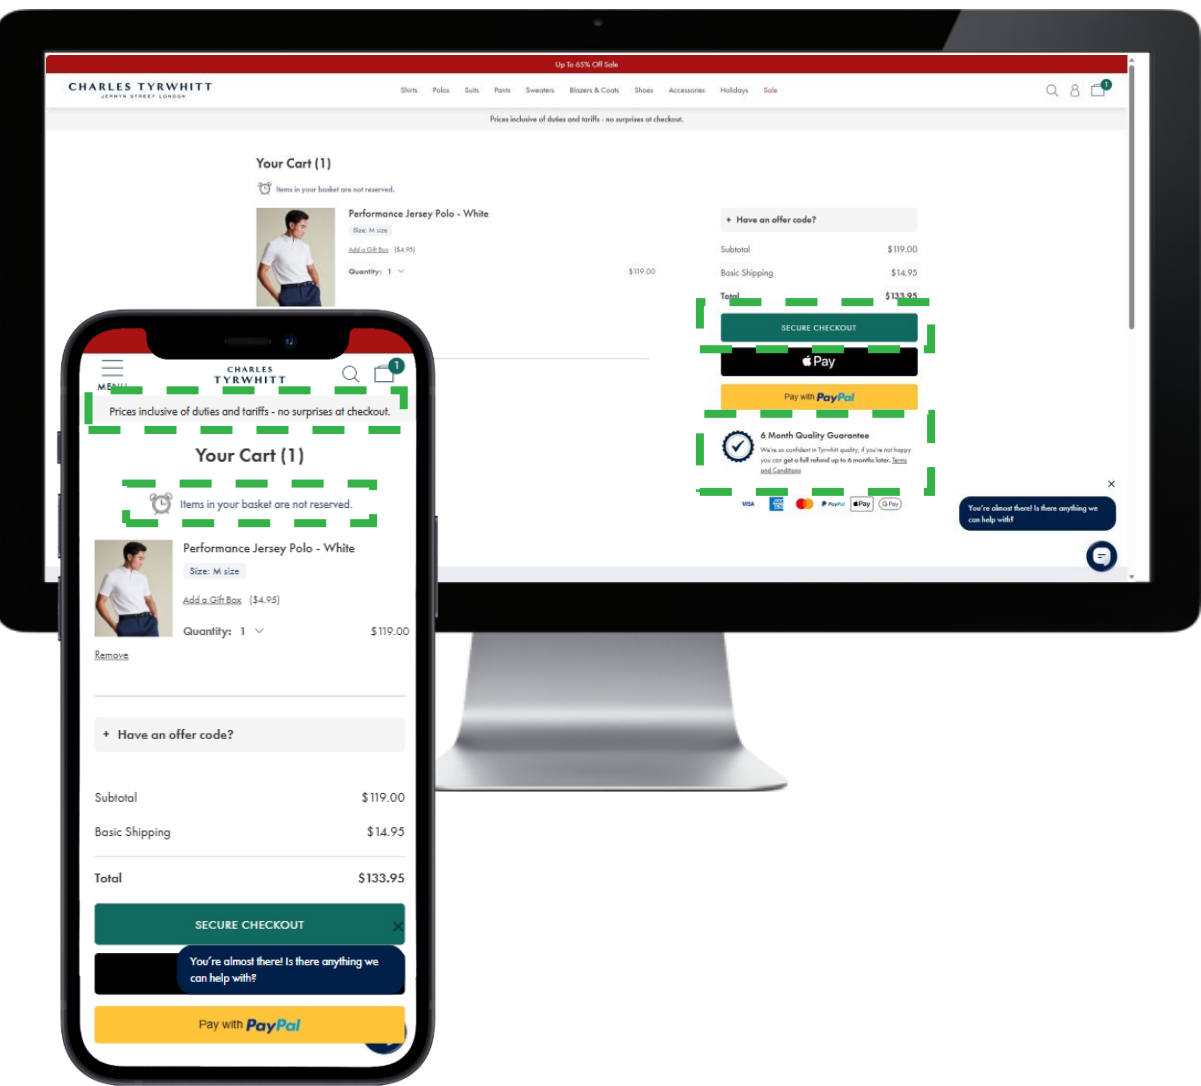

Personalizing recommendations improves relevance for best performance

Takeaways:

The best time to cross-sell is before a user gets to cart

Cart Messages Deliver Push In Final Steps

In Cart Trust Signals

Trust signals let users feel safe with their data

All In Messaging

“All in” messaging gives users security that they won’t go through the checkout process only to be surprised with a higher price, and lets them know that might occur elsewhere

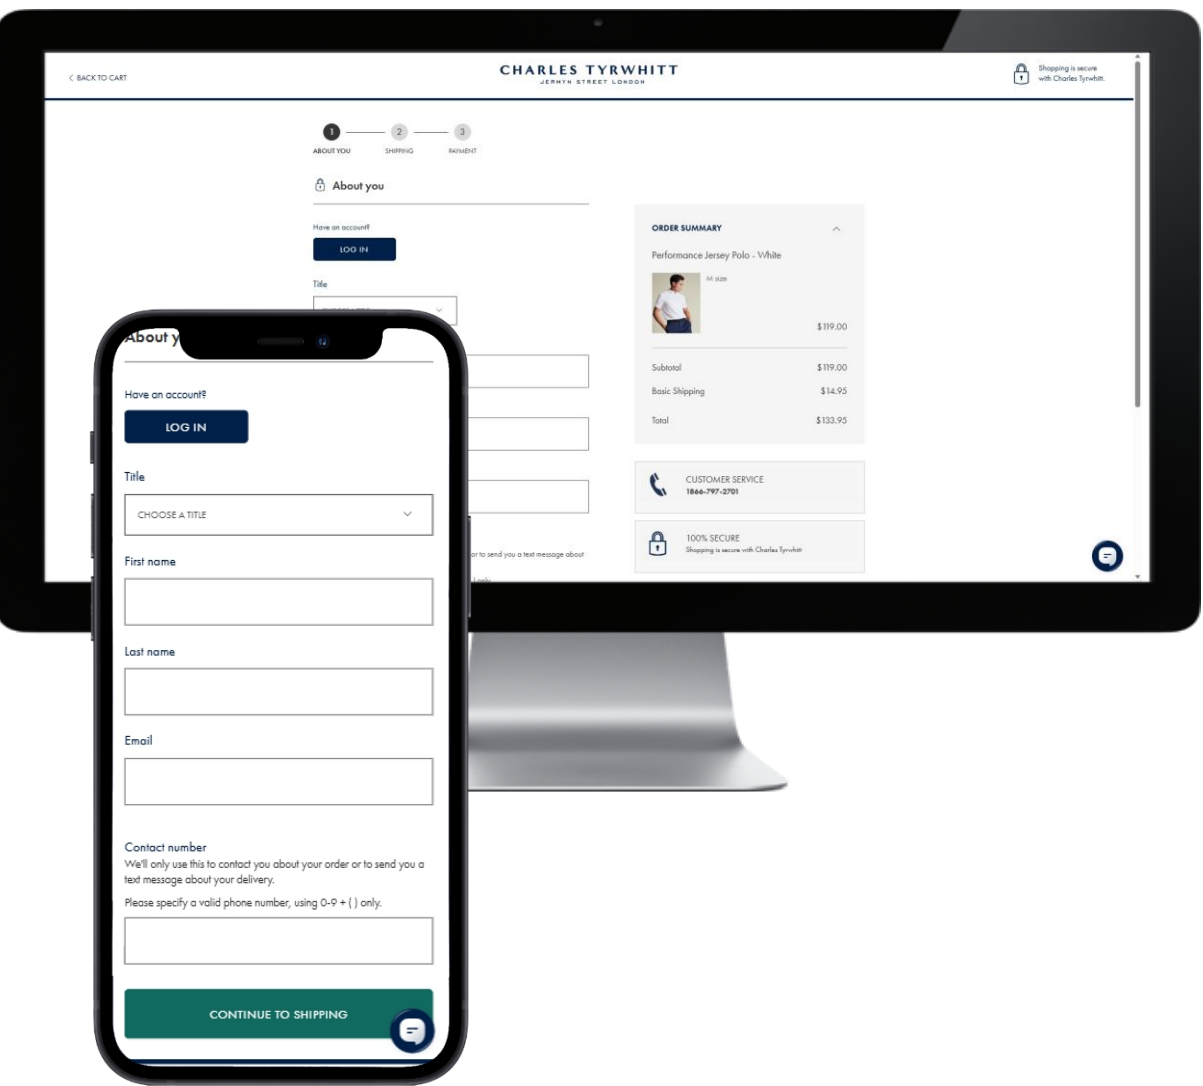

Urgency

Indicating that certain items might sell out may push users to check out where they may have otherwise let the products languish in cart

Takeaways:

Cart page is value real estate for final push messaging

Simplified Layout May Tunnel Users Into Ordering

No Cart Icon

A simplified layout may encourage completion of the shipping step

No Cart Summary

A simplified layout may encourage completion of the shipping step

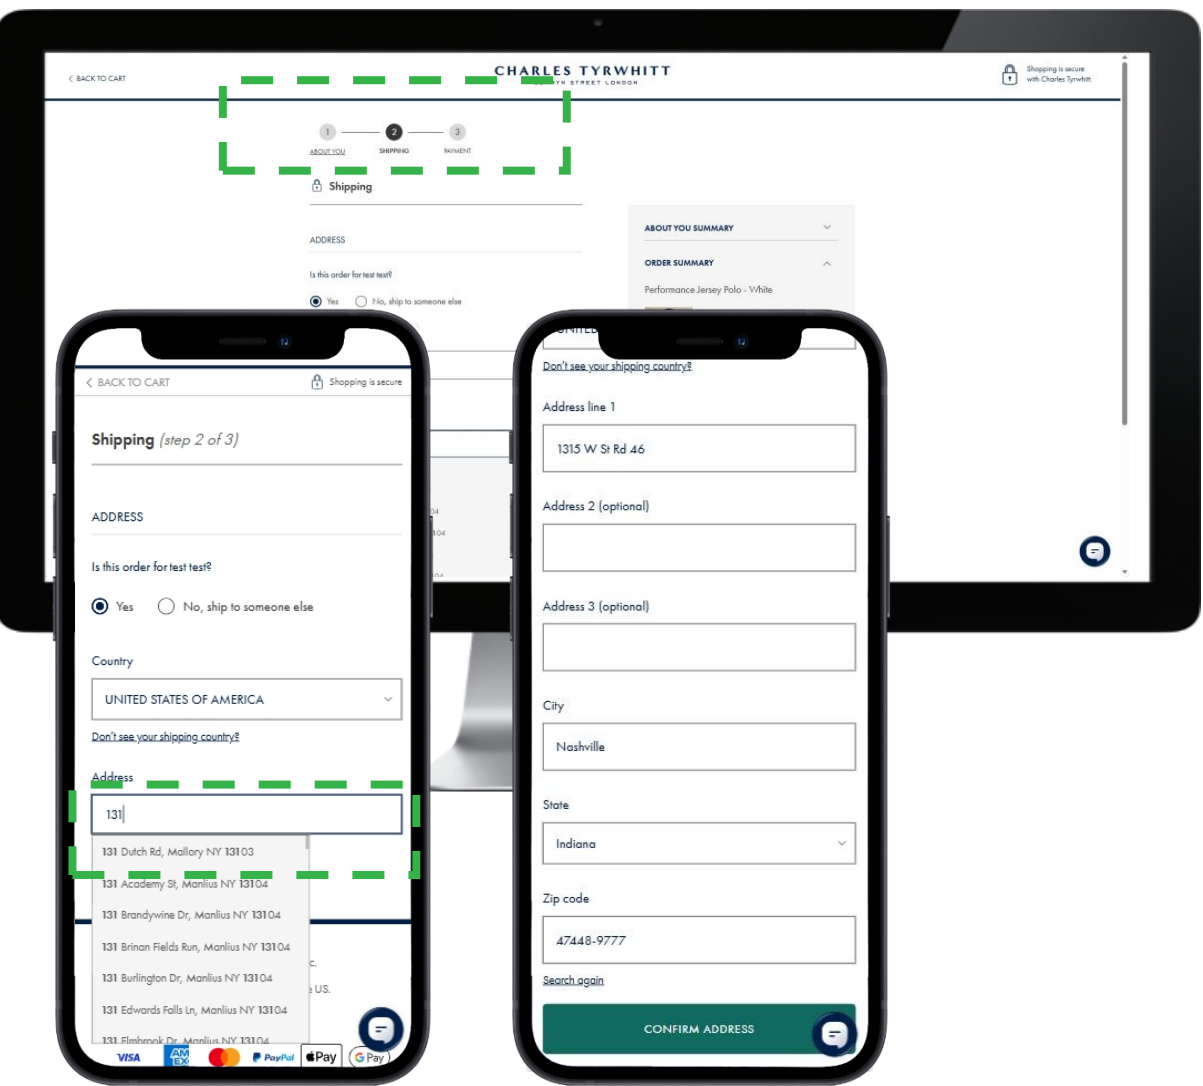

No Express Payments

A simplified layout may encourage completion of the shipping step

Takeaways:

A simplified layout may encourage completion of the shipping step

Simplified Inputs Increase Ease

Single Address Input

A single address search field that auto-populates the remaining values and expands for legibility makes input easy while allowing for detailed review

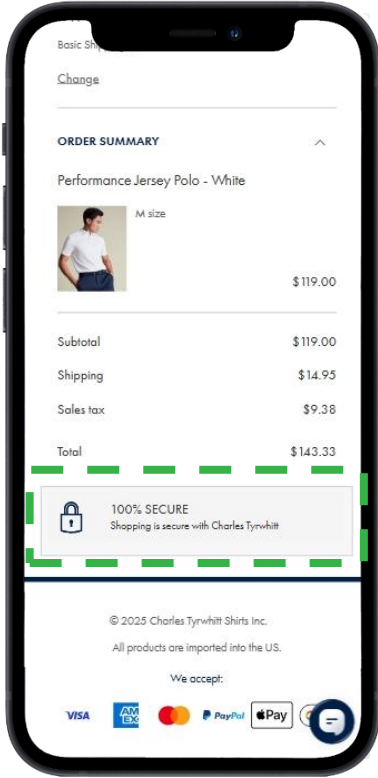

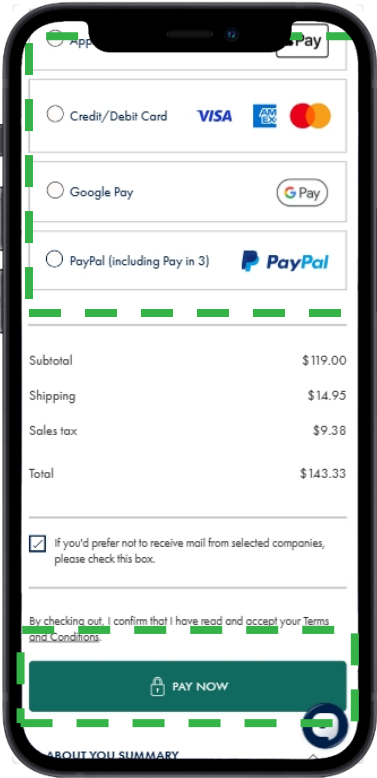

Separated Billing & Payment

Separated billing and payment may make progression easier

Takeaways:

A single address input that expands for legibility after entry makes the input easy without compromising trust

Security Confirmations Can't Hurt

Security Emphasis

Charles Tyrwhitt emphasizes security throughout the checkout journey

Takeaways:

Customers care about security
